NEW SUIT BROUGHT TO OUST ESPEE FROM OIL LANDS

LOS ANGELES, Aug. 26.—An action was filed in the U. S. District Court here today to oust the Southern Pacific Company and subsidiary interests from oil lands in Tulare county.

WINNIPEG, Man., Aug. 26.—Ice was in water troughs last night and six to eight degrees of frost was reported from all parts of a large wheat growing area in Alberta and Saskatchewan.

LEE MAKES FRANK MURDER CONFESSION

Killed Father, Mother and Younger Brother Because He Lacked Money.

EVANSVILLE, Ind., Aug. 26.—William Lee, 22 years of age, confessed that he murdered his father, Richard Lee; his mother and younger brother, Clarence, and then set fire to the family home at Booneville, Pa., Thursday in the hope of concealing the crime.

COMMISSION ASKS ROAD SUGGESTIONS

Supervisors and Business Men Offer Ideas About Highways.

SACRAMENTO, Aug. 26.—The first step taken by the state highway commission which was appointed a short time ago by Governor Johnson in the matter of getting into action upon the selection of highway routes under the \$16,000,000 highway bond issue was taken today.

ANOTHER HOMICIDE IN OKLAHOMA FEUD

Is Killed From Ambush.

PURCELL, Okla., Aug. 26.—Charles McClure, an adherent of Pony Starr, who on May 29 last killed three members of a mob that attacked him, was shot and killed from ambush here tonight.

TWENTY-FIVE CRUSHED TO DEATH WHEN CRY OF FIRE IS RAISED IN A THEATER

Pittsburg Building—Hundreds Caught and Scores Injured in Narrow Stairway

CANNONSBURG, Pa., Aug. 26.—Twenty-five persons were killed and more than sixty injured tonight, when a moving picture theater exploded in the Cannonsburg opera house. Immediately following the flash of the film, some person shouted "fire." There was a rush for the exit and in a moment there was a writhing, screaming mass of humanity ten feet high in the narrow stairway leading to the narrow front of the theater.

WILD WEST SHOW OPENS STATE FAIR

Supervisors and Business Men Offer Ideas About Highways.

SACRAMENTO, Aug. 26.—With perfect weather conditions prevailing, the fifty-eighth annual California state fair opened today with a large attendance.

NEW TRUSTEES FOR VETERANS' HOME

SACRAMENTO, Aug. 26.—Governor Johnson made several changes today in the personnel of the board of directors of the Veterans' Home at Yountville.

CARELESS STEAMER CAPTAIN PAROLED

Release of Van Schaick Re-calls Loss of 1000 Lives

NEW YORK, Aug. 26.—Captain William Van Schaick, 72 years of age, who was commander of the excursion steamer General Slocum when it burned in Hell Gate, June 15, 1904, with a loss of a thousand lives, mostly women and children, was paroled by the United States government today.

THROWS GIRL INTO LAKE FROM STEAMER

HOLLAND, Mich., Aug. 26.—Angered at the maid, because Grace Lyons of Chicago broke her promise of marriage, Walter Hopper of Chicago tonight, attacked her on board the steamer Puritan in mid lake and tossed her overboard.

TAFT ASSAILS COMBINATION ON TARIFF

LaFollette and Underwood Playing Politics, Says President.

BILLS VERY CRUDE

Hasty Compromise Between Protective and Revenue Theories.

HAMILTON, Mass., Aug. 26.—President Taft began the presidential campaign of 1912 today. In a speech that breathed defiance and condemned the efforts of the insurgent Republicans and the Democrats combined to revise several schedules of the present tariff at the special session of Congress just closed.

TWO FATALITIES IN AUTO RACE

David Buck, Noted Driver, and Mechanician Caught Under Machine.

ELGIN, Ill., Aug. 26.—The 365 mile automobile road race today, won by Len Zengel in a National car with Harry Grant second and Hugh Hughes third was not accomplished without its toll of death and injuries.

NEW WORLD'S RECORD FOR LONG DISTANCE FLIGHT, 746 MILES

MOURELON, Aug. 26.—M. Helles, a young French aviator, today broke the record for a single continuous long distance flight, in competition for the Michelin cup, by covering 746 miles, 746 miles, in fifteen hours.

NEW YORK, Aug. 26.—The body of a woman was found floating in the Hudson river today, near the foot of the city hall. The body was identified as that of a woman named Mary Kelly, who was reported missing several days ago.

News From Central California

OCCUPIES HAUNTED HOUSE JUST A DAY

H. Beall of Kern City Has Troublous Night With Unearthly Visitors.

KERN CITY, Aug. 26.—What would you do if you heard your front door slam at the solemn hour of midnight and rushed there to find no one in the hall, if you heard loud steps going up the stairway and ran out to see no one there, if you awoke to hear some one talking to you and yet no one in sight?

Probably you would do the same thing that H. Beall and his family did; you would move out. Mr. Beall sold out his grocery store on Baker street last Thursday and moved into a house on Kentucky street. Thursday night things started. The sleep of Mr. Beall and his family was disturbed by unwholesome sounds. The front doors rattled, the windows shook, voices were heard, stamping feet were going up the stairs, and finally, grabbing his revolver Beall started out to investigate.

But the noises came from every part of the house and he was finally forced to give up the search for the unearthly visitors did not make their presence known by any form manifestation. Beall remained awake the rest of the night and the sounds continued.

He moved out the next day and now he is investigating the history of the place to ascertain whose restless spirit it might be that is haunting the house. The residence has been vacant for some time, the family which had rented it being forced to move because of the unearthly visitations.

OPENING OF ORANGE MEN'S CLUB DELAYED

New Idea in Porterville Is Growing in Popularity Among Growers.

PORTERVILLE, Aug. 26.—Work started today on the decoration of the large room in the second story of the Davis block, the corner of Main and Mill streets, which room is to be used as the general assembly of the new club quarters to be opened by the Chamber of Commerce.

It has been found that the formal opening of the new club rooms cannot take place before the 28th of October. A number of the tenants in the second floor of the building have refused to vacate and therefore a formal notice cannot be made effective under thirty days and there is considerable work to do in the remodeling of the rooms, the opening will be at least a month later than originally planned.

N. M. Ball and F. L. Kennedy, the committee in charge of furnishing the rooms, reported at the meeting of the chamber last night that they have purchased the billiard, pool tables for the club billiard room and that they will be held ready for delivery when wanted.

An important adjunct to the club rooms will be an elegantly furnished rest and reading room for ladies. This room is to be furnished by the members of the Ladies' Improvement club. It will have every convenience for the wives of ranchers who come here to trade and a maid will be in attendance to take care of small children while the mothers do their shopping.

That the new club idea is destined to be more than popular is shown by the report of the membership committee, of which H. C. Carr is the head. He states that he has been approached by a score of people who have indicated their desire to become members, these being in every case orange growers whose homes are out of town. Applications have been made for all of the rooms to be provided for living quarters.

It is planned to have present a number of the dignitaries of the state at the formal opening, this phase of the opening having been discussed last night. Tentative plans for the evening have been made and it is desired to have attend were made out and the visitations will be sent out soon, so that they may be in ample time to prevent other engagements interfering.

ARRESTS LIKELY IN SQUIRREL WAR

Two Growers May Have Cost of the Work Charged Up Against Their Land.

PORTERVILLE, Aug. 26.—Arrests for failure to comply with the terms of the new law requiring property owners to eradicate squirrels on their land are prompted by Henry Zimmerman, the state inspector in charge of this district. Two property owners have been given ten days in which to appear before the district attorney and show cause why the law should not be enforced against them and why the state should not proceed with the eradication work and the cost against their property in the form of a lien. The two on whom the notices have been served are Cyrus Hutchins of Los Angeles, the owner of a 100 acre tract of land near Terra Bella, and J. L. Lynum, who owns a quarter section near Duran.

Mr. Zimmerman stated today that other arrests will be made shortly unless the property owners begin work at once. There are said to be a number of cases in which the property owners have absolutely neglected to do the work, and other cases in which the work has been done in such a slovenly manner that it is little better than useless. Zimmerman says that notices have been given time after time and that official patience has been exhausted.

DEMAND DAMAGES FOR CUTTING LEVEE

HANFORD, Aug. 26.—The Empire Investment company and Empire Water company are made defendants in an action brought to recover heavy damages in the Kings county Superior Court by W. P. Way and D. E. Meier. They claim that the defendants drew out a levee on Kings river and allowed the water to overflow their lands to the extent that seventy acres of alfalfa, forty of oats, one hundred and thirty of barley, a half acre of potatoes and two hundred cords of wood were lost. Besides this the land was damaged to the extent of \$7,535.39 and the total for which they seek judgment is \$20,523.50. The plaintiffs further seek an order of court compelling the defendants to repair the levee and keep it in repair.

TWO BARN SAVED BY BUCKET BRIGADE

TULARE CITY, Aug. 26.—A cow barn, 90 by 50 feet in size, and with capacity for 40 cows, was destroyed on the Wm. Swall ranch by fire this morning with its contents. The fire was discovered before it had gained much headway, but unfortunately the men were sleeping out the reservoir and there was no water available at the time. Another and larger barn, built by came near going also, but finally the electric pump was started and a bucket brigade formed, which by hard endeavor saved the threatened building. The burned barn contained 40 to 50 tons of hay. It was a finely equipped, with electric lighting. Mr. Swall thinks the barn was covered by insurance, but the hay will be a total loss.

PERSONALS IN NEWS FROM THE TOWNS OF CENTRAL CALIFORNIA

TULARE

TULARE CITY, Aug. 26.—Frank Guerin and family returned last evening from an extended automobile trip to the coast. They went from here about four weeks ago to Plamo, and from there up the coast as far as San Francisco.

Mrs. H. Kemble leaves tonight for San Francisco, where she will spend a few weeks with her mother, who has been ailing for some time.

Mrs. E. B. Campbell has returned from Oakland, where she has been for about three weeks visiting her mother. Ed. Campbell, who has been quite ill for the past month or so, was around the street this morning and says he is feeling much better.

J. N. Abbot and wife returned last night from a trip to Big Meadows. They have been gone for about three weeks.

J. F. Evans of Tipton was in Tulare this morning on business. Mr. Evans is making plans to move into Tulare for the winter in order to give his children an opportunity to attend the Tulare schools.

Mrs. W. T. Caldwell and daughter Miss Ora, and Miss N. J. Burge, will return home tomorrow from San Jose where they have been for six weeks.

Mrs. E. Sayre and family returned last night from Merced, where they have been for several weeks on an outing.

Mrs. A. A. Rose has returned home from Merced, where she has been for the past month on a vacation.

Mrs. Bert Spickelmire and daughter, Miss Edith, returned last night from Long Beach, where they have been for several weeks on a vacation.

Mrs. E. E. Poupert and daughter returned last night from Long Beach, where they have been for several weeks on a vacation.

Mrs. W. C. Clifton left this morning for San Francisco, on a few weeks vacation. Dr. Clifton is in the north and will meet her there.

Mrs. G. Lerda and son left this morning for Lodi, where they will visit with friends and relatives for a few weeks.

Geo. Robertson and family are moving to their ranch in the Thompson Colony tract today.

Mrs. Toser left this morning for Stockton, where she will visit her daughter for a short time before returning to her home in San Francisco.

A. L. Powell will leave tonight for Bakersfield to meet his wife who has been visiting in Nebraska for the past several weeks.

Mrs. E. E. Ellsworth Berthel are expected home this evening from Long Beach, where they have been for about a month on a vacation. Mr. Berthel had been in poor health and went south to rest for a while.

D. C. Gray is in Tulare today from his ranch, where he will leave tomorrow for San Francisco on a business trip.

Mrs. C. H. Holley and daughter left this morning for their home at Porterville, after a visit of a few days here with Mrs. Holley's mother, Mrs. A. G. Woodward.

Mrs. Topper is expected home tomorrow from Los Angeles, where she has been for a week or so on a vacation. The two Purdy families expect to leave in a day or so for Ontario, where they will make their home.

W. L. Sellers returned last evening from a trip to San Francisco and the coast cities. His family is at Santa Cruz.

VISALIA

VISALIA, Aug. 26.—District Attorney Frank Lamberson is back from a pleasant outing spent in the mountains of this county. He was a member of the Walker-Zartman party of Tulare, numbering fifteen, and visited the Kern lakes and other resorts. This evening Deputy District Attorney Burke left for San Francisco on a ten days' outing.

County School Superintendent J. E. Buchanan, accompanied by his son, returned from a vacation spent in the southern part of the state. They visited Long Beach, Catalina and other popular resorts.

Judge W. B. Wallace left tonight for San Francisco, where his family is spending the summer. He is the little daughter of Mr. and Mrs. Stafford of Woodlake who was terribly burned a few days ago, is resting comfortably at a local sanitarium, and hopes to be out for her recovery.

Leon Goldstein is in San Francisco on business.

C. J. Walker, city school superintendent, is home from a trip to San Francisco.

East—Bagby is home from San Francisco where he attended the national convention of Eagles.

J. Sub Johnson and party leave tomorrow in autos for the Lost Hills and Devil's Den districts where they have property interests.

SELMA

SELMA, Aug. 26.—John S. Gordon left this morning for Great Falls, Mont., in response to a telegram telling of the serious illness of his mother, Mrs. M. S. Gordon. He has been here until three years ago when she returned East. In June of this year she went to Montana on a visit, intending to come back the last of September.

W. F. Fowler left Wednesday for Aubrey with a crew to work on the Baptist mission chapel being erected at that place.

M. A. Sawrie went to San Jose Thursday for a week or ten days' outing. Mrs. Sawrie has been visiting relatives there for two weeks.

Mrs. Joe Carlson returned to her home in Long Beach yesterday, after visiting with her son, Lester Carlson, and wife.

E. E. Byrne has sold his Berenda ranch to Will Post of this place and will move back to Selma about October 1st.

Mr. and Mrs. George W. Gilmes moved into their new bungalow corner of Tulare and Lee streets, this week.

M. L. Pirie returned early this week from a deer hunting trip in western Oregon. He reports that his party had no trouble in "bagging" the limit.

Prof. M. A. Erwin and family came home yesterday from an extended visit with relatives in Texas.

J. M. Brown and son, Leland, arrived home last evening from a visit of over three months with relatives in Missouri, Montana and Idaho.

Rev. W. T. Howe will preach at the union park services in this city tomorrow evening. Subject, "Hornets and Angels."

H. Lewis is expected home from the north at the close of next week.

F. P. Hoover made a hurried auto trip to Armstrong on Pine Ridge and returned this week, bringing his fam-

LINDSAY PREPARING FOR ORANGE SEASON

Navel Crop Expected to Show Increase of 35 to 40 Per Cent.

LINDSAY, Aug. 26.—This city is making more extensive preparations than ever before for the coming navel season, both in the handling of the fruit and the accommodation of the buyers, etc., coming in at that time.

The Lindsay Fruit Association House is having its basement extended to run the full extent of the building, 35,234 feet. The foundations, floor and walls are of concrete and the splendid basement will be used for the storage of fruit, sweet oranges being built for use when needed.

This house is now the largest in the central citrus belt and is capable of handling as much fruit as any other two houses in the district. It is equipped with the most modern machinery as well as a reserve of that and it is estimated that the coming navel crop in Lindsay will show an increase of from 35 to 40 per cent over last year, including new acreage coming into bearing. Matured groves are expected to give an increase of 25 per cent.

The house mentioned put out last year 357 cars; this year they expect to reach 400.

The current number of the Sunset Magazine contains a good descriptive article on the Lindsay district, by M. B. Leitch, and a review of that and the distribution of the illustrated booklets published by the Board of Trade, the secretary of that body is now receiving inquiries relative to the district at the average rate of ten per cent.

Prospective investors and settlers are also looking at the Lindsay place and it is evident that we shall have an immediate influx of the most desirable class of people in the near future.

Mrs. O. B. Batchelder has returned from a vacation in the southern part of the state.

R. K. Hunkles returned a day or two ago from a stay of three weeks in San Francisco.

Mrs. O. P. Gulterson returned, recently from a vacation in the northern part of the state.

Howard Hostetter is spending a few weeks' vacation in San Francisco.

Mr. and Mrs. Ben F. Youngman have returned from a two weeks' vacation at Long Beach.

A representative of the Wells-Fargo Company was in town a few days ago and appointed M. C. Smith, "one" a sub-agent for the sale of the company's domestic money orders.

Mrs. Herbert Hodge, who has been spending the summer at Long Beach, returned home a day or two ago.

George Foster returned home Wednesday from a vacation at Long Beach, where he had been called the week before because of the death of his father-in-law.

F. Larkin, who has been employed at Speller's store for a year or more, left a few days ago for Los Angeles, where he intends to reside.

The first class manager of the Tulare County Citrus Fruit Exchange, has gone to Los Angeles on a few days' business trip.

M'CORMICK'S VISIT IS VERY UNCERTAIN

It is Altogether Dependent Upon the Railroad Strike Agitation.

BAKERSFIELD, Aug. 26.—Merchants here are wondering whether or not Vice President McCormick of the Southern Pacific will make his trip to Bakersfield this year to consult with the merchants and other shippers regarding the strike problem here.

The prospect of a strike has thrown all "visiting" plans which the railroad men have had, on level and it is said to be extremely doubtful now, whether they will be here on the 15th of next month, as they had planned.

The first class manager of the Tulare County Citrus Fruit Exchange, has gone to Los Angeles on a few days' business trip.

MRS. SUMNER DIES IN KINGS COUNTY

HANFORD, Aug. 26.—Mrs. Mary Ann Sumner, age 78 years, the mother of Mrs. Patrick Sweeney, passed away last night at the latter's home seven miles southeast of Hanford. She was a native of the state of Missouri and leaves two brothers in Hanford, a sister in Nevada and three daughters—one of the latter being Mrs. Sweeney, another, Mrs. Ellen Dimple of Sebastopol, Cal., and Mrs. Martha C. Crichton of Oakland. The funeral will be held tomorrow, with services at the first chapel an interment following in Hanford cemetery.

CIGAR SELLERS ARE STUNG BY SHARPERS

HANFORD, Aug. 26.—Cigar dealers here are keeping a sharp lookout for two smooth individuals who through a system of "switching dice" or "holding" in the game of roulette, have made a fortune of \$20,000. The sharpers are still in Hanford and have threatened to prosecute the Arcade proprietor, but thus far no suits have been started.

The latter spent the summer there.

Mrs. Henry Ross and children came home this week from Long Beach where they had spent a delightful vacation.

C. S. White and family left Thursday by team for Ventura, where they expect to locate.

Prof. C. T. Elliott and wife returned Wednesday from the south, having spent the summer at Los Angeles and Long Beach.

Mrs. H. G. Drew and daughter, Miss Frankie, went to Long Beach yesterday on an outing of a few weeks.

MERCED BOOSTERS ARE TO VISIT STATE FAIR

Special Train Will Carry Large Crowd to Capital Tuesday.

MERCED, Aug. 26.—Merced is preparing to assist in the proper celebration of Panama Day at the state fair in Sacramento and on Tuesday, August 29th, will send a large excursion to the capital city. Tickets for this excursion have been selling rapidly the last two days and it now looks as though 500 people would take advantage of the opportunity and visit the fair.

A special train has been chartered to run over the Southern Pacific, leaving Merced at 7 o'clock next Tuesday morning. This train should reach Sacramento about 11 o'clock, and returning will leave Sacramento about midnight. The tickets that are being sold for this excursion will be good for a return to Merced on any regular Southern Pacific train up to and including September 4th. The fare for the round trip from Merced has been placed at \$4.00.

The excursion will be accompanied by the Merced concert band, one of the strongest musical organizations in the San Joaquin valley. This band will play a concert in the Merced county booth at the state fair, both in the afternoon and in the evening of that day. The Merced county boosters will keep "open house" during that time and will give away a car load of cantaloupes and melons. Every visitor to the Merced county booth will be treated to a special melon and melon and will see a demonstration of what Merced county soil will produce.

Immediately after the arrival of the excursion in Sacramento, the Merced Boosters, headed by the band, will march in a body through the business section of the capital city. Every booster will be decorated with Chamber of Commerce and Merchants' Association badges and will wear a Merced county sunflower on the lapel of his coat. Visitors to Sacramento from all over the state will be met at the station and will be taken to a natural product of a rich soil. There are hundreds of thousands of acres of sunflowers growing wild in Merced county at the present time. That indicates that there are just so many acres of good land that it is not too much to say that the agriculturist and horticulturist of every state in Merced will be closed on the day of this excursion, as business men and their clerks are all desirous of visiting the fair. The day has been declared a holiday and Merced will be decorated. The slogan of the excursion will be: "We make a noise like a growing city." Appropriate banners will herald the purpose of the parade in Sacramento.

DON'T FORGET
If it's fling cabinets, cabinet supplies, transfer cases, guides, folders, indexes or anything else in that line, that the Fresno Republican is the place to get them.

The Individuality of This Store Is Known

STORES have an individuality that proclaims their intrinsic worth. The individuality of Oberlin's consists in simple honesty and the best of stock. This individuality is accentuated by the persistent insistence in selling things for just what they are; diamonds are sold for diamonds, gold for gold, silver for silver—calling things by their right names. No deception is practiced. We are proud of this reputation. We want all to know it.

This policy has secured us a large custom. It has gained for us a patronage that has made us a reputation that extends beyond the narrow confines of Fresno. Our stock is the most varied in town. The prices are set according to value. The values are determined by careful examination. There is no guesswork. You are sure to get exactly what you pay for.

We want you to come in and see our diamonds, watches, jewels, etc. They are the best. We are always getting the newest things in jewels. We try to furnish the largest stock to select from and we are successful. Ask any one which is the leading and most reliable jewelry store in Fresno. The answer always the same, "Oberlin's."

Autumn Showing

The most fascinating tailored suits, dresses and coats are ready for your inspection and approval. The materials were never more handsome or styles more becoming.

We would be pleased to have you step in and view the new styles whether you intend purchasing at present or not. Our salesladies will give you their undivided attention.

New Initial Muslin Gowns
98c

Just received a lot of new initial gowns. They are something new in a 98c gown. Trimmed at neck and sleeve with one inch Torchon lace run with dainty blue or pink ribbon. Fronts are embroidered; in the center a very pretty initial embroidered in blue or pink. Made of a good grade of muslin. Any initial you desire, 98c.

Our Final Clean-Up Sale
Will Last a Few Days More

There will only be a few days more in which to purchase the summer garments at such extremely low prices. We are desirous of closing out every summer garment in the store and have reduced them to such prices as should insure their quick selling. Waists, dresses, muslin underwear and dress skirts are included in the lot.

Realty and Building News

EXPECT NEW RATES BUILDING RECORD SHOWS ACTIVITY TO HELP REALTY BUSINESS IS HOLDING UP IN SUMMER SEASON

Stables on H Street Got as Prospective Site for Wholesaler.

Number of Good Deals Are Made; Prospects for Fall Splendid.

The real estate man who stood on J street yesterday and summed up the advantages of business in Fresno, had nothing to say of present affairs. It was all in the future for him—the promised seed of homebuilders, is he specially directed to Fresno this fall, the benefits of the normal school, the things practical terminal rates are going to do for property values and for the property demand in this city. That, while he dwelt on the prospects for the future, he had nothing to complain of on the score of the business that was done during the week, was just. In fact, the number of completed deals closed was great, the usual quota of lots was moved off, and it was only in spots that dealers lamented the decline of the past week as "quiet."

As an instance of the things that have been going lately, a deal involving \$25,000 was turned over this week by McKee and Kellogg, in which owners of a dairy farm parted with their property for vineyard land, and a vineyardist decided to get out of the dairy game, and give the time over to alfalfa and cows. The dairy, consisting of 150 acres, located six miles southwest of Fresno, was sold from McKee and Kellogg to Elizabeth Fuchs, the consideration being \$25,000, while Fuchs and Fuchs took over a vineyard four and a half miles out in Elgin valley, from Elizabeth Fuchs.

The movement in city property was steady, while not as remarkably

Value of permits for week ending August 26	\$20,145
Value of permits for August to date	77,800
Value of permits for year to date	707,673
Value of permits issued in July	109,468
Number of permits issued during week	15
Number of permits issued during August	43
Number of permits issued during year to date	487
Number of permits issued during July	63

No cessation is noticed in the volume of business as indicated by the building permits issued at the office of the city engineer. The number and value of permits for this month is almost holding pace with July, which was a bumper summer month in the city's history. It is remarked that both the number and the value of permits holds up, and the month is making a good showing despite the fact that few large jobs have been among those recorded by the city official.

With a little over half the year gone, the value of the permits issued has mounted rapidly over the \$700,000 mark, and with the busy fall season ahead, a million and a half in permits is not believed to be out of the question for this year's record. Much of it is represented in improvements in buildings already constructed, but the greater part of it is in new buildings, some of them to be the finest in the city. When the builders are ready to go ahead with the Short office building on Merced and J streets, and when a few other large jobs of this sort are under way, it is pointed out that the figures will be wonderfully increased.

active. It has been at some times in the past, W. B. Bush and Company, through Manager Higginbotham of the city department, sold a bungalow on White avenue to M. T. Lochart for \$3,000 and a house at 460 Fortcamp, to G. M. Langtry, for \$4,500.

FOR WHOLESALE HOUSE. The prospect of terminal rates, in cutting its shadow, before it, the shape of activity in buildings along the streets near railroads. Activity reported from H street shows that properties are being bought or negotiated with a view to establishing wholesale business when this city shall have become a jobbing town, as it is believed it will be after the new

schedule of rates ordered by the Interstate Commerce Commission, goes into effect. Among the deals reported in the purchase by L. Lauritzen of a livery stable on H street between Mariposa and Fresno, and it is understood this property was acquired in the belief it would soon be available as a site for a wholesale establishment.

The expected movement of colonists West this fall is already heralded by an increase in the volume of inquiry, while this is supplemented materially by inquiries coming from all parts of the country from all sorts of people, and even from England, to which place literature of various firms doing business here has gone.

The new barn put in for exhibition stock is a model. It contains thirty-two large box stalls, and a wide passage with hampers for visitors to view the horses in their stalls. The barn fronts on the line of a proposed new road leading to the track, and is the first of four such barns, which will be put in probably by next year. The others of these barns will probably be devoted to raising stock. The racers are to be kept this year in the old sheds, which have been renovated and neatly whitewashed, and in parts, re-roofed.

The old pavilion has been worked over and given a new coat of paint clear up to the roof. Thorough repairs have been made, so that it is now more sightly than at any time since it was built. The open stand where stoves and other exhibits of the county have been shown is being treated to a new floor and roof, and is to be made a real house this year, instead of a temporary tent, as formerly. Also, the stand where automobiles are exhibited is being given a new coat of paint, and there has been complaint of lack of floor space for the placing of the various exhibits.

The new grand stand, which is placed between the "old one" and the long bleachers, is a solid structure provided with comfortable seats, and with a seating capacity of 1000. The old grand stand will also be used this year, and with its capacity of 1500 and with the seating capacity of the bleachers, it is estimated that 3500 people will find places to sit down this year, while the attractions on the track and the exhibition field are in progress.

SEPARATE VEHICLES. A new system of approaches to the grounds eliminates a feature which has always caused much discomfort—a mixing up of pedestrians and vehicles on one single means of approach to the stand and the track.

This year vehicles will enter by a double road from the north side, on Ventura avenue, one road being for entering vehicles and the other for those leaving. The road leading to the track, instead of being behind the grand stand, as formerly, will be some distance to the north and it is probably to be required that all vehicles which are to be placed alongside the track shall cross to the enclosure within. The gates will be situated at about the eighth post. In following

crator and ice-box for the preserving of supplies. The sinks are so equipped with appliances that there is absolutely no danger of any overflow.

KEYS ARE WIZARDS. The keys, which go with every apartment, are of such kind that they serve to lock and unlock both the door at the main entrance and the apartment door, but no key will lock or unlock any other apartment.

The waterclosets are finished in a rich brown color and are hand-rubbed, which matches with the dark green carpet in the hallways.

In the basement there are separate lockers for each apartment, which can be used as a store room. There is also separate hot water heater which is not connected with the steam heater.

A very high attic decks the top of the building, which serves the purpose to keep the hot air from descending into the building.

OPEN HOUSE SEPT. 10. On September 10, the old Dr. Long house, which is now being renovated by Milo Rowell for a boarding house, will be thrown open. The house will be in charge of Mrs. C. E. Bagley.

The work of renovation is progressing fast, and when finished will present a most modern and comfortable home.

The basement will be used for a dining room. There are also two bedrooms in this part of the building. On the first floor are four spacious bedrooms and a public parlor, while the second floor has three more bedrooms. All these bedrooms are to have hot and cold water.

A very attractive feature of this house will be the number of sleeping porches that have been built. They are four in number.

The kitchen with every apartment is provided, have a refrigerator.

The living rooms are provided with a buffet, and in the disappearing beds, which have been installed in the room, much space is economized. The floors throughout the whole building are of hard wood, and the walls are hard finished in appropriate colors and are washable.

FAIR GROUNDS ARE BEING RAPIDLY IMPROVED

Finish Grand Stand By the First of September; Big Barn Built.

New Plans Will Provide Much for Comfort of the Pedestrian.

Improvement of the county fair grounds, which is proceeding rapidly with a large force of men on the ground, is now apparent. The place will be more attractive than ever before, the big fair to be held there by the Fresno County Agricultural Fair Association, this fall. The new grandstand will be finished by the first of the month, while the big new stock barn is almost finished today. New fences, parking of the south end of the grounds, painting of many of the buildings and a general clean-up of the premises are among the things now being done, in preparation for the fair, and as the opening steps of a comprehensive plan for the permanent improvement and beautification of the county's playground.

Important among the newer pieces of work done upon is the putting in of a "hub" fence, the accepted thing for tracks devoted to harness racing. The present conventional board fence around the inside line of the track is badly worn and broken, and besides that, the spectators view of the horses working on the back stretch. Further, loose boards sticking out endanger the horses, in case they should become the least bit unruly.

The new fence, which it has been hoped would be put in, after Supervisor Mitchell had a look over the ground yesterday, will be four feet high only. The top of each post will be notched, and a four-by-four, neatly planed, will be laid along these notches. Near the bottom of the posts, a one-by-four planed board will be nailed. This gives not only a strong and serviceable fence, but one that does not obstruct view of the horses, on the far stretch, and one that cannot endanger the stock, by loose boards protruding out onto the track.

Further, with a view to making it easier for the crowd to follow the races, new quarter posts are to be put in, each bearing a large red ball, to make it easily conspicuous.

BARN IS SPLENDID. The new barn put in for exhibition stock is a model. It contains thirty-two large box stalls, and a wide passage with hampers for visitors to view the horses in their stalls.

The barn fronts on the line of a proposed new road leading to the track, and is the first of four such barns, which will be put in probably by next year. The others of these barns will probably be devoted to raising stock. The racers are to be kept this year in the old sheds, which have been renovated and neatly whitewashed, and in parts, re-roofed.

The old pavilion has been worked over and given a new coat of paint clear up to the roof. Thorough repairs have been made, so that it is now more sightly than at any time since it was built. The open stand where stoves and other exhibits of the county have been shown is being treated to a new floor and roof, and is to be made a real house this year, instead of a temporary tent, as formerly. Also, the stand where automobiles are exhibited is being given a new coat of paint, and there has been complaint of lack of floor space for the placing of the various exhibits.

The new grand stand, which is placed between the "old one" and the long bleachers, is a solid structure provided with comfortable seats, and with a seating capacity of 1000. A very attractive feature of this house will be the number of sleeping porches that have been built. They are four in number.

out this plan, the old entrance back of the grand stand will be closed completely, and pedestrians will enter by gates on Ventura avenue. As vehicles are to be excluded from the vicinity of the concessions in the rear of the grand stand, it will mean that all this space will be for the exclusive use of pedestrians, and free from the dust and worry always caused by a jam of automobiles and horses among the crowds.

Concessions, also, will be moved further away to the north, to allow more space for the free circulation of the crowds behind the grand stand.

PARK WORK BEGUN. Work of clearing up for the park which the Fresno, Hanford and Summit Lake interurban people are to place in the southern end of the grounds has been begun. Stakes have been placed also for the laying out of the park itself. This will do away with many old buildings that have stood since the county poor house and the old grand stand burned, and that have made the entire field unsightly.

This year the space for parties who may wish to bring along lunches and make of the day a practical picnic will be provided. Houses for exhibits of poultry will be moved from the vicinity of the pavilion, to the south and the fine grove about the pavilion will be filled with benches for the use of the visiting crowds.

The new turnstiles for the pedestrians' gate have arrived and are soon to be installed.

INVITED TO ATTEND RAILROAD OPENING. PORTERVILLE, Aug. 26.—At one of the most important meetings of the Chamber of Commerce held this year there was presented to the directors last night, by a special committee of the Upper Tuolumne development association, a formal invitation to visit Springville on September 6th and take part in the celebration of the formal opening of the P. N. E. railroad.

On the committee representing the commercial organization of the hill country were W. E. Cray, A. H. Hoover, Lou Sticks, W. A. Patton and F. U. Nofziger, the latter the general manager of the road.

After the invitation was read, a motion prevailed to accept it and J. W. Thomas, the president of the chamber, as well as a leading member of the Porterville Merchants' association, was empowered to name a committee to secure the settlement of the merchants with respect to declaring a holiday on the day of the celebration. It is generally believed that this action will be taken.

Bargains!

All Summer Goods At Generous Reductions For A Final Clearance

Wash goods—Domestics—Fancy Goods—Millinery—Dresses—Waists, etc.—In fact, everything pertaining to summer—is now offered—at a very low price—

\$995 For Tailored Suits Worth to \$30.00

About 50 garments at a sensational reduction. Nearly all are different styles—several are last season's models. To move the entire lot in a hurry—we have reduced the price to about half the wholesale cost—

Lingerie Dresses \$495 Worth to \$15 Only

They are made of fine, sheer materials, beautifully ornamented with dainty laces and embroideries; several have panel front effects. We consider it a sensational bargain—you can see the styles and judge for yourself.

Wash Fabrics

12 1-2c Figured Lawns 7c In a large range of patterns—stripes—checks—and floral effects—a good sheer quality—that is just right for summer dresses—

26 PIECES— Mercerized Scotch Zephyrs and tissues—30c and 35c values. Special, per yard **18c**
18 PIECES— French Organdies and ribbon striped Dimities; 45c values. All go at, yard **18c**
4 PIECES— Fancy floral Dimities; 40c values. Special, per yard **22c**
3 PIECES— English Flunatics—a handsome mercerized striped tissue; 50c values. All go at, yard **31c**

15 PIECES— Fancy colored dotted Swisses—a large range of patterns; 20c values; per yard **10c**
8 PIECES— Cotton Poulards—all colors, dots, stripes and figures—20c to 25c values. All go at **15c**
12 PIECES— Mercerized Poplin—all shades—fast colors—worth 30c for **15c**

The latest New York, Atlantic City and San Francisco craze is white hats. We are showing a very tasty assortment specially priced, \$2.95, \$3.95, \$7.45, \$10.00.

Every Short Lawn Kimono

In the Store Reduced to To Be Closed Out At Once 98c

No exception—our entire stock—of summer short kimono—made of lawn and light sheer materials—Please note that we exclude crepes—

They are all excellent styles—that were bought especially—for summer wear—All sizes—from 34 to 44—

All Silk 85c Pongee 85c

33 inches wide—pure silk—Shantung pongee silk—our regular \$1 quality—A special—that is staple and reliable.

Einstein's The New Store With All New Goods

Have you tried any of that delicious, refreshing, Blue and Gold Beer? It is the new beer. It is made in Oakland and bottled in Fresno. The taste is perfect. It is particularly a beer to be served in the home with meals.

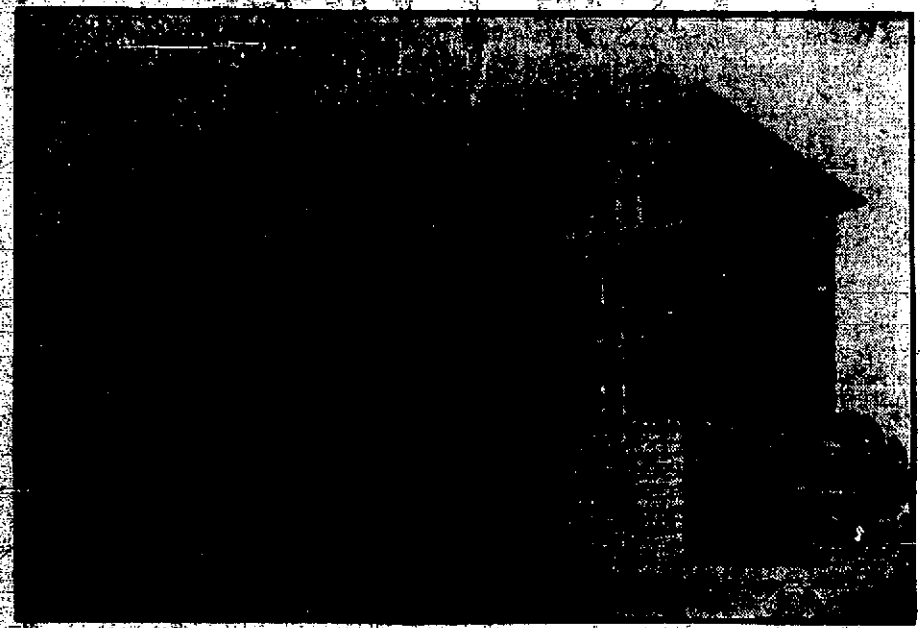

You are sure to like it. The next time you order beer, ask for Blue and Gold.

You will like it. They all do.

Fine Apartment House Will be Opened September First

The Maubridge Apartments, N and Tulare streets, which have been completed and will be opened September first. The building is among the finest properties in the city.

On September 1, the elegantly appointed Maubridge apartment house at Tulare and N streets will be opened. Many of the city's best have already been rented. The Maubridge will be under the direction and in charge of Mrs. T. M. McKelvey.

The Maubridge is modern in all respects. It rests on a concrete foundation, and the structure itself is made of pressed red brick with modern trimmings. The entrance faces on Tulare street. Above the entrance, stretching over the sidewalk, is what

is known in architectural terms as a Marquis, or, in other words, a hanging porch, which protects from the rain and sun before entering the house. In addition to being serviceable, it is artistic and lends a picturesque touch to the entrance.

On the first floor is the office, which will be in charge of Mrs. McKelvey. In the office will be a central telephone station with which all the rooms will be connected.

The Maubridge is four stories in height. An automatic elevator has been installed which connects all these floors. The elevator is equipped with all the modern safety appliances, so that there is absolutely no danger of any injury. The mechanism of it is simple, so that there is no difficulty about the most inexperienced running. By merely pressing a button required. By pressing another button the elevator will descend to the floor the elevator can be stopped at any time and at any place. One of the requisites in running this elevator is that the door be closed, or else the elevator will not run. This feature of it insures no accidents resulting from elevator doors that are left open. The doors of the elevator are made of heavy bronze sliding with thick glass panels.

NO INSIDE ROOMS. The apartments number eighteen in all. These apartments are not all of the same size, but range from two to four rooms each. A noticeable feature about the Maubridge is that every apartment is an outside one.

Each apartment is heated by steam heat and there is hot and cold water, which can be had at all times. The plumbing arrangements are the most modern, thus insuring safety and comfort.

All rooms are provided with ample closet space, there being five closets in the four-room apartments. There are also compartments for garbage and food supplies in each apartment and situated in the kitchen and garbage can be placed and removed in the early hours of the morning without disturbing the occupants.

The living rooms are provided with a buffet, and in the disappearing beds, which have been installed in the room, much space is economized. The floors throughout the whole building are of hard wood, and the walls are hard finished in appropriate colors and are washable.

The kitchen with every apartment is provided, have a refrigerator.

California Oil News

MCKITTRICK FRONT IS SCENE OF ACTIVITY

Much New Work Being Done By Companies Operating in Territory.

MCKITTRICK, Aug. 26.—The United States Oil Company, on section 8, North McKittrick front, is about ready to start its second well. The lease of this company is located three and one-half miles north of McKittrick. The drill in O. C. Heck's first well, section 8, 29-35, in the North McKittrick front, is about 400 feet. Progress has been delayed this week by the drill having struck a large boulder. The King George Oil Company, which recently leased 400 acres in section 8, North McKittrick front, has been drilling on a water well. As soon as water is obtained, and which will, in all probability be reached at a comparatively shallow depth, work will be commenced on the first oil well. The company has erected a large bunk house, a commodious dining room, and also four small cabins. A water line, one mile in length, is being laid by the Speedwell Oil Company between its lease on the North McKittrick front, and O. C. Heck's property. The Speedwell, which has everything in readiness to start on its first oil well, will receive a good supply of water from the Heck lease, whereon is located a well having a daily production of 1000 barrels.

The King George Oil Company, recently organized by Messrs. Conroy, Lutz, Gill and associates, of Bakersfield, for the purpose of operating on section 32, 29-31, North McKittrick front, is expected to inaugurate work at an early day. The lease of the company encompasses the south half of the section. It is not known when H. S. Hayden and associates, who, a few days ago, secured on a drilling contract the south half of section 8, 29-31, North McKittrick front, will commence drilling the first of two wells, but it is presumed that operations will shortly be started. Mr. Hayden has an option for the purchase of the land in the event oil is discovered.

On section 13, 31-32, in the North Midway district, the Fairfield Oil Company is down 900 feet in its first well, with 12 1/2 inch casing.

The Oligo Crude Oil Company has a good production from well No. 1 on section 32, 31-32, in the Midway field, and is progressing nicely with the drilling of well No. 2, the present depth of which is 2000 feet.

The Newman and Morris Oil Company has not yet brought in well No. 1 on section 20, 36-22, but has encountered some gas. The drill has gone through blue shale into brown shale, and it is reported that the depth of the well is now 2050 feet. Streaks of shells and oil have been found.

The Escondido Oil Company is making preparations to start its first well on section 25, 31-31, North McKittrick front, on or about September 1. The company has several good buildings on its lease, which is situated eight miles northwest of McKittrick, and has laid water pipe from Fowler Springs a distance of three miles, to its property. Forty acres of land are controlled by the company.

NEWBRO'S HERPICIDE

A Scientific Achievement.
The discovery and turning in of an alarm of fire makes possible the heroic work of the fireman in putting it out.
Undiscovered, a fire spreads with amazing rapidity, destroying everything within reach.
The discovery of the dandruff germ was of inestimable value to mankind, but only because it paved the way for the greater service, the discovery of Newbro's Herpicide.
Dandruff is contagious, and its spread is checked by the use of Herpicide. This delightful scalp dressing kills the germ, and prevents the hair from falling. It stops that itching almost instantly.
Herpicide is the one standard and original dandruff germ destroyer. Any other preparation making this claim is an imitation.
Send 10c in postage or silver for sample and booklet to The Herpicide Co., Dept. R., Detroit, Mich.
One dollar size bottles are guaranteed by all druggists.
San Joaquin Drug Company, Special Agents.

MISS ANNA M. HOMAN.
MONTCLAIR, Colo. (Special)—"If it were not for Duffy's Pure Malt Whiskey I never could do my work. I am certainly an greatly benefited by a tablespoonful of hot water with sugar which I take every morning, and I am able to do the biggest day's work ever saw. I have recommended this medicine to two different parties who said they were suffering with stomach trouble, and I have never heard a word of complaint from them since. They both take it regularly now. I praise Duffy's Pure Malt Whiskey to everyone I come in contact with. There is nothing like it for a run down system."—Miss Anna M. Homan, 1722 Dakota St.
Duffy's Pure Malt Whiskey is one of the greatest strength builders and tonic stimulants known to science. Its palatability and freedom from injurious substances render it so that it can be retained by the most sensitive stomach. It improves the digestion and assimilation of the food and gives tone and vitality to every organ in the body.
At druggists, grocers and dealers, or direct, \$1.00 a large bottle. Refuse substitutes and imitations; they are impure and dangerous. Send for free medical booklet and advice.
The Duffy Malt Whiskey Co., Rochester, N. Y.
KADLER BROS. Distributors.

PYRAMID HAS BLOWOUT WITH HEAVY PRESSURE

Well on Section 18, 32-25 Painted, But Drilling Is Continued.

BAKERSFIELD, Aug. 26.—After the drillers had been trying for fully twelve hours to get the drill to the bottom of the Pyramid Oil Company's well on section 18, 32-25, the gas worked into the well and threw the mud, water and oil up through the derrick several minutes. The gas in this well for the past 300 or 400 feet has been very hard to control. After this blow-out had lasted for several minutes the drillers controlled and succeeded in getting the drill to the bottom and drilling was continued. G. S. Johnson, president of the Pyramid, who was at the well at the time, said: "I sure thought for a minute that she had got away from us. Oil that she had got in such good quantities with the strong gas pressure behind it that we want to go clear through the oil bearing formation with this well. No other company in this immediate vicinity has ever completely penetrated it."

ASSOCIATED GETS OIL IN LOST HILLS WELL

Second Hole on 13, 26-20 Looks Like Will Be Big Producer.

BAKERSFIELD, Aug. 26.—The Associated Oil Company tapped oil sand with its second well on section 13, 26-20, in the Lost Hills yesterday, and every indication is of a big producer. The first well to be brought in has not yet been tested. Neither of the wells will be opened up until the company's pipe line to this field is completed, which will be in about thirty days, if no difficulties are encountered.

SUES SAN EMEPIO FOR BACK WAGES

BAKERSFIELD, Aug. 25.—F. W. Nightbert, assistant superintendent of the street department of this city, has filed suit in the Superior Court against the San Emedeo Oil Company for \$1,000, for wages alleged to be due him for services as a teamster. To him have been assigned five other claims aggregating \$31.44. The complaint states that all the claims were presented with priority of preference. Under the ends at the time Sheriff Baker attached the company's property and sold it to satisfy a claim of the F. Lucy Company. No attention has been paid the laborer and now they seek to have their claims declared "preferred" by the court.

CLAIM JUMPING IS DENIED BY COMPANY

BAKERSFIELD, Aug. 26.—Claiming that the American Oilfields Company never "will do bodily harm to any person except in the defense of its property and in a lawful manner," the American Oilfields has filed an answer of general denial in the suit brought by F. W. Nightbert, West Side claim jumper, cases. The American Oilfields denies that the company ever used force to gain possession of any land or ever conspired to take possession of Kerr's property.

IMAGINES NEIGHBORS ARE FLYING OVER HIM

Fowler Rancher Is Being Held in Insane Ward Here.

Suffering from the hallucination that his neighbors are flying in airships over his house and that he is unable to sleep because of this fact, J. F. Hedrick, a well-to-do rancher from Fowler, is being held in the insane ward here. He will likely be examined before a lunacy commission tomorrow morning. Alexander Wolter, a neighbor of the alleged demented man, swore to a complaint against him.

Hedrick imagines that every one is plotting against him, and that his neighbors are trying to steal his fruit crop, and selling it, thereby cheating him out of his living. Hedrick is the owner of a thirty-acre vineyard and lives by himself. He told the officers that his neighbors in airships flew over the house at night and tried to rob him.

FRIENDS ATTEND BERBORA FUNERAL

With many friends present the funeral services over the late Nick Berbora, the veteran fruit man, were held yesterday morning at St. John's Catholic church, Monsignor McCarthy conducting the high mass. Interment took place in Mountain View cemetery.

The pallbearers were J. J. Sambruc, Martin Curdovich, M. M. M. John Abramovich, V. Cavandish and N. Petkovich.

THINK VISALIA-MIDWAY IS NEAR TO PAY SAND

Stockholders Interested By News of Showing in Sunset Well.

VISALIA, Aug. 26.—A letter received today states that an increased showing of oil and gas is noticeable daily in the Marcupin-Visalia well on the Sunset flat. The drill is down 3200 feet and in brown shale. It is believed the shale overlies the oil sand and that a strike of the "pay dirt" is probable within the next few feet. The news has excited much interest among stockholders here.

E. O. M'CORMICK CAN HAVE STUBBS' JOB

But May Forfeit Honor to Continue Residence in California.

SAN FRANCISCO, Aug. 25.—E. O. M'Cormick, vice-president of the Southern Pacific, in charge of traffic, has been offered the position of traffic director of the Harriman lines, to succeed J. C. Stubbs, who will retire at the end of the year. There is one obstacle to M'Cormick's acceptance. The position would require his removal to Chicago. It is his desire to live in San Francisco, and for this reason he may decline the offer. M'Cormick would have as a precedent for such a course the refusal of William F. Herrin to accept a position of first importance in New York with the Harriman lines at the time of the recent reorganization under President Lovett. Herrin forfeited the higher honor that he might remain in this city. E. O. M'Cormick is one of the best known and best liked railroad men in the west. He has advanced steadily in the railroad world until he has come to be regarded as one of the foremost traffic experts in the business. He served as passenger traffic manager in San Francisco for a time, and was later called to Chicago and appointed assistant director of traffic. He chose the first opportunity to return here, and came back last year as vice-president of the Southern Pacific in charge of traffic. Recently it was announced that J. C. Stubbs would retire at the end of the year. In looking over the field for his successor, M'Cormick was given first consideration by President Lovett. He was called East, and went to New York, where he met Lovett. He is still in the East and will return to the coast some time next month. It is not believed that any authoritative announcement will be made until M'Cormick reaches this city. In case he should decline the offer it is probable that either T. M. Schumacher or L. J. Spence, assistants to Stubbs in Chicago, would be given the place.

WISE PAPA

Patience—And did your father follow them when they eloped?
Patience—Sure! He's living with them yet—From the Yankers Statesman.

People who "invest"

In enterprises promising abnormally large returns are usually disappointed.
They fail to get the interest they expected and the control of their money passes to others.
The money saver should take no chances with the promoter.
When you deposit your money in this bank, it remains under your control, and earns a sure and steady rate of interest. There is no depreciation in this kind of an investment.
The sooner you begin, the sooner will you be in possession of a growing balance.

Boys' and youths' black tennis Oxfords, worth \$3, at 39c

Children's 5-strap velvet Roman pumps, worth \$1.50, at 95c

Misses' pat. kid high grade jockey boots, worth \$2.50, at \$1.95

SOCIETY

BY MARCIA EDWARDS

The charming old town by the sea, whose houses bear such alluring inscriptions as "Safe Anchorage," "Rest Haven," and various names suggestive of the tranquillity of this model of decorum and highly ethical atmosphere, has been agog with interest over the common society functions of the place. The community has been in short, for two good days, "going to the dogs," some of whom were probably mud before those days were numbered.

The annual dog show was "on" at Del Monte, and the fashionable pup with the other howling swells of canine aristocracy has been on exhibit, cars, automobiles and any available vehicles piled their way with passengers alert and expectant. Hitherto, puns have been provoked by the over-conscious sign, "No dogs allowed," wended to tell of the "dog-gone-dust" place.

Alas! it is funny what a difference just a few hours make. Now the place is described as the "dog-onest." These, and similar scintillations of wit prove that the gray matter is not sleeping, however soothing the environment.

One of the Del Monte stables has been devoted to the housing of several thousand dollars worth of dogness and it was not necessary to designate which building, for from after were wuffed barks, cries, yelps, growls, moans and all other expressions in dog vernacular. All were decidedly more pronounced upon entering the building, and not being denied, I couldn't translate. It was impossible to tell by their faces what their vocal expressions meant, for the majority either were no wrinkled up, or their physiognomies were so covered with hair as to be unrecognizable. There was a bewildering assortment of the admitted beasts with fluffy white poodles (I guess they were poodles, anyway the name seems appropriate), some resembling blue, with cushions and wearing hand embroidered coats to match the cushions. To begin to name the various terriers would require an expert, that is to do correctly, but there were some pitifully ugly Irish ones, and some "Scotties," and of course the bull terriers claimed their share of praise. Snowy white ones vied in preference with the Boston bristles. Miss Jenny Crocker of San Francisco had a new of interesting specimen, one aristocratic Boston bull wrinking up his snub nose at his more plebeian neighbors to the tune of \$5,000.00.

Several perfectly awe-inspiring bulldogs had needless signs "Do not touch" over them.

Was it in jest or in a cruel spirit of irony that prompted one owner to call the most bow-legged, sawed-off, smashed-nosed creature in the exhibition "Venus?"

The wee Pomeranian poodles looked the part of toy dogs and the clipped French poodles seemed to have stepped from some poster in "L'Art de la Mode."

I was fairly breathless while I watched the judge hand out multi-colored ribbons to the owners of several Cocker spaniels and I wondered if in reality he hadn't mentally closed his eyes and said "one, two, three, out goes she," so perfect did each little birdie's setting be. I remember Red Cocker there were, and an assortment of Dalmatians, so long you hadn't any notion how long it took to tally their tails of their emotion, for while their eyes were moist with sadness, their tails would still be wagging, because of previous gladness. A splendid white wolf hound and a fine Gordon setter and some lovable Scotch collies completed the ensemble.

The scene about the judges' ring was gay and most absorbing. How widely different are the types of humanity that admire the same type of dog! Surely there were enough character studies in that crowd to have lasted for hours and hours.

Fresno, as usual, was well to the fore in representation. Among those noticed in attendance were Mr. and Mrs. L. L. Cory, Misses Mabel Cory, Edith Cory, Margaret Cory, Mrs. H. C. Tupper, Miss Anne Tupper, Miss Helen Tupper, Dr. and Mrs. Robert

Cockrell, Mr. and Mrs. Frank Warner, Mrs. S. L. Platt, Mrs. Fred Gregory, Miss Payson, Miss Ida Miles, Miss Kate Parsons, Mrs. W. J. McNulty, Miss Martha Sprengle, Mrs. T. M. Hayden, Miss Edith Hayden.

It was announced yesterday that Miss Mary Maxwell, daughter of Mr. and Mrs. Z. T. Maxwell of this city, will leave in a short time for Honolulu, where she is to be married to George J. Brown, manager of the Royal Hawaiian hotel. Miss Maxwell will leave here Thursday for San Francisco, to sail for the islands by the steamer Sierra on September 2nd. On arrival in Honolulu, she will go to "Aiea," the splendid home of Dr. and Mrs. H. B. Cooper, where she will remain as a guest until her wedding, the definite date of which has not yet been set. The wedding will be at the Cooper home. All arrangements are being being made by Mrs. Cooper. The couple will spend a honeymoon at Haleiwa, a delightful seaside resort on Oahu, some miles from Honolulu, and will later make their home at the Royal Hawaiian hotel.

Miss Maxwell is a very well known here and is a favorite with a very wide circle of friends all over the country. She was for about six years a teacher in the public schools of the county and of this city. Subsequently, about three and a half years ago, she went to Honolulu to teach there, and while in that city renewed a friendship of over a year's standing with Mr. Brown. She returned here over a year ago, and began a study of domestic science at the Fresno school, and the impression was given out that she intended to return to teaching. However, it now appears that the secret which leaked out yesterday existed even at that time, and Miss Maxwell intended to return to Honolulu as a prospective bride.

George J. Brown is well known to many people in this valley, having made several visits here. The hotel which he manages in Honolulu is one of the historic buildings of the island, and is a favorite resort of the better class of Hawaiians. It was built by kings of the old native regime, years ago, but is today one of the most modern hostleries west of San Francisco. About three and a half years ago, she went to Honolulu to teach there, and while in that city renewed a friendship of over a year's standing with Mr. Brown. She returned here over a year ago, and began a study of domestic science at the Fresno school, and the impression was given out that she intended to return to teaching. However, it now appears that the secret which leaked out yesterday existed even at that time, and Miss Maxwell intended to return to Honolulu as a prospective bride.

Mr. and Mrs. J. W. Potter of Clovis, who for many years lived on the well known Potter ranch near that place, sailed yesterday from San Francisco for an indefinite stay in Hawaii. They left here Friday morning. The trip is being made for Mrs. Potter's health, which is expected to be benefited greatly by the favorable temperature and fine sea air at Honolulu. If she shows improvement, their stay on the islands may be prolonged through a large part of the winter. The Potters will be at the Royal Hawaiian hotel in Honolulu.

A watermelon party was given Friday evening at the home of Mr. and Mrs. C. M. Keen on Fisher street in honor of Miss Mae Charles, who leaves shortly for her home in Chicago. The evening was spent in games. Those who enjoyed the happy affair were: Mr. and Mrs. Keen, Mr. and Mrs. T. Ingersoll, Misses Mae Charles, Marie Bobb, Edith Johnson, Pearl Shanks, Anna Brown, Molly Blahod, Edith Hollingshead, Vera Thompson and Elizabeth Kern; Messrs. Jack Freda, Harry Johnson, Henry Schiedt, James Densen, Alex. Jobb, Fred Watson, Milton Hansen, Sterling Hollingsworth, Broaders Keen and Mr. Bell.

Mr. and Mrs. Moises Royshaw have returned from a two weeks' vacation spent at Santa Barbara.

Mrs. Royce Shaw formerly Miss Ruth Casco is visiting her mother in Fresno for a few days.

Luther Nell has returned from a pleasant vacation spent at Big Creek.

A very pleasant party was given in honor of George and Charlotte Sample at the residence of Mrs. Will Sample, Clovis. Games were played under the trees and later delectable refreshments were served. Those invited to this enjoyable affair were: Nanette, Beta and Eva Clay, Elsie and Elsie Kern, Olive and Gladys

Drumhark, George and Charlotte Sample, John Ball, Chester Drumhark and Jack Sample.

Mrs. C. T. Hanson of Los Angeles is spending a few days with Mrs. Fannie Williams, 1425 I street.

Miss Mable Sullivan of this city is visiting with Mrs. Ida Trease in Los Angeles. Miss Trease formerly resided in Fresno and will return with Miss Sullivan next month for a visit here.

The Misses Edna and Helen Burke, daughters of J. Burke of J. Burke of Sacramento, who are on their way to Mexico and will visit points of interest in southern California en route, are spending a few days in Fresno with Mr. and Mrs. Elmer E. Morton of 1411 N. street.

Rev. Gould, pastor of the Congregational church, returned to Fresno yesterday after spending a most delightful vacation in the East. Rev. Gould visited in Chicago and many of the principal cities east of the Rocky mountains. Miss Frances Gould, a sister of the pastor, returned to Fresno with her brother and will make her home here this winter.

Mrs. Della Heriot has returned to Fresno after spending her vacation in San Francisco. Mr. and Mrs. J. L. Reeder, accompanied by their sons Ray and Jesse, returned yesterday from Santa Cruz where they spent the summer.

Rev. A. D. Smith and wife and daughter, Miss Eva, and Mrs. L. B. Griffin, and son have returned from their vacation which was spent in the mountains.

A very pleasant birthday dinner was enjoyed at the home of Mr. and Mrs. R. E. Shattuck at 320 L street, Friday evening in honor of Mr. Ernest Carr's twenty-first birthday. Those who enjoyed this happy affair were: Misses M. Murray, L. Dixon, G. Swift, Mr. and Mrs. Shattuck, Messrs. J. J. Murray, G. Chapman, F. Brown, L. King, W. King, A. Evers, E. Carr.

Mr. and Mrs. J. Pugs are in San Francisco, staying at the Hotel Manx.

Miss Cera McDaniels sailed from San Francisco last Tuesday on the Mongolia for a trip around the world. Miss McDaniels expects to be gone about a year. She will make an extensive tour of Japan, and will then go to India, where she will be joined by her aunt and uncle.

The Lady Macabees gave Mrs. E. J. Cox a pleasant surprise party at her home, 325 Baining street, Friday evening. The evening was spent in playing games and telling stories, after which light refreshments were served. The Lady Macabees will give a social the 30th of this month at their hall. The Y. M. C. A. Mandolin Club will be the chief entertainers of the evening.

Mrs. J. E. Kennedy returned day before yesterday from an auto tour of coast points, which she made in company with her brother-in-law and sister, Mr. and Mrs. F. C. Heubner and her boys, Herbert and Jay. The tour included Santa Cruz, Monterey, Los Gatos, Oakland and home by way of Tracy.

George R. Andrews and daughter, Edna, and E. M. Harris, wife and two children, returned last evening after a three weeks' automobile trip to Southern California. They went down the valley route and returned by the Coast. They visited all the Southern watering places and report a most enjoyable trip.

Mrs. U. G. Smith has returned to Fresno after a year's absence in San Francisco. She came down with her sister, Miss Cora, Crapan and the latter's friend, Miss Bristol. Mrs. Smith's two daughters, Miss Cora and Mrs. Sam Fletcher, accompanied her home.

Miss Mary McKenzie is home from Kings river canyon, and is planning a trip to Oakland before school opening.

Misses Ploy and Ethel Long will entertain their cousin Ethel and Freda Long, this week. Miss Ethel Long of Hanford, is to resume her studies at Berkeley.

Misses Mabel and Dorothy Forsyth will leave September 1st to attend Whitby College, in Toronto, Canada. They will be accompanied by their brother, Harold Forsyth, who will enter Upper Canada College.

Mr. and Mrs. J. M. Bramblett will enjoy a visit this week from Mr. Bramblett's sister, Mrs. Betty Richardson and daughter, Clementine, of Murfreesborough, Tenn.

Mr. and Mrs. Scott McKay are entertaining this week Mr. and Mrs. George Scott of Seattle. They will go from here to Riverside. Mrs. Scott is Mr. McKay's sister.

Miss Agnes Gault, who has been making a tour of Europe, is expected home in about a month. She is now in London, after a stay in Paris.

Miss Gwendolin Barton is home after a week's visit with Mrs. John Griffith Roberts of Modesto.

Mrs. W. W. Cross leaves today for San Francisco to visit her sister, Mrs. W. S. Haskins, for a month.

Louis McWhirter, after spending the summer in the mountains of this county, has returned to his home in Los Angeles. He soon leaves to enter Vanderbilt University.

Mrs. W. F. Toomer and son returned yesterday from an outing in the mountains.

THIEF FUNERAL MONDAY MORNING

Funeral services over the late Mrs. Jennie Thiele will be held tomorrow morning at 10 o'clock from the family residence near the corner of Lincoln and East avenues in Washington colony. While the death of Mrs. Thiele is not a surprise to her many close friends around Cleaver, it is a greatly felt loss as Mrs. Thiele was a highly respected woman.

About 25 years ago she married August Thiele, a prosperous Cleaver rancher, who has made his home there for the last 32 years. Mrs. Thiele survived by seven children. Louis Thiele is attending the University of California but will return in time to attend the funeral services. Henry Thiele, one of the surviving sons graduated from the university last year.

SELMA LAD JAILED ON FELONY CHARGE

Constable Harry Staley of Selma yesterday lodged Ore Myers, a 19-year-old girl, in the county jail here, to await a hearing in the superior court on a charge of burglary. It is alleged that Myers entered the home of Mrs. Emma Watkins in Selma on the first of the month and stole rings amounting in value to \$100. Myers has made a full confession to the constable. His parents who reside in Selma, are unable to do anything with the boy. It is their desire that he be sent to the reform school.

STORIES & FAMOUS POEMS

"Jenny Kissed Me"

Jenny kissed me when we met,
Jumping from the chair she sat in;
Time, you thief, who love to get
Sweetest into your list, put that in.
Say I'm weary, say I'm sad;
Say that health and wealth have
Said I'm growing old, but add—
Jenny kissed me!

One of the prettiest or the very short poems in the English language is that by Leigh Hunt, entitled "Jenny Kissed Me." This poem is frequently asked "Who was the Jenny?" who inspired such a beautiful verse? Many stories, both humorous and pathetic, cluster around No. 5 Cheyne Row, Chelsea, where Carlyle and his "Jenny" spent so many years together. Among their constant visitors none were more cordially welcomed than Leigh Hunt, for whom Carlyle maintained the staunchest friendship, a union of the most apparently antagonistic qualities. The man who has been designated as the "Apostle of Reason" took his heart and cherished the impractical ideal of the "Apostle of Cheerfulness" with a tender, affectionate warmth that made the words of Macaulay, "We have a kindness for Mr. Leigh Hunt," seem cold praise indeed.

Carlyle ardently shared his husband's appreciation of the many good points of the poor poet, and it is to their intimacy that we are indebted for the latter's pretty and graceful little improvisation, "Jenny Kissed Me."

"The happy occasion upon which this poem was composed is well remembered by friends of both," said a biographer of Carlyle. "Hunt came running in one day in hot haste to bring them the good news of Carlyle's having just received a Government pension of 300 pounds. Upon receiving the news Mrs. Carlyle impulsively sprang from her chair and threw her arms about the neck of the 'gray-haired lad' and gave him a cordial kiss."

There never was a more opportune gift than this pension, for Carlyle had been forced to struggle on his meager earnings of a poet and a kind of work which promised gain."

It was a sort of poetical justice.

FIRST CLUB ROOM AT S. P. TERMINAL

Orders Given to Establish One at Roseville for Railroad Employees.

BAKERSFIELD, Aug. 25.—That the Southern Pacific railroad is planning a first class dining room at each of its large yards for its employees at terminals was evidenced yesterday when Mr. and Mrs. Frank Woodbury of East Bakersfield were sent to Roseville to open the first employees' home.

Roseville is a terminal point on the Sacramento division where there is a large yard. This makes a railroad town of the place and because of no proper railroad headquarters, the men are scattered throughout the city.

The plan is to open a reading room with billiard and pool tables and other amusements for the men, that their spare time will be well spent and that they will be better prepared to do their work.

Throughout the East along the New York Central lines railroad Y. M. C. A. reading rooms are maintained, making a valuable increase to the general organization of the company employees. "There is to be nothing of that kind west of the Rockies," stated Chief Clerk Henry this afternoon, "although there has been some rumor for several years past. The opening of the reading room at Roseville is now in an experimental stage and on its success is laid all future arrangements of the company."

Mrs. and Mrs. Woodbury, who will install the first railroad club room on the Southern Pacific system, are well known locally because of their having been leaders in any movement toward the betterment of working conditions among the Southern Pacific employees both on the railroad and in the Kern river fields.

TEACHING TRADES IN HIGH SCHOOL

Kern County Board of Education Provides for One Year Course.

BAKERSFIELD, Aug. 25.—With the completion of the new Manual Arts Building of the County High School there will be inaugurated a new era in the teaching of manual arts.

At the instigation of C. Cottle, who is at the head of the department the County Board of Education has adopted what will be known as the "One Year Trade Course." The adoption of this course is in keeping with the attitude of the county board which is to make the Kern County High School in effect a People's College, rather than an old high school.

The adoption of this course is in the nature of an experiment, never having been tried in a high school, although it has been successful in some of the endowed institutions in the East. Because of this it will be watched with interest throughout the state.

The One Year Trade Course is intended for the benefit of the individual who for any reason cannot attend the high school for the four year course, but who desires to receive a high school diploma and to that end it is intended to give the student a fair knowledge of some trade.

The course as outlined allows for 41½ hours per week, as against 28 hours at present. Of that time 15 hours are divided among the following three subjects: Shop mechanics, English and mechanical drawing. The remaining time is devoted to shop work.

It is believed that should the demand be great enough the county board would also organize a night school, for the benefit of those who, being employed during the day, would otherwise be unable to make use of the advantages offered.

The new building, which will be completed about the first of November, will be a one-story structure and have a floor area of 5,500 square feet, all of which will be devoted to shop work.

The equipment will be as modern as it is possible to make it. All machinery will be direct connected industrial motor driven.

Large Cluster Puffs
\$2.50 Set
22 Inch Wavy Switch
\$1.50 Each

Good quality and well made.

The Best Prescriptions Cost No More

If you accept prescriptions that are carelessly compounded, or that are made of drugs that are not fresh or that may be adulterated, you are taking risks. Medicine is given to cause a certain effect. If the medicine is not up to the standard it will fail in its mission and it will take longer to cure. We are particularly careful to have none but drugs of absolute purity and freshness. That is why the physicians who order their patients to get medicines here are so successful.

WHY WE URGE YOU TO USE OUR MILK

It is because of our knowledge of the excellence of our milk that we urge you to use it in your home. Pure food is so important a matter in the economy of life that various legislative measures have been enacted to insure purity of food products. All measures affecting milk production and all sanitary measures recommended by health authorities are employed by us in producing and handling our milk. The result is a product without a superior in this country in point of richness and purity. It is the kind, the only kind in fact, that you should use in your home, and it is the only kind you will use after investigating our methods of production and handling.

Our dairy is as clean as the cleanest kitchen. Come in and look it over. We know if you do you will become a permanent customer.

WOMEN VOTERS CAN DO VAST AMOUNT OF GOOD, SAYS BELL

Paradise Senator Gives His Reasons for Urging the Suffrage Movement

Women have the intelligence, the perseverance and the honesty of purpose to assist in the uplifting of the State. They have a strength which should not be cast aside in the struggle for better things. They are the complement of men, and in the pursuit of their co-workers. In this belief, I earnestly ask the consideration of the following reasons why the proposed amendments granting equal suffrage to women should be adopted:

THE REASONS WHY WOMEN SHOULD VOTE ARE THE SAME AS THE REASONS WHY MEN SHOULD VOTE. THE ONLY REAL QUALIFICATION GOVERNING ITS USE IS INTELLIGENCE, FOR WITHOUT INTELLIGENCE, ONE'S OPINION ON ANY SUBJECT IS WORTHLESS. Equal suffrage would increase the proportion of educated voters. The High Schools of every State in the Union are graduating more girls than boys—often twice or three times as many.

WOULD TEACH BETTER. There are, in the schools of California, ten thousand teachers, of whom 85 per cent are women. The teaching of civics is obligatory. It is fair to expect a woman, without that last sign of civic responsibility, the ballot, to possess such comprehensive and practical knowledge of public affairs and machinery as would make her an inspiring teacher of civics for boys who already feel their importance as future voters and office holders? Is she in a dignified position to do so? How can she teach the great truth of democracy—that it derives its authority from the eternal rights

of nature, that a Nation includes all its social elements and forces; that a true National representation therefore must include all these; that if one of these forces is neglected, the desire of this neglected force to be represented will inevitably lead to the necessity for a radical change, that the very purpose of the existence of the Nation is the progressive development, happiness and activity of all its social elements and forces—how can she teach these truths and explain the non-representation of women to clear-sighted boys and girls?

WOMEN CONSCIENTIOUS. Women are conscientious, and it would create a large reserve vote, for civic righteousness. Those elements of the community least controlled by the dictates of conscience are always found among the opponents of equal suffrage. She is interested indirectly in good government: bad laws, and the non-enforcement of good laws, directly affect her in all her relations, as homemaker, wage earner and man's co-worker. Property rights should be represented on the same basis for men and women. It is fair and right that those who must pay taxes should have a voice as to the size of the tax and the way it shall be spent.

WOULD ENCOURAGE DEMOCRACY. The inalienable rights of persons as they are affected by legislation must be preserved to women, and no one can fully represent her in framing laws which deal with them. Representative democracy without equal suffrage is impossible, because it is

only through this form of government that people who are subject to them may have a voice in their legislation. Restriction of the franchise tends to encourage aristocracy, while equal suffrage will encourage democracy.

HAVE ALREADY ACCOMPLISHED MUCH. Women all over the United States have accomplished much civic work without the ballot. Many of the laws and reforms of the present day relative to the welfare of the child, the protection of women, and of public health and morals, have been inspired and secured by women, but they have had to arrive at this result by getting some one else to do the work for them. Women should have the right to express their opinions on public matters in a straightforward, direct manner, and they should receive such consideration as every citizen deserves. **WOMAN CAN TAKE PART IN PUBLIC AFFAIRS IN A WOMANLY WAY, AND IT IS BECAUSE SHE IS A WOMAN THAT HER COURAGE AND OPINIONS ARE VALUABLE.**

WILL NOT DESTROY HOME. She is the happiest among women who is blessed with a home and family. If women vote it will not destroy the home. It only means a short time once or twice a year to go to the polls and deposit a marked piece of paper, and during these few minutes she wields a power that is doing more to protect her home and all other homes than any other possible influence, and she need not neglect her household nor her children in order to do it. Almost any woman has enough time to go to the polls, and enough time to inform herself so she can vote intelligently. It has been said that to enter the political arena woman must give up her home interests. This fear is only imaginary. On the contrary, she will stick closer to her home after having reached the goal of her ambition. Her personality enlarged by the profits of her extended activity, will raise the standard of home higher than ever. Having become an individuality herself, she will respect the individuality of her husband and children. There will be fewer misunderstood husbands and more understanding children.

HOME, FAR FROM SUFFERING, WILL GAIN BY WOMAN'S EXTENDED SPHERE OF ACTIVITY. Governor Bryant B. Brooks, of Wyoming, said: "In the first place, let me say that nothing can be so far from the truth as the idea that woman suffrage has the slightest tendency to disrupt the home. Indeed, it has the very opposite effect." Governor Francis E. Warren, of Wyoming, testified: "I have seen much of the working of woman suffrage. I have seen the first case of domestic discord therefrom." Chief Justice Joseph W. Fisher testified: "I have seen the effect of woman suffrage. Instead of encouraging fraud and corruption, it tends greatly to purify elections."

HAVE RIGHT TO MAKE LAWS. Women in their homes are responsible for the health, cleanliness, and the comfort of their families. Many of the industries which women formerly controlled in their own homes have become matters of city and state administration, and it is not fair to hold women responsible for the cleanliness and healthfulness of food, and the prevention of disease, unless she has a right to an opinion about these matters, now that they are public questions. The solution of the problem of cities, which involve insanitary housing, poisonous sewage, infant mortality, impure milk, juvenile crime, prostitution, and drunkenness, should have the help of minds which have in the past attempted to care for the child, clean homes, to prepare foods, and isolate the family from moral dangers. However much the California women would like to stay in their homes, they cannot do so. Economic conditions have forced women to support themselves and others. They have been carried by necessity into all the professions and industries. These relations are constantly affected by restraining or remedial legislation in which women have a right to be heard.

NEVER HAS FAILED. WOMAN SUFFRAGE NEVER HAS FAILED WHERE IT HAS BEEN GRANTED. NO STATE OR NATION HAS EVER REPEALED IT WHEN ONCE CONFERRED. Suffrage cannot now, when considered in its broad aspect, be called an innovation. In half the States in the Union women have the school ballot, and their votes occasionally turn the scales in school elections. In England, Scotland, Ireland, Canada, Kansas, Sweden and elsewhere, women have the municipal ballot, and their votes have effectively influenced such elections. In Wyoming, Colorado, Utah, Idaho, Washington, Finland, Norway, Australia, and New Zealand thousands of women vote for all elective officers, including the highest.

MORE WOMEN VOTE THAN MEN. Statistics show that where women have equal suffrage with men as large a proportion of women vote as men, and a recent census in New Zealand showed that in the last general election a trifle larger percentage of women voted than did the men. New Zealand gave women the ballot in 1893 and sociologists declare that all the magnificent reforms which have put New Zealand in the foremost rank of civilization have had the support of women often in opposition to the timid conservatism of men. The other Australian States have given suffrage to women, and recently the Senate of Federated Australia adopted resolutions expressing satisfaction at the beneficial workings of women suffrage, and urging that all nations enjoying a representative government would be well advised in granting votes to women.

WHAT OTHERS THINK. All people ought to be willing to trust the fairness of Julia Ward Howe. Mrs. Howe wrote to the ministers and editors of the enfranchised states, asking them impartially whether the results of equal suffrage had been good or bad. She received 42 answers, 42 opposed, 46 on the fence and 516 in favor.

Judge Lindsey writes in the February Delinquent: "If woman suffrage has been one of the great evils that has afflicted Colorado to the work of flushing dirt from its politics, bettering economic conditions, mitigating the cruelties of industrialism, promoting equal and exact justice, and making a more wholesome and expansive environment. To these ends, in the brief space of twenty years, it has added in placing a score of new laws on the statute books—it has raised new standards of public service, of political morality, and of official honesty."

WOULD DO BETTER IF THEY COULD VOTE. It is highly significant that the women who are doing either volunteer or paid social work all over this country are almost unanimous in their belief that they could do their work better if they could vote. The women who are doing valiant service on civic committees and playground commis-

sions, those working for a proper milk supervision, the probate officers, those on the housing commission, all the noble women who are giving time and consideration to philanthropic work, these women know actual conditions; they come in contact with realities. Jane Addams feels that she could do her work better with the ballot. So does Florence Kelley, Ella Flagg Young and the others hosts of women who are devoting their lives to the welfare of woman and children and the uplift of the race.

ARGUMENTS ARE ANSWERED. All the arguments against woman suffrage have been answered by the operation of equal suffrage in New Zealand, Australia, Finland, Wyoming, Colorado, Idaho and Utah. Hon. W. P. Reeves, agent general for New Zealand, after commending the good influence of women suffrage in that country, said: "And this witness woman's lives, brighter their intellects, makes their lives fuller and more useful to the country and none the less charming in the domestic circle." Charles Edward Russell said: "I have seen a great many New Zealand households, and I am convinced that they are well ordered, as bright, cheerful and happy as any other households anywhere on this terrestrial globe." J. B. Connally, United States consul at Auckland, New Zealand, wrote: "The late election refuted the charges made by opponents of female suffrage that women are incapable, owing to their inexperience in political affairs, to exercise the privilege intelligently; they have fully demonstrated their unmisgiving capacity in this respect beyond the possibility of a doubt, by their keen appreciation of the issues involved and the sensible discrimination they have displayed in the selection of candidates." The Right Honorable Joseph Ward, premier of New Zealand, said: "In my opinion the results of enfranchising the women of New Zealand have been wholly beneficial. The statement that the power to vote renders a woman less attractive or less companionable is utter nonsense. It enlarges their mental horizon and inculcates tolerance."

BRANDIS FAVORS IT. Mr. Louis Brandeis is an eminent publicist, whose devotion to the common welfare has brought him fame for many years past. He is also a keen lawyer and a practical man of affairs. That is proven by his brilliant handling of the Pinchot-Badger case and by his remarkably successful presentation of the claims of the Eastern shippers in the recent much-discussed investigation of railway rates before the Interstate Commerce Commission. When, therefore, Mr. Brandeis, after frankly admitting that he used to be opposed to equal suffrage, says: "My change of opinion has been the result of my own experience in various movements with which I have been connected in endeavoring to solve the social, economic and political problems which have presented themselves from time to time," his words ought to carry conviction.

In courts of law, expert evidence is regarded as strong proof. Hereafter, when "expediency" of woman suffrage is in question, the experience of these men and women whose public services have made them known all over the country cannot be overlooked.

WOMEN WANT BALLOT. That many thousands of women in this state do want the ballot, and want it very much, is shown by the activity of the suffrage organizations, there are fifty of them, all of them working hard for this reform. Many other clubs and organizations of women in California have endorsed the suffrage movement, among them: the State Federation of Women's Clubs, representing 30,000 women; the Women's Parliament, representing nearly 6,000 members; the Mothers' Congress, representing 7,500 women; the State Federation of Nurses and the Federa-

tion of College Women's Clubs. These are only a few of the organizations which have formally signed their desire for the ballot. There are many others, so that the statement that only a minority of women want to vote is shown to be unsubstantiated. In fact, more women are asking for the ballot than have any disfranchised class of men in the history of the world. I have heard it contended that woman suffrage would bring to the polls a mass of unreasoning voters who would become the prey of unscrupulous politicians. But unscrupulous politicians, however bad, are not fools. They have given a higher estimate of the ability and virtue of women voters than many good men and women. Almost to a man, they do not want women to vote.

A MORAL FORCE. And who ever heard unscrupulous politicians complaining that ignorant or vicious people are allowed to vote? Unscrupulous politicians are more concerned lest women will vote for morality and decency than that they will vote at the bidding of bribes, tricksters and grafters. Conceding as we must do, that the ballot is a moral force—that morality has entered our politics—the moral force of woman is crippled by the denial of the ballot, and hence that denial retards the advancement of truth and justice.

It is only after strenuous efforts that California bids fair to restore the government of this state to the people. But in these conditions I find a reply to many opponents of woman suffrage who affect to distrust the ability and integrity of women in the exercise of the franchise and assert that women are sufficiently represented by men and that women can rely upon men to right their wrongs. I think it is notorious that the most persistent objections to woman suffrage have come from that element which has given public utility corporations power over the people.

NO QUESTION OF RIGHT. Summing up the matter, if there were no question of manhood suffrage or womanhood suffrage, if all citizens of this republic were confronted with the task of government and the suffrage had not as yet been conferred on any of them, would there be any hesitancy in awarding the privilege to men and women upon some basis of equal qualification?

THE WORLD NEEDS WOMEN'S INFLUENCE IN PUBLIC AFFAIRS, AND WOMEN NEED THE INFLUENCE OF A LARGER WORLD. A LARGER RESPONSIBILITY, THAN THEY HAVE BEEN ALLOWED TO FEEL. Only with men and women, developing and progressing side by side can we expect an approximation of that splendid destiny which awaits the arousing of all citizens to exercise the privilege and responsibility of co-operation in a government for all the people by all the people—Official argument of Senator C. W. Bell, reprinted in Sacramento Bee.

10-YEAR-OLD WROTE BOOK. The 10-year-old son of Isaac Untermyer of New York, who, with his family is staying at the Burgentock, above Lucerne, has fallen ill. His father telegraphed for Dr. Warner of New York, who is sojourning at St. Moritz. The doctor engaged a special train and a special boat across Lake Lucerne.

Warner found the boy, who recently wrote a book, suffering from brain trouble, the result of overwork. He improved greatly under treatment and will be able to return to America with his parents next week. The special cost the equivalent of \$500, and the Swiss are astounded at the expense. Geneva cable to Philadelphia Ledger.

Holland House
NEW YORK CITY

THE FINEST AND MOST PERFECTLY EQUIPPED HOTEL IN THE GREAT METROPOLIS

FAMED for the exceptionally artistic character of its decorations and arrangement.

THE HOLLAND HOUSE not only originated many of the features characteristic of modern hotel-life, but has carried them to the highest point of perfection, making

COMFORT AND LUXURY its most salient features. It has retained, through its many years of establishment, a clientele indicative of its popularity with the exclusive and democratic visitor.

CENTRALLY LOCATED near all railway terminals, underground and elevated railroad stations, steamship piers, theatres, shopping centres and commercial districts.

Rooms single or double, with or without bath.

Royal Suite

Public Dining Room, New Grill

Dining Saloon Exclusively for Ladies

BOOKLET

HOLLAND HOUSE, 5th Ave. and 34th St.

San Joaquin Planing Mill

Mr. Home Builder, call and let us figure on your mill work.

It will be satisfactory to both of us, for we will get your business and you will get the best of workmanship and material combined with a very reasonable price.

PHONE 3153. 321 I ST.

Mr. George H. Taylor, previously with Hollenbeck-Bush, is now with us, and will be glad to meet his friends.

SASH, DOORS, BLINDS, MILLWORK.

The Time To Buy Is When Things Are Cheap

Now is the time to get traveling conveniences. We are selling them now at lower rates than ever. Although the summer is nearly over, there are many persons who have not yet taken their vacations. If you have not, this will interest you. You can get the most durable and handsome traveling bags, suit cases, etc., and have the largest stock to choose from. You can get what will always look well and will last for many years.

Everything For Traveling

We have everything that is useful in traveling. You will find exactly what you are looking for and you will find many things that will be new to you. Traveling goods are our specialty. That's why we have such a complete assortment.

WOODEN LEATHER GOODS CO.

NOTICE

To Hunters & Sportsmen

Hunting season opens September 1st. Bring your guns to us. We will clean them and keep them in good condition for you at all times at a very nominal figure for the season. Come in and we will tell you all about it.

New stock of guns and ammunition. Gun and locksmithing and all kinds of repairing done.

Schwabs Sporting Goods House

HEALD'S

FALL TERM OPENS SEP. 4th

Illustration of a boy holding a book.

Illustration of a man in a suit holding a large bottle of **BUCK'S STOVES & RANGES**.

When You Settle the Fall Stove Question—Settle It Right

Settling the stove and range question is settling a most important question—so much so that it must, if you would derive perfect satisfaction from that which you propose to have heat your home, or do your cooking and baking, receive your careful consideration.

If you purchase a new stove or range to satisfy just one desire that you would have it possess, you are making a most grievous mistake. Money invested in a stove or range, just beautiful, and possessing no features that speak of economical operation, would be money poorly invested, wouldn't it? And for every dollar that you invest in a stove or range, you want one hundred cents' worth of service, don't you?

So when choosing your new stove or range choose with all requirements in mind—durability, convenience, beauty and economy and choose the one that embodies them to the greatest degree of efficiency.

Investigation, comparison will prove it to be "Buck's."

So to settle the fall stove question, and settle it right "Bucks" must be your choice.

We have one for you, for every fuel and for your every purpose and, lasting satisfaction considered, the most reasonable in price.

We cordially invite you to investigate.

(By W. G. HUMMEL)

THE AGRICULTURAL FAIR

(By W. G. HUMMEL)

As autumn approaches the thoughts of the agriculturist naturally turn to the agricultural fair. All over the country preparations are being made for them and exhibits planned. Valuable work for the promotion of agriculture may be and has been done through this agency for many years, though unfortunately mistakes in fair management in certain regions have led some people to deny them much of their real usefulness.

The history of agricultural fairs in America is a long one, beginning as early as 1786 when Washington urged their inauguration in various parts of the young Republic. In 1801 the Massachusetts society for the promotion of agriculture suggested a fair with premiums twice a year to be held on Cambridge common. The first fair actually held was an exhibition in Washington, lasting three days, beginning October 17, 1804. In April of the next year the fair was repeated at the same place. In 1805 another fair was held after which the plan was discontinued. In 1807, however, Eleanora Watson, of Berkshire county, Massachusetts, is said to have held a "fair" of her own, exhibiting two Merino sheep in the public square in Pittsfield, Mass.

This same Eleanora Watson is sometimes called "the father of the agricultural fair." It was she who secured a petition of twenty-six farmers for a cattle show, which was held in Pittsfield, Mass., in October, 1810. This led to the incorporation of the same section of the Berkshire agricultural society, the first permanent fair association in the United States. Watson seemed to make a sort of propaganda out of this idea, and helped to organize similar societies, not only in New England, but in some nine or ten other states. In 1819 there was organized a national society for the promotion of rural and domestic economy, called the Columbian, which in 1820, and for five succeeding years, held a "national" fair with quite liberal prizes.

Probably the first state aid for agricultural fairs, and doubtless the first substantial state aid for agricultural education, came through appropriation in 1819, by the legislature of the State of New York, of \$20,000 for two years, to be divided among county agricultural societies. Other states soon followed the plan, modified to suit local conditions. In 1822, for instance, the Pennsylvania Agricultural Society was organized and an appropriation made for it. This

held quarterly meetings and an annual exhibition and cattle show which traveled from one place to another. But the golden age of the agricultural fair was the period of the form of associated effort among farmers and was very popular throughout the North, East, and West. In the decade 1850-60 almost all of the agricultural societies were state or county organizations, of which the holding of fairs was the chief object. In the next decade the list included also many township organizations, some of which held fairs and some of which were farmers' clubs.

The agricultural fair performed a great service to agriculture during these years in diffusing new ideas, in creating an atmosphere of social unity, and in introducing better methods of farming, new types of stock, grain, and fruit and in furthering the use of farm machinery. The educational feature was everywhere made prominent. In Massachusetts, for instance, men like Webster, Everett, Emerson, and Thoreau delivered addresses. The affair often included horse-racing and a gun day, but it had a serious purpose and did a great work. During all this period it was the chief institution for the formation and expression of rural opinion and for the conservation of rural interests. To the agricultural fairs, without doubt, was due largely the rapid multiplication of farmers' clubs at this time, the function of which was the discussion of topics of farm and general interest. Unfortunately along in the eighties the agricultural fair began to decline. During the past fifteen or twenty years many counties and townships which formerly held fairs regularly have discontinued them; and of those that have been held many have been little more than racing meets where betting has played an important part. Even the time of the fair has often been determined by the convenience of the racing fraternity rather than that of the farmer and his ability to exhibit his farm products.

At present, however, it is a satisfaction to note that there are indications all over the country of a desire and effort to return to the earlier ideals of fairs. Abandoned race grounds are being reclaimed and the racing feature is being neglected to a more secondary position. In the Middle West and West the endeavor to have the agricultural fair a truly educational event has gained ground even more rapidly than in the East. In fact, the West may be said to lead in this respect. Already the state fairs of the Middle West especially, have attained a splendid development and have become powerful agencies for disseminating intelligence.

Yet in many sections of the country the agricultural fair still consists largely of side-shows and horse races, with a few mediocre exhibits of agricultural products, poorly arranged and cared for. In such districts the stock exhibits are sometimes brought almost exclusively from other counties and other states by men who, having developed a few technically superior prize winners, have a regular route during the fair season from one county town to another. Fair managers have been known to arrange their data so that their perpetual premium hunters might have time to get from one to another and thus secure additional prize money. The value of such exhibitions is problematic, to say the least. Yet it is not meant to imply that outside exhibits should be at all discouraged. Very frequently these form a most valuable stimulus to the farmers of the home county or state and are educative in many ways. But it should not be forgotten that the county agricultural fair is primarily for the farmers of the particular county and for the promotion of agricultural interests there.

It is sometimes said by the fair managers of the less progressive districts that it is impossible to reform the criticized features of the agricultural fair. Exacts cost money, and managers say that they are forced to adopt all sorts of devices to make

them "pay." So-called "attractions" of wholly inappropriate character are admitted in order to raise funds for carrying on the fair. The fair managers of the opinion that such fair managers are working along mistaken lines, they believe that, given a group of public spirited men in a county having real love for country life and trained and successful business habits, the agricultural fair can be restored to all its one-time popularity and usefulness and objectionable features eliminated. In fact, experience in recent years has proved this, at both county and state fairs. The hundred thousand and more people who go each year to such exhibits as the great corn exhibit at Omaha go to see the corn and other cereals. There are no side shows or midway. The attendance at the great apple shows of the Northwest also demonstrates the fact that really worthy displays of agricultural products do draw. An Oregon man tells us that good work is being done there in the elimination of the side show. He says, "The best shows have the fewest side shows and the poorest have the most." And in all the Western states people are having the same experience.

In agricultural fairs it might be to our advantage to study the British shows. The British probably appreciate an agricultural exhibit as do no other people in the world and there is one thing they do know how to do better than another it is to arrange and conduct such an exhibit in a high class manner. No horse races, side attractions or catchpenny schemes of any kind are allowed on the grounds; the people attend to learn and to be merely entertained by some (like show, as is too frequently the case in this country). Another most commendable feature is that everything is in readiness the morning of the first day. All exhibits must be up and completed the night before the show opens and leave the grounds at once. Coupled with this fact the judging begins early the first morning and is vigorously pushed, thus making the first day much the best of all, which is a great advantage, as it makes every day interesting and people are not obliged to wait until the last day to see how the ribbons are to be tied.

Although there are many smaller agricultural shows held in the different states, they are quite similar, excepting in size, to the Royal Agricultural Society show of England. The Royal agricultural show is typical of all. It is given by the Royal Agricultural Society each year, and the general scope of the work is well summed up in the Society's motto: "Progressive Agriculture." Everyone is interested in agriculture, from the King down to the lowliest laborer, and no man is considered well educated unless he possesses a reasonable knowledge of the subject. The entire royal family hold memberships in the Royal Agricultural Society.

The most prominent farmers and breeders in the country are invited to study the best specimens of livestock the country can produce and to exchange ideas as to the best methods of breeding, feeding and handling livestock. They also see the latest in agricultural machinery and equipment and sometimes doing all kinds of agricultural work. Some idea of the extent of this exhibition may be gained from the fact that the grounds cover 100 acres and the exhibits are placed close together. The show has not been permanently located, but has moved each year, thus necessitating temporary buildings, which, however, are very comfortable. Owing to the vast amount of work to be done to get everything in readiness on grounds of this size, the work begins about six months prior to the show, and by the time the opening day arrives everything is completed.

At the 1909 show there were about 700,000 visitors, the number of horses, and nearly as many of sheep and hogs, yet the judging was practically completed by noon the first day. The dairy breeds were represented by Ayrshires, Jerseys, Guernseys, and Kereys, the Shorthorns being exhibited as a strictly beef breed, the same as in this country. There was, however, an exhibit of unregistered dairy Shorthorns. The cattle were paraded each morning in an immense ring, which was surrounded by a crowd of admiring spectators. At all times there were over 100,000 people on the show grounds, and many people came from all parts of the British Isles to attend the show, which lasted six days, of which one day alone brought over fifty-two thousand people to the grounds.

Besides the livestock exhibit there are annually extensive exhibits of other sorts. In 1909 over four hundred stands were occupied by the exhibits of agricultural and dairy implements and machinery, from small hand tools to harvesting and threshing outfits.

An attractive part of the dairy exhibit of this year was a working dairy, located in a large building erected for the purpose and accommodating forty hand churns and butter workers. This building could be seen some kind of dairy work in progress at all times during the show. Separating, pasteurizing, and cooling milk occupied the morning hours and later each day two butter-making competitions for prizes by dairymaids took place. These tests were very popular and revealed many excellent butter-makers. A milk-making contest also created a great deal of interest. Each contestant was required to milk three cows. Dealers in dairy apparatus and machinery had many fine stands, with interesting exhibits of every variety of dairy utensils and separators quite different from ours.

The smaller agricultural shows of England are quite as interesting in their way, though not so extensive. They are educative, entertaining and very popular. And they pay. It is gratifying to feel that here in America the trend is at last turning toward that kind of an agricultural fair, and away from the uneducative, demoralizing fairs so frequently held a decade ago.

AN INTERESTING NEW BULLETIN

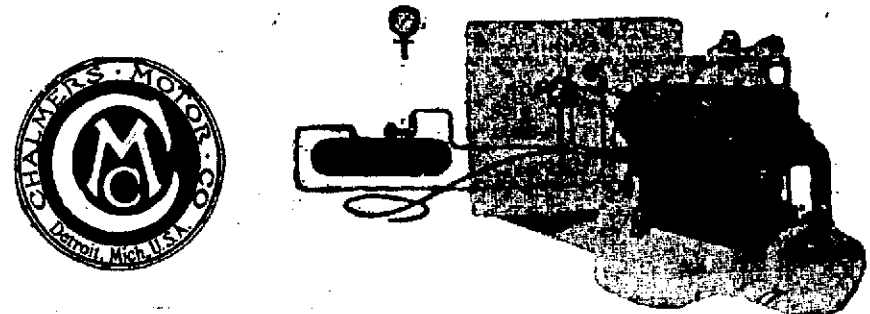

University of California Agricultural Experiment Station bulletin number 213 on "The Principles of Wine-making" is very interesting reading. The bulletin was issued by the Station recently and may be secured by writing to the Director of the Agricultural Experiment Station, at Berkeley. Professor Bisset first discusses the nature of wine, giving definitions, standards, and classifications. He next takes up the biological theory of wine-making, including the causes of variation in character and quality, an outline of operations in wine-making, the relation of micro-organisms to wine-making, and the causes of fermentation. But the largest part of the bulletin is given to the discussion of the micro-organisms found in grapes and in wineries and to the subject of control of the micro-organisms.

The bulletin was prepared as a result of the act of the California state legislature of 1909 providing for experiments and research work in viticulture to be prosecuted by the University of California, and for the purpose of securing money therefor. A number of lines of work to be undertaken were specified by the act, including all the more important branches of grape-growing and wine-making. As the product of the vineyard is the successful marketing of the finest product, it is essential that the product be handled properly and in accordance with modern and

Chalmers Self-Starter and Tire Inflator a Great Boon to Users of Automobiles

A Lady or Even a Child Can Now Handle a Chalmers As Easily As An Electric Runabout

The Chalmers Self-starter, which can as well be used to inflate tires, is only one of the many distinctively up-to-date, high-priced-car features of the new "36" model Chalmers. We would call your attention to the originality, simplicity, completeness and compactness of this device as it is applied to the engine of the Chalmers "36." Note below diagram and full description of this new Chalmers creation, which absolutely obviates the necessity of cranking the motor and pumping up tires by hand.

The Chalmers Self-starter is built on the compressed-air principle. Air is stored under pressure in a tank and is distributed into the cylinders for the purpose of turning over the motor. In other words, with the Chalmers Self-starter the motor is operated by compressed air, in place of cranking by hand, until the regular ignition system for exploding gas in the cylinders begins to operate.

The tank which contains the compressed air for the Self-starter is carried beneath the body of the car. Air is compressed in this tank by a small, water-jacketed check valve at the top of cylinder No. 1. This valve is operated by a spring, which allows the cylinder explosion to force air into the storage tank only when the reserve pressure is low. When the pressure in the tank reaches 150 pounds, the check valve in the pump is automatically held down, stopping further compression.

On the dash is a push valve for releasing air from the storage tank. This valve is also connected with a series of valves in the cylinders. Pressure upon the dash valve first allows the escape of compressed air from the storage tank. This is carried to a distributor, which is geared to the magneto shaft.

AIR CHARGES TIMED

The distributor operates upon the same principle as a commutator. Within the distributor is a metal disc traveling with a centrifugal motion in a horizontal plane. In this disc is a slot which passes over four small holes, through each of which is admitted air to a pipe connected with a cylinder. The distributor is so timed that the slot in the disc passes over the holes in the order in which the cylinders should fire. Thus the full charge of compressed air released from the storage tank is distributed to the cylinders in their turn that are ready for the working stroke. Thus the starter never works against compression. Continued pressure upon the dash valve keeps up this action until the dash valve is closed in the motor, after which the motor runs on its own power. The dash valve then closes, shutting off the air from the pressure tank.

STARTING PERFECTLY SIMPLE

The operation of starting the motor is simplicity itself. In the first place, the ignition switch is set on the battery, and the spark and throttle levers are then adjusted on the quadrant in exactly the same position as for cranking. When this is done, the driver has merely to press the starting valve in the dash. Within one to three seconds the motor begins running on its own power.

Not a feature which makes for the greater efficiency and the greater reliability of the Chalmers Self-starter has been neglected. The storage tank is tested for 500 pounds pressure to the square inch, while the compression automatically stops when pressure in the tank reaches 175 pounds. All valves

in connection with the self-starting equipment are simply constructed of solid brass, with the highest grade steel springs. All tubing running from the tank to the dash valve and to the distributor and from the distributor to the individual cylinder valves is of copper. A special valve on the storage tank permits of closing the tank when the car is left standing for long periods. This is an insurance against the escape of air and the consequent reduction of pressure in the tank.

SLIGHT WEAR AND TEAR

There is only one continuously moving part in connection with the Chalmers Self-starter. This is the distributor. Being geared to the magneto shaft, this is always in motion, but running under load only when the motor is being started. The distributor consists of few parts and is provided with large bearings. As soon as the pressure is released after starting the motor, the distributor disc merely turns around, but does no work whatever. All other parts of the Self-starter are inactive except when the motor is being started.

PRESSURE IS REGISTERED

While it is always advisable to have at least 60 pounds' pressure of air in the storage tank, the motor will usually start when the pressure is as low as 20 pounds. A special pressure gauge on the dash keeps the driver informed of the pressure of air in the storage tank.

With proper pressure there is only one condition under which the starter will fail to work; that is when the motor stops on dead center, which, of course, is very infrequent. Then it is only necessary to use the crank to push the motor over two inches from "center" and away it goes.

In connection with the Self-starter a tire-inflator tube, long enough to carry air to each of the four wheels of the car, is provided. The tire inflator operates through a screw-cap valve and is entirely separate from the mechanism of the Self-starter.

The Chalmers Self-starter, combined with the Continental Demountable Rims and the tire inflator, which are provided with all types of the "Thirty-six" makes this car quite as easy to handle as an electric. These devices remove the last of the original inconveniences of motoring.

Chalmers Models "36" and "38" now on exhibition at our San Francisco salesrooms.

Ninety-eight 1912 "30's" already in the hands of private owners in this territory.

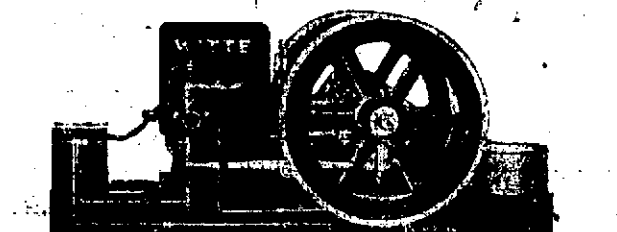

One hundred and thirty orders booked in advance for Model "38" from the photograph and description of same.

Get your order in immediately. If you would use a 1912 Chalmers during the remaining months of 1911.

Witte Distillate Engines

SIZES 2 TO 40 H. P.

Material, workmanship, horse-power and fuel consumption guaranteed for five years. Any engine can run for thirty days. The real test is ten or fifteen years.

The guarantee is not made by us, or the Coast representative, but by the manufacturers themselves. The manufacturer of a good article is never afraid to stand back of it.

All made in horizontal type, engine base full length, strong and lasting. Cylinder entirely surrounded by water. Power in line with base.

No overhanging cylinder, full base rest. No valves in cylinder. Can't drop in and cause trouble.

Latest advance spark, no back kick. "Suction" feed. Template system. Interchangeable parts.

Now, Mr. Farmer, a word with you. I am one of those fellows myself, so you can see I know your requirements perfectly.

The water will soon be turned out of the ditches and you will need water. Let your memory drift back to last September and October, when you were very busy and you had to stop and pump water up into your tank by hand.

Get a Witte and save the hands. We carry a full line of Pumps, Belting, Jacks and Force Pumps.

Our goods are of the quality which give you satisfaction long after the price has been forgotten.

I. E. Wilson

1143 "Eye" Street

Phone Main 2490

Gas, Distillate and Gasoline Engines, Hoists, Sprayers, Saw Rigs and Pumping Equipment.

Just One Week Heald's Opens Sept. 4th

It will soon be time, just one week more and the fall term will commence. The largest entering class that has ever attended Heald's opening will begin their business education on that day. Will you be among them?

"Monday, Sept. 4th is the time to start. Join the large class. Enthusiasm is always greatest among those who begin at the first. It is a pleasure to be among the many who are taking up the work together.

Now is a good time to make your arrangements if you have not already done so. You can either call at the college in person or you may make all arrangements by letter.

All you need to do is tell us you are coming. We will secure you a place to board and room. But make an effort to start on Monday, Sept. 4th.

You will be ready to accept a position sooner if you start early. You will be that much ahead. We can always secure you a position, but the sooner you start the sooner you graduate. And the sooner you graduate, the sooner you will get to earning.

scientific methods. As the larger part of the product of our vineyards is used in the manufacture of wine, it is very necessary that this wine should be properly made.

In the general effort of farmers, especially of fruit growers, to standardize and improve the quality of their products, the wine-makers are conspicuous. Some of our wine is good, some of it is very good, but much of it is indifferent, and too large a portion, frankly bad.

There is no reason, except lack of skillful wine-making, why any California wine should be bad. While some improvement might be made in our grapes in many cases, by a better choice of varieties, there is probably no grape-growing country where the grapes as a whole are more generally suitable for making good, sound wine. They are seldom injured by disease or inclement weather and their consequent loss is very small. The most common fault, that of excess of sugar, is most easily avoided and remedied.

The comparative regularity of our crops and the constancy of their quality give us advantages which are counteracted to a great extent by the backward methods of many of our wine-makers. Whatever other reasons there may be for the present prevalence of inferior wine is quite sufficient, to account for it. Though equally inferior wine is produced in all other fertile wine-making countries, most of it is consumed in the country itself. Much of our poorest wine is sent out of the State and does serious injustice to our good wines. All our wine ought to be good, and it depends principally on the wine-makers to make it so.

RAILROAD MEN LAID OFF IN KERN CITY

28 Employees Are Discharged
and More Are Expected
to Follow Them.

KERN CITY, Aug. 26.—Bakersfield's Southern Pacific shops have had their first touch of the reduction policy which has been decided upon by the railroad and yesterday evening twenty-two mechanics, three blacksmiths and three helpers were let out. The men say that the orders came early this week. It is expected that more men will be laid off within the coming few weeks.

The men are not working at the shops today because of the five day week which prevails during part of the summer months, but many of them were about the shops, talking over the situation and wondering where the axe will fall next.

The cutting down of the working force has struck particularly hard on some of the men because they had sent their families away on vacations and were not anticipating the threatened reduction in the forces employed here going into effect so soon.

How far Bakersfield is going to be affected in the general reduction of the working forces of the railroad is problematical, but it is the fact that the heaviest cut has been made in Bakersfield in proportion to the size of the shops. It is anticipated that the shops here will have no better luck than those on any other part of the system.

Just at this time the men are absolutely "up in the air" as to the next move of the railroad and are awaiting next Friday night to see what further action, if any, is to be taken by the railroad people at that time. Some of the men who were laid off last night were among the oldest employees of the road here.

I'm Going to That Store Up Stairs

The place where you can get clothes at the lowest prices is the store that has the least expense. Brown's is up stairs. The rent is low. Therefore the prices are less.

You can get a tailor made suit at lower prices than you can get it elsewhere. You can get it on easy payments.

Have you seen Brown's store? Go up stairs at 1149 J street and look at the suits. Find out what you can save. Make arrangements to get one of these suits on installments.

Tailor-Made and Ready-Made Suits on Easy Payments

KEEP THE SKIN CLEAR

CUTICURA Soap and Ointment

No other emollients do so much for pimples, blackheads, red, rough and oily skin, itching, scaly scalps, dry, thin and falling hair, chapped hands and shapeless nails. They do even more for skin-tortured and disfigured infants.

Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a liberal sample of each, with 25-page booklet on the care and treatment of skin and hair, will be sent on application to "Cuticura," Dept. L, Boston.

LET BIG CONTRACT TO KILL OFF SQUIRRELS

Agreement Made to Rid
13,000 Acres in Kern of
the Little Rodents.

BAKERSFIELD, Aug. 26.—What is considered one of the biggest strokes in the Kern county campaign for the extermination of ground squirrels was made today when the Kern County Land Company and County Superintendent of Schools Blackton contracted with William Austin to rid of the pests their 13,000 acres of land on the Willow Springs ranch and the Stockton ranch.

Both ranches are in the Woody district adjoining the forest reserve, the Willow Springs area being between Woody and Granite and the Stockton ranch west of Granite.

Mr. Austin in fulfilling his agreement is to go over the property with poisoned grain at least three times, the procedure to be approved by the government land inspectors, in charge of the campaign.

Various estimates have been made as to the probable cost of poisoning squirrels per acre, some believing the labor would be worth about 5 cents per acre, with the poison about as much more. Austin, who has secured the matter closely, has taken the 13,000 acre contract at \$120 which is about 3 1/2 cents per acre, it being agreed that the ranch owners furnish the grain and poison.

The work is to start next Monday and it is believed that at least three months will be needed to cover the vast holdings the necessary number of times to have the animals exterminated.

Among the ranchers residing on the edge of the forest reserve there is no little feeling because the government land gives them no attention and aims to eradicate the disease breeders. Some feel that it will be but another month until the cooler weather will drive the little animals down from the hills which will cause their present work of extermination to amount to practically nothing unless the government gives them attention and aims to eradicate the disease breeders.

FOUR NEW CLASSES FOR SELMA UNION HI

Faculty Enlarged Also By
Three Experienced
Graduate Teachers.

SELMA, Aug. 26.—Four new classes will be formed this year in the Selma union high school, which opens September 11th. The new subjects will be agriculture, wood shop, advanced bookkeeping and mechanical drawing, and these, with the usual high school branches, will give a wide range of subjects to select from. Principal H. Kraemer and the board have labored hard to make the school work thoroughly practical.

The following teachers for the year have been retained:

H. Kraemer, as principal, will have charge of Latin; M. A. Erwin, commercial subjects; D. W. S. Burdick, sciences; Miss Clark, history; Miss Conner, English, composition and debating; Miss Silverter, English and history; J. N. Styer, botany, agriculture and wood shop, also helping the boys with their athletic sports; Miss Specht, mathematics and assisting the girls in their games; Miss Weigle, German, French and mechanical drawing. Of the new teachers it may be said that Mr. Styer is a West Virginia graduate and a man of eight years of grammar and high school teaching experience, and Miss Ida Specht and Miss Beatrice Weigle are experienced high school teachers, the latter a graduate of the Stanford university.

There will be some inconvenience on account of the construction work of the new high school building.

LINDSAY

LINDSAY, Aug. 26.—Attorney Fuller, who has been spending a vacation of two weeks at Oriole Lodge, has now returned.

Miss Ruth Bond, daughter of Dr. Bond-Hughes, has gone to Hanford for a visit with friends.

Mr. and Mrs. Osborne of Los Angeles are in Lindsay for a while looking after their orange grove interests.

Mr. and Mrs. W. E. Hanson returned a day or two ago from a two-weeks' vacation at the southern beach resorts.

Mr. and Mrs. W. E. Porter will leave Sunday or Monday for Visalia to reside during the winter, but Mr. Porter will be in Lindsay almost daily to attend to Horton, the government entomologist, located here, has recently been spending a couple of weeks in the Phoenix, Ariz., district, on special investigation work.

Mr. and Mrs. Jacob Isley have left for a visit to the old home in Iowa and will spend a short time in Chicago before returning to Lindsay in October.

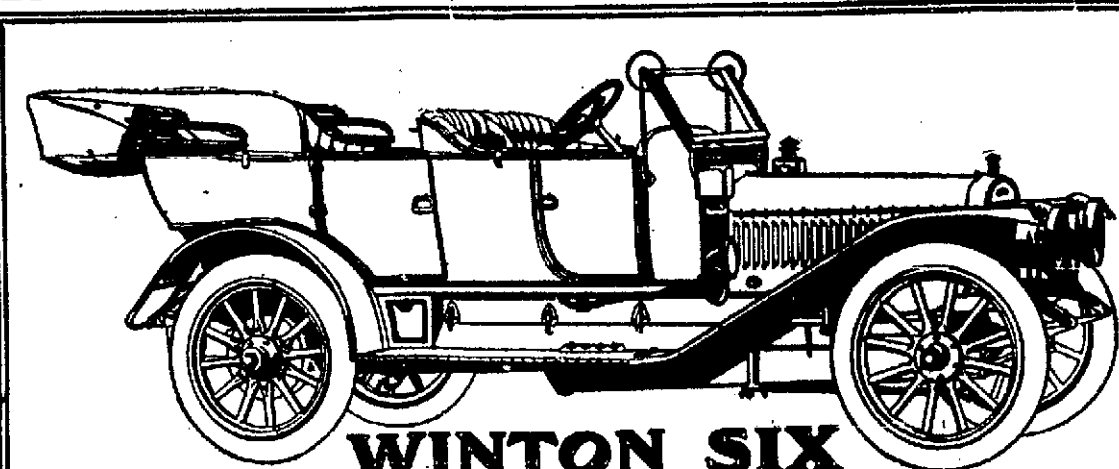

NEXT DRINK SENDS HIM TO STOCKTON

Paddler Foster Examined for Insanity
Is Conditionally Set Free By
Judge Austin.

"The first drink you take, off you go to Stockton," was Judge Austin's parting caution to W. H. Foster, the apple and fruit peddler, examined yesterday by Drs. Blinn and Kjaerbye as to his sanity. They declared that he is a sufferer from alcoholic dementia and is probably only temporarily unbalanced.

The evidence was that he has been drinking about four months, labors under a delusion that he is being oppressed and is the owner of an automobile, and last Thursday threatened the life of wife and children and home on Illinois avenue. The wife and daughter-in-law deposed that his condition is noticeable especially after drinking, ever since an accident on the 6th of last July when he was thrown from a wagon, fell against the street curb and received concussion of the brain, continuing in an insensible state for five days.

Foster talked rationally enough yesterday and said that since the accident when in the sunlight his vision is affected and he can see double and triple. The doctors were unwilling to release him unless he is placed under surveillance.

WINTON SIX

These Are the Specifications

Motor—Exactly the same as before. Six cylinders, 4 1/2-2 1/2 inches, 48 horse-power, A. L. A. M. rating. Cylinders cast in pairs, and offset. Cylinders ground. No moving parts exposed, except fly wheel. Inter-changeable, two-piece, mechanically operated valves, all on one side. Quiet spiral gears in front. Four-bearing crank-shaft has tensile strength of 125,000 pounds to the square inch. Crank case has inspection openings. Crank shaft, pistons, etc., removable without removing cylinders.

Self-Cranking System—Motor cranked by air pressure. A simple device with only one moving part. A Winton Six feature exclusively. Fifth year of success. Ignition—Dual system. Bosch or Elcomagneto. Exide storage battery.

Carburetor—Winton-Stromberg type, having two aspiration nozzles and glass float chamber. Primer on dash.

Lubrication—Positive force-feed. Same system as before. Grease cups on springs.

Cooling—Gear-driven centrifugal pump. Winton honeycomb radiator, carried over drop frame. Radiator fan, gear driven.

Clutch—Multiple disc, having 67 friction surfaces, running in oil bath. Takes hold gently, but positively. We have used this clutch five years, and find it faultless.

Gear-Change Mechanism—Selective, sliding gears. Four forward speeds and reverse. Direct drive on third speed. Lockout on fourth speed.

Wheel Base—Lengthened to 130 inches.

Frame—Pressed steel. Narrowed in front to allow short turns. Raised over rear axle to allow low suspension of motor and body. Motor, clutch, and transmission carried on drop frames. No sub-frame.

Steering—Screw and nut design, with ball thrust bearings. Hard rubber steering wheel rim.

Brakes—Four: all on rear wheel hubs. Solid brake cylinders. Drums bolted to hubs and spokes. Increased brake leverage. No transmission brake.

Drive—Shaft, with cross-type front universal joint and yoke-type rear universal coupling. Timken roller bearings on pinion shaft. Driving mechanism entirely housed.

Axles—Front axle is an I-beam-section drop forging. Rear axle, floating type. Carries no load, weight of car being carried on heavy drawn-steel tube that surrounds the axle. Spur differential. Drop-forged nickel steel gears and pinions.

Radius Rods—Have adjustable hardened ball joints at both ends.

Springs—Vanadium. Semi-elliptical, of ample size.

Wheels—Twelve spoke artillery 36-inch wheels. Timken roller bearings throughout.

Tires—4 1/2 inch all around.

Tanks—22 gallon gasoline tank astern. Holds reserve three gallons for emergency use; prevents stranding for lack of fuel. Patented auxiliary gasoline tank on dash. Avoids feeding gasoline to carburetor under pressure.

Body—Four-door, five-passenger, straight-line body, built on beautiful lines. Is low, long, and especially comfortable. Generously wide tonneau doors.

Finish—Without question Winton cars carry the finest finish that skilled coachwork and finest paints and varnishes can produce. Color options—Brown, blue, green, gray, red, maroon.

Dash—Wood with steel bond. Carries electric lights, ventilator, spark coil, auxiliary gasoline tank, carburetor primer, and self-starter, range, push-button and shut-off.

Bonnet—Aluminum. Quadruple hinged.

Guards—Extra wide guards of beautiful design, with vicer at front end. Guards and shields fully protect body from road wheel splash.

Flooring—Running boards and front floor are covered with aluminum.

Lever and Pedals—Long, stark and throttle levers on steering column. Pedals adjustable as to length.

Dust Pan—Quick detachable. The under side of the car is completely houseclean.

Lockers—Storage space under both seats.

Gear Ratios—3.69 to 1, 3.45 to 1, 2.94 to 1, 2.67 to 1.

Equipment—Electric dash and tail lights, gas headlamps, electric battery for lighting, gas tank, horn, full set of tools, and both demountable rims.

1912 Winton Six

Fifth consecutive
year without a single
radical change.
Motor cranks itself.
Electric light equip-
ment.
Four-door body.
Four forward speeds.
Demountable rims.

An Electric Lighted Car

Electric side and tail lights, the former imbedded in the dash, together with ventilators, are a new feature of regular equipment. Lighting current is supplied by a six-volt 60 ampere hour storage battery.

Gas headlights are continued, the gas tank being boxed on the left-running board.

Practically the only other changes affecting the chassis are the adoption of adjustable pedals, vanadium springs, and cross-type front universal joint, and the lengthening of the flexible coupling between the motor and the clutch.

The motor, ignition, carburetor, cooling, lubrication, clutch, transmission and other elements are the same as previously.

Both demountable rims and 36 by 4 1/2 inch tires all around are regular equipment.

Notwithstanding the increased value represented in the 1912 Winton Six, the price remains unchanged.

An Electric Motor Will Do the Fatiguing Work

SEWING is pleasant work, but operating a sewing machine by foot power is not. It is fatiguing and is the reason why many women have this work done outside. They are unable to operate the treadle all day without becoming tired and worn out.

This work is unnecessary. Let the electric motor do the work. It will operate the machine all day. It will maintain a steady motion. It is at all times under perfect and instant control.

Electric motors are sold on easy terms.

Power Company**

"BABY MINE" AT THE BARTON TUESDAY NIGHT IS THE PLAY OF A THOUSAND LAUGHS BY ACTUAL COUNT

"Zoe" writing to Hubby," in a scene from "Baby Mine," which comes to the Barton Tuesday evening.

In presenting the Margaret Mayo comedy, "Baby Mine," at the Barton Opera House next Tuesday evening, Manager William A. Brady, under whose direction it is produced, calls attention to the fact that it not only runs for an entire year at Daly's theater, New York, but that it is now nearing its 250th performance at Sir Charles Wyndham's Criterion theater, in London, England, playing to capacity houses nightly, where so much anti-American prejudice exists. Still, they fairly search for adjectives to praise this worthy laugh-provoking American play, "Baby Mine."

The plot of "Baby Mine" was suggested to Miss Mayo through the reading of an article in a Chicago newspaper to the effect that married women of that town frequently deceived their husbands by palming off infants from foundling asylums as their own offspring, and that the husband would go through life proud, innocent of the deception.

Why shouldn't "Baby Mine" be a big success, a pronounced success, with such genuine material as an utter laugh and fun maker? There is everything in the play to warrant the general opinion that it is the greatest ever, and this is "going some" when

we recall "Charley's Aunt" and "Too Much Johnson," and a couple of other comedy plays that earned fame and made records.

But "Baby Mine" is the greatest of them all, and will enjoy a long life, and a world-wide popularity.

Ask the opinion of anyone who has seen this side-splitting comedy, and who will see it again, and then again, if possible. Fun! Mirth! There is no end of it. It is one continuous riot and scream, and even the young and unmarried people quickly recognize the possibilities and realities of every situation. It is really education, and an intuition of what the young wife experiences in married life, before and after joyous motherhood.

Yes, it brings back the limit of happy moments of the married man, when he is informed that he has become a father, and is suddenly awakened to the new responsibilities that are his, and which he cheerfully assumes.

"Baby Mine," it strikes most of us deeply, and the fun, laughter and the intense delight of the audience, as the play goes on, best tells the tale of the immense success that will follow "Baby Mine" the world over.

Walter Jones, Ernest Giendennag, and others who helped to make "Baby Mine" the success it was during its

Newman-Foltz Stock Co. Coming

The popular Newman-Foltz company open their engagement at the Barton Opera House, Sunday, September 3rd, in one of the biggest successes in their extensive repertoire. The success of this popular company has been phenomenal. Ever since these two clever young people organized what is known as the Newman-Foltz company, their popularity has grown from week to week, until now it is one of the best known, and most successful combinations of its kind on the coast. From the beginning Mr. Newman and Miss Foltz have always been associated with a good and evenly balanced company, and by keeping faith with their public in the past, the name, Newman-Foltz is all that is necessary to assure big houses wherever they appear. Theirs was one of the popular priced companies that "made good" here last season, and their many friends and admirers are looking forward to their return visit with a great deal of pleasure. Miss

Foltz is recognized in the profession as one of the cleverest, little emotional actresses of the day, and her charming personality endears her to her many friends in social life as well as on the stage. Mr. Newman is one of the most popular managers in the West and is an actor of much ability. The cast is composed of ladies and gentlemen, many of whom have been identified with some of the big road companies and stock organizations. Gordon Osborn, who is a big favorite in Fresno and one of the most talented youngsters in the business is a recent recruit to Newman-Foltz ranks and will appear in several of the plays in prominent parts as well as between acts in new and up-to-date specialties. The company opens here in the beautiful comedy drama, "Amy," a story of the circus, with abundant comedy scenes and a heart interest that is absorbing. The scenic effects for this bill are specially appropriate, showing as it does the circus tent and the illusion is so perfect, that one fancies himself peering into a real tent instead of witnessing a very clever stage story.

"At Valley Forge," "Theima," "A Soldier of the Empire," "Bonnie" and the big spectacular production of "Evans" are some of the good things in store for lovers of good plays at popular prices.

OSTEOPATHIC TALKS

Auto intoxication, or gas in the stomach and intestines, is easily cured by my methods. Fermentation of undigested food causes poisonous gases to be formed and thrown into the blood; thence through the entire system. This gas produces some of the following symptoms, weak or fainting spells with little or no exerting at such times, palpitation and heart symptoms, headache, nervousness, pain and fullness in the abdomen, supposed hunger with ability to hold but little food at a time, tired, languid feeling in the morning, often rheumatism, gout and fevers—in children convulsions are common. My methods cure if you follow instructions.

Dr. Gordon G. Ives assisted by Mrs. Ives, Kirksville Graduates, 267 Land Co. Bldg.

NEW DINING ROOM TO BE OPENED

Mrs. Fannie Williams has sold her boarding house in Taft to Mr. J. Bagdale and will open a first class dining room in Fresno at 1428 Eye street, Thursday, August 31st. Dinner 6 o'clock. Will serve special Sunday dinner 50 cents.

Manicuring, facial massage, shampooing, scalp treatment, hair-dressing, drying and bleaching, electrolysis. New hair goods just received. The department for body massage for ladies only will be ready by Sept. 1. Gentlemen received in scalp treatment, facial massage, manicuring and chiropody. 1224 Tulare St. Elevator entrance.

Gophers will kill those squirrels and gophers cheaper than any other poison, guaranteed. Patterson Block Pharmacy.

F. O. B. Fresno.

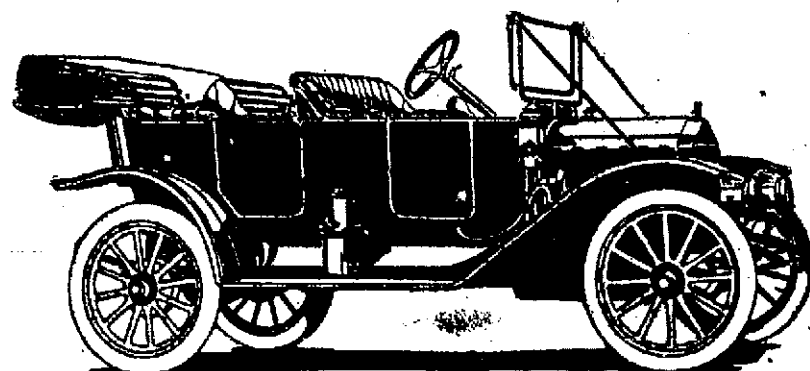

We feel that an explanation is due for the lateness of this announcement. It is four weeks overdue and it is pretty generally known that we have already delivered about 5000 of the 1912 models. Here are the facts: Some weeks ago we advised our dealers that we were going to put out the largest automobile advertisement ever printed—a "double-truck" in 200 newspapers. We naturally expected an enthusiastic response in the next mail. Instead came hundreds of telegrams in this vein: "For Heaven's sake don't you fellows at the factory ever consider the poor dealer and his troubles? You know we can't get enough 20's or 30's to supply our trade; there are three customers waiting for every car that comes from the factory. Why aggravate the present situation by publishing another ad at this time?" So we have violated all rules, and proceeded to deliver the 1912 models without first announcing them. And now we publish only one page instead of two—just enough to advise you of the fact and yet keep our dealers in good humor.

WE WILL BUILD 50,000 CARS IN 1912

20,000 E-M-F "30"s and 30,000 Flanders "20"s

E-M-F- "30" Fore-Door Touring Car, \$1100

Flanders "20" Fore-Door Touring Car, \$800

RECENTLY OUR MR. FLANDERS wrote a personal letter to all Studebaker-E-M-F dealers asking for suggestions as to how Flanders "20" or E-M-F "30" models could be improved. The 2500 replies could be epitomized in the following, which we quote from one letter: "Only defect in either model is lack of cars to supply the demand. There are three customers waiting for each car that comes from the factory. Please don't try to make them any better—just make more!"

NEVERTHELESS, "THE WORLD DO MOVE," said Galileo with his last gasp—and that is our only excuse for announcing any changes. Note we do not say improvements in either of our models for 1912.

JUST AT THIS TIME when other makers are tearing the air with declamations of their new and radically different models—condemning their product of the past by just so much as they proclaim the superiority of their forthcoming effort, we can say, "Our 1912 model is just as good as that we sold in 1911—or 1910, 1909 or 1908."

CAN YOU APPRECIATE with what pride we make that statement—can you enjoy with us the exultation which comes from knowing that if in the future we can only give every buyer as great value for his dollar—as much satisfaction and pleasure in his purchase as in the past—we will have achieved the highest ambition of an honest business house.

TAKE FOR EXAMPLE our E-M-F "30" model. Never was there such a record of service and of satisfaction as the car has given its 30,000 owners. So flawless has been that record, we have today 30,000 salesmen—all working for love.

DO YOU KNOW THAT STUDEBAKER-E-M-F "30" is the oldest car in the world in its present form—this is its fourth year—and the few changes that have been made from time to time were in external appearances only—we have kept up with the styles in body design.

NO OTHER POWER PLANT has ever been able to equal this in performance—"Old Bullet," the ninth car we built, holds several world's records for speed—84 miles an hour on Atlanta Speedway, and she and the others of that first famous litter hold all world's records for endurance. Every one of them are in service today and many of the first five hundred have over 100,000 miles of rough roads toured to their credit.

TAKE CAR No. 2, for example: It is in New Mexico. Owner writes: "Friends who have purchased your later models on my recommendation tell me their cars are great; but after four years of driving over Western trails, I tell you I don't believe you ever built another car quite as good as my No. 2."

ISN'T IT SPLENDID to get letters like that? Car No. 1? Why that car—our first—was used for two years at the factory as a demonstrator and was then put in the hardest kind of service as a "pick-up wagon" at the factory, doing heavy truck work. Can't kill her—looks as if she was good for twenty years or more of the same kind of work.

WHEN OUR DEALERS COME TO THE FACTORY it is a favorite stunt to take a ride in Old No. 1—on top of a load of castings, perhaps. And each time they marvel at the durability of the old car—knowing though they do the quality of all E-M-F "30" cars.

THAT IS WHY WE HESITATE to claim any real improvement in our 1912 model E-M-F "30" over any previous model—persons who know will doubt our ability to improve on perfection—or what they consider the nearest approach to perfection that has ever been attained in a motor car.

BUT WE HAVE MADE A FEW minor changes that may rightfully be called improvements. Here are some you will agree are better: Longer wheel base—now 112 inches, permitting of lengthened body, giving more room in front as well as rear seat. Body is also

several inches wider, making ample room for three 200-pounders in rear seat; drop frame instead of former straight frame, gives lower center of gravity and lower more rakish appearance to car. Springs are longer also—both front and rear—always the easiest riding car. It is still more velvety in motion.

A FEW MECHANICAL CHANGES—not necessarily improvements, though of course our engineers think they are—improved steering gear—better facilities for oiling and adjusting. At the same time we have emulated the \$5000 cars by placing spark and throttle levers on top of steering wheel; large steering wheel of Circassian Walnut, gives classy appearance and makes "thumb and finger control" possible.

NO CHANGE IN MOTOR—you will be pleased to hear that. Fact is we would not dare make the slightest change in that wonderful motor for fear we could never again get quite as powerful a one.

NEITHER HAS THERE BEEN any change in transmission, control, axle or chassis detail, save only those mentioned—the drop frame and longer springs.

E-M-F "30" IS MORE BEAUTIFUL, though, than ever before. Truth to tell, we have always thought there was room for improvement in the outward appearance of this car. But you must remember that in order to give our customers the highest degree of mechanical excellence, in past years we had to design the body severely plain. And we are proud of that policy—other makers adopted the opposite policy, made cars that misled buyers by their looks—and are now either in the junk heap or on the way there—expected soon.

BUT NOW IT IS DIFFERENT—we have our man-moth plants and they are paid for. We have a more perfect organization. Practically unlimited capital enables us to buy better—and prices of all materials are lower.

SO NOW WE CAN ADD appearance to efficiency—luxurious appointments to mechanical perfection—and sell you that much better car in 1912 for the same price you paid in 1911—and for \$150 less than we had to charge in 1908-9 and 10.

WE HAVE PROMISED from the first to improve wherever and whenever possible and to "divide with the buyer the savings we effect by our superior facilities." This 1912 announcement is the fulfillment of that promise.

FOR THE PRICE HAS NOT BEEN INCREASED—the big, luxurious, fore-door model will remain at \$1100 F. O. B. factory. Let those try who may, none can equal this value. They never have been able to and it is no part of our plan that they ever shall.

THE BODY IS A BEAUTY—of the most improved "straight line" type—perfectly straight from front to rear. All levers inside; door latches concealed; large ventilators in dash, so it is just as cool in front as in rear. Also we provide so doors can stand ajar, so speed of car sucks out warm air permitting cool air to replace it constantly. Actual thermometer tests show our front compartment to be cooler than rear. Only objection to fore-door design eliminated.

IN A WORD the Studebaker-E-M-F "30" will continue to be in 1912, as it has always been, the best car in the world at less than \$2500—the first choice in its class of all well informed buyers. Others thrive on our leavings—they live because we cannot supply the full demand, even making, as we do, one hundred of these cars every day.

MADE IN FOUR MODELS for 1912: Fore-door Five-Passenger Touring Car, \$1100; Fore-door Detachable Demi-Tonneau, \$1100; Fore-door Roadster, \$1100, and Coupe, \$1475. Full detailed specifications in the catalogue.

THE STORY OF FLANDERS "20" is even more simply told. There is no change in this sterling model

—not the slightest, either in mechanical detail or in appearance. We could see no chance for improvements.

SHE HAS COME INTO HER OWN—never was more signal victory than this car has achieved. Never did any automobile enjoy a greater over-demand than Flanders "20" does now, and with an output of 100 a day at that.

YOU WILL REMEMBER that, like all new models, Flanders "20" did not come up to Designer Heaslet's hopes the first season—1909-10. There were several minor defects.

WE SAID SO FRANKLY in our ad, announcing the improved 1911 three speed model. Competitors criticised us severely—said it was bad business to "tell all we knew to the public." Well, perhaps—only it didn't work out that way—much to their chagrin.

WE USE STRONG STATEMENTS in our ads.—we have the goods and ordinary terms cannot do justice to them. So do others deal in superlatives—when they are proclaiming hoped-for virtues. Past errors they are singularly silent about, however.

WE HAD TO ADMIT that the two-speed idea was wrong for a touring car. Its only advantage was cheapness of manufacture, and, while we had the customer's interest at heart when we designed the two-speed Flanders "20," we found we were mistaken and that the customer—experienced buyers, anyway—would gladly pay a trifle more to have the added efficiency and superior control of a three-speed selective sliding gear transmission.

WHILE WE WERE ABOUT IT we designed the handsomest fore-door touring body that ever was seen on a moderate priced car.

AND WHAT A RECORD she has made—it is simply splendid. Discredited by her past, dealers and individual buyers alike were supercritical. Competitors "knocked" for fair and tried to convince buyers that the three-speed model was really no great improvement over the former two-speed. We sometimes think this very knocking was our greatest advertisement, for of course, the public knew that the man whose name this car bore would stand back of the product—it had been his pride from the first.

SO THEY DETERMINED TO TRY the new car out. And they certainly did figure out some grueling tests—speed, hill climbing, mud plugging, sand fighting—every imaginable stunt that could break down a car or prove her ability. And Flanders "20" always came up smiling. The astonishment of her opponents was something to see. From that time she has forged steadily ahead, sweeping from her path every would-be rival till today, she is acknowledged leader. Dealers tell us there would be no other light touring car sold if they could get enough three-speed Flanders "20"s to fill the demand.

IN LARGE CITIES buyers are so well informed they simply won't accept substitutes—they will order six months ahead and wait for Flanders "20" rather than take an assembled or a "tin car" as a substitute. But in smaller towns, where there are fewer cars and folks don't have as good a chance to compare performance and durability, dealers are still able to persuade buyers the imitations are "just as good." That is where the "tin cars" thrive.

WE HAD IN MIND in designing this car, the great class of well-to-do business men who want a family touring car of high efficiency, seating five and capable of taking them anywhere—people who want a car of sterling quality and yet feel they cannot afford a car as large as E-M-F "30."

NOW WE COULD HAVE DONE as we did with E-M-F "30" five years ago—designed with an eye single to mechanical excellence and without regard to appearance. But that day has passed. The opinions of other makers to the contrary notwithstanding, we

believe the farmer and the man of the village has just as artistic a sense—is just as well informed on up-to-date design as the city man. And we determined to make a handsome car as well as a good one.

NOW THAT COSTS MORE, OF COURSE—there is actually over \$250.00 more factory cost in Flanders "20" than in any of our competitors—yet there is not nearly that difference in the selling price.

NOW COMPARE THEM. Ask your local dealer to drive his Flanders "20" demonstrator up beside one of the several makes of "tin cars" so you can see the wonderful difference.

COMPARE POINT FOR POINT—the French-type bonnet of the Flanders with the simple, cheap-looking—and cheap—motor cover on the front of the other. The full fenders of the Flanders with the scrawny, tinny-looking mud-guards of cars that presume to compete with it. Even the equipment—lamps, top, windshield, are superior in looks and in quality.

APPEARANCE IS IMPORTANT. However matter-of-fact a man may claim to be, his wife and daughters crave the artistic and the beautiful. And Flanders "20" is their choice because there they find it to as great a degree as in the highest priced car on the market.

YOUR MECHANICAL SENSE will also be appeased—we are talking to you, Mr. Practical Man—if you will investigate chassis details and power plant. You will find a four-cylinder motor of most approved French type and a transmission like that in E-M-F "30"—same excellent axle design, too, and you will find, if you know steel, that the materials that go into this car are not surpassed in quality by that used in any automobile at any price—bar none.

FLANDERS "20" HAS NO RIVAL when you consider all points. No other car on the market gives the buyer so much mechanical excellence and so much to be proud of in appearance as the Flanders "20" at \$800.

HERE'S AN EXCERPT from a letter written to one of our dealers by a certain Detroit manufacturer: "Why not take on ten or fifteen of our cars? You know you cannot get Flanders "20"s enough to supply your trade. Your customers get impatient waiting and you may lose some sales. We have cars in stock and can ship at once. Besides our discounts to dealers are larger."

BUT THAT DEALER DIDN'T FALL—you never heard of a dealer giving up the Studebaker-E-M-F line. Never heard of a dealer handling any other if he could get this one. Dealers want cars that sell themselves—that are backed by a guarantee for a full year, and that really says something.

EVERY STUDEBAKER DEALER IS JEALOUS of the proud position he occupies—he is honored and respected above all rivals in his own community because he sells the best cars and keeps his word—the cars make good. And the manufacturer backs him up. He will not sacrifice that proud position for a few chance sales, nor for a bigger take-off will he sell to his townsmen cars that he knows are unsalable elsewhere.

OUR ONLY PROBLEM IS DELIVERY. We are not going to make any rash promises. We cannot promise to deliver every car that is ordered. All we can do is to repeat that we are making one hundred per day now! That we are doubling our factory facilities as fast as bricks can be laid and machinery installed! That we will be making two hundred a day within ninety days and will work full force all winter in hopes of catching up with the demand—but that is the limit of our ability for the present.

OUR MODELS OF THIS CAR ALSO FOR 1912. Fore-door, 5-passenger Touring Car—slightly smaller than E-M-F "30," not quite so speedy—45 miles per hour—but just as efficient; 4-Passenger Suburban—ideal car for rural residents; 2-Passenger Coupe, and 2-Passenger Runabout. Full detailed specifications in catalogue.

FRENCH UNIONISTS DIVIDED INTO TWO CAMPS

Reformists and Revolutionists Contend for Supremacy.

Those Who Object to Disorderly Methods Apparently Have Won.

PARIS, Aug. 26.—The annual congress of the union railway workers of France which does not, by the way, include the engineers and firemen, proved to be a battle between what is called the revolutionary and reformist wings. The reform element contended broadly for the American idea that strikes should be proclaimed only as a means of actually bettering a condition of the workman and not used as a pure revolutionary weapon. Unbiased observers think that the reformists carried the congress and that an attempt will be made to put the railway employees' union upon an absolutely non-revolutionary basis and keep it as far as possible from domination by the revolutionary general labor confederation. On the other hand, the proceedings showed that the union is split in a serious manner, while the vote against wild destruction of public property in the case of strikes indicated that hundreds of delegates failed to register their opinion. TO DISBAND BIG UNION.

An important decision of the congress was to disband as a general union and reorganize into several bodies each one of which will be composed of employees of the different railway companies. Each of the new unions will send delegates to a national federation. One of the chief causes of the strife at the convention was the failure of the great railway strike of last year which was marked by a series of outrages against property and which failed largely through the action of M. Briand, who was the prime minister, in calling out the strikers as military reserves. Briand, who is recognized as one of the leading railway unionists, said: "The French railway workers must realize, as I think many do, that excesses and lawlessness will not aid railway unionists. They must recognize and follow the idea of the American unionist that real progress comes from education and force of numbers."

POINTED PARAGRAPHS.

"Too often the club is in wrong hands. Every theatrical manager thinks he has a show. An ounce of prevention beats a pound of cure. Money-making may be a disease, but newspaper men are seldom afflicted with it." —Chicago News.

Scientists Are to Search Out Hittite Secrets

LONDON, Aug. 26.—Widespread interest will be felt in a new scheme for a study of the ancient civilization of Asia Minor. It has been decided to organize a Hittite Excavations Fund and a strong committee has been formed for the purpose. In a preliminary statement the committee points out that the links connecting the old civilizations of the East with the culture and civilizations of Greece and the Aegean must be sought by scientific research in Asia Minor and the adjoining lands.

Few people today probably have much more knowledge of the Hittites than is contained in Biblical references to them as hovering on the political horizon of the children of Israel. It was not until about thirty years ago that the first light of modern scientific investigation was thrown on the history of this long lost race. Prof. Sayce and Dr. Wright then from the monuments discovered the existence of an old world power that had been lost to historical memory, and recent investigation has shown that these scholars were right.

The Hittites are now recognized as a number of kindred peoples, settled in the habitable valleys of northern Syria and the Taurus and on the plateau of Asia Minor before 2000 B. C. They were already in conflict with Babylon, and offshoots of them were established in southern Syria on the frontier of Egypt. In the fourteenth and thirteenth centuries B. C. the Hittites were masters of Asia Minor, and contested with Egypt, then at the height of her power, the possession of Syria. Their king fought a great battle with Ramses II. on at least equal terms. Numbers of the state archives of the Hittites were discovered in the ruins of their ancient buildings. Unfortunately it has so far been found impossible to decipher the Hittite script, but much may be learned of their foreign affairs, writings that refer to foreign affairs, clear that the Hittite kings treated on terms of practical equality with the courts of Babylon and Egypt, and the princes of northern Syria, while the Hittite chief power in eastern Asia Minor fell well into the first millennium B. C.

ANACONDAS GET FIRST MEAL. Twenty little anacondas had their first meal since they were born, on June 19th. There were twenty-two little brothers and sisters of those fortunate serpents which were not permitted to take in the least, for the forty-two anacondas are children of Big Annie, who came here from Trinidad in the early summer.

"Talk about appetites," said Charles Snyder, keeper of the reptile house, "those anacondas are going to send up small rats and sparrows were the little that made the young anacondas, who average about three feet in length, glad they had come to Bronx park. Eventually they will be put on frog diet when the rats get scarce, but sparrows remain a staple food, for there is an abundance of them, according to the keeper."

BURIAL PLACE FOR SCOTTISH KINGS BOOMING

Dunfermline Grows as Result of Naval Activity.

Elaborate Plans to Increase London's Vanishing Commerce.

LONDON, Aug. 26.—Dunfermline, famed as the burial place of Scottish Kings, is about to inaugurate a town planning scheme to an extent never before attempted. The establishment of a naval base at Rosyth, on the Firth of Forth, is responsible for the enterprise of the older Scottish town. Britain is building at Rosyth, to help her in any possible war with Germany, a naval station which besides being the most modern will be the largest in the United Kingdom. Already thousands of men are at work laying the foundations of the docks and stations, with which splendid progress is being made and in a few years a permanent staff will be employed in the yards and workshops, keeping the ships of the North Sea fleet in shape to meet any foe from across the water.

HOMES FOR WORKMEN

Dunfermline is preparing to take possession of this population and claim it for her own. The Admiralty is naturally encouraging this praiseworthy object. They have no desire to have a city crowded around the gates of what in time will be the chief naval base. From a defensive standpoint, at any rate, and are lending what aid they can to provide homes in the City of Dunfermline for their workmen. Included in the plans is a good street railway system, for Rosyth is five miles distant from the old town, and the men must be taken to and from their work. The street railway, like the other public utilities, will be municipally owned, and cheap rates for workmen will prevail. Dunfermline, therefore, now known chiefly because of its abbey and graves of kings, is about to become a modern city, and if England and Germany continue to look upon each other as possible foes in a great war, become the home of one of the biggest industrial populations in the Kingdom. In the past the town has been benefited much by gifts from Andrew Carnegie who was born there.

SAVING LONDON TRADE

Those who remember the great dock strike of twenty years ago, the year in which John Burns, now a cabinet minister read with grave concern the recent order of the strike committee to the men to quit work. The strike of 1891 completely paralyzed the port of London, and worse still, drove away trade which has never returned. The strike showed that the dockers, teamsters and other workers who handle the goods from the docks were well organized and could bring work in the port to an absolute standstill should they so desire. HEAT BAD ON STREETS.

Londoners, who have been in the habit of putting with pride to the condition of the streets in the metropolis and making a comparison with the streets of other cities, not favorably to the latter, have been made something of this summer of the effect of heat on asphalt pavements. London has this summer had real summer weather, extending for a period which Londoners cannot remember to have been exceeded. The effect on the London streets has been an eye-opening one to the Britisher. The asphalt which usually makes a perfectly smooth surface and which in normal summers can be kept in order at a very slight expense, has taken to curling up and then with the passage of vehicles forming a fine dust and innumerable ruts. Victoria street, one of the best paved in London, has the appearance of a black sea, the asphalt forming rolls and waves, over which the motor cars and motor buses bump unpleasantly. GANGS OF ROWDIES.

Certain districts of London are suffering from the "gang" system. Rowdies armed with sticks have been going about assaulting people, with apparently no other object than to amuse themselves. Shortliff, a working class district, has been the greatest sufferer. The police have thus far been unable to put a stop to the rowdies, although at least one man has been dangerously wounded by the rowdies. Usually the streets of London, even in the worst districts, have been quite safe at any hour of the night. FIRST RADIUM INSTITUTE.

With the opening of the first Radium Institute in the world London may be said to have taken the lead in the research of the curative possibilities of the wonderful metal. The institute, which is the gift of King Edward, ever his being to the municipality of London, and Sir Ernest Cassel, who provided the funds for the erection of the building and supplied the radium, which exists here in greater quantities than in any other building in existence. With its opening comes the hope of curing cancer.

St. Petersburg Convicts Take Vacant Places

LONDON, Aug. 26.—In coping with the strike of the dock workers at St. Petersburg, the authorities have shown that Russia is Russia still. One coal importing firm engaged 100 convicted prisoners from the local Krestinskiy and employed them at unloading ships at the rate of pay at which the strikers had gone out. As the prison wardens had to accompany their charges to see that they did not escape, there was enough protection for them against interference by the strikers.

Other owners called in the help of the chief of the gendarmes, the prefect of the city and the Department of Commerce, and all these authorities sent men to see that the strikers did not terrorize anybody who was willing to work.

In their statement laid before the harbor master the dock laborers ask for \$1.25 a day and from 13 to 15 cents an hour, he paid at 25 cents an hour. Hitherto they say that they have been earning altogether about \$1 a day. They ask that the increasing employment of women at the docks should be stopped, that women should be kept solely at their former work of shoeing grain. Lastly women have been employed at unloading out wood. They ask that the women's pay be increased to 45 cents a day with 15 cents an hour for overtime. At present about 800 women are employed in unloading at the St. Petersburg docks.

CHOLERA IS EASY TO AVOID, SAYS SCIENTIST

Water Should Be Boiled and All Fruit Scalded Before Eating.

PARIS, Aug. 26.—The possibility of an outbreak of cholera in France has led Prof. Metchnikoff of the Pasteur Institute in Paris to express his opinion on the subject. Among other things he says:

"Cholera is not dangerous. It is easy to protect oneself from it. I have lived in contaminated areas and never felt the least fear. The measures taken by the government are excellent, but I must confess I have only a moderate confidence in them. The only measures to be taken are individual measures."

"The strictest hygiene must be observed; one must wash, often, but above all drinking water must be boiled and all fruit scalded. People who say that eating fruit is dangerous make a very great mistake. Let people eat their melons without fear; they run no risk. The only essential precaution is to plunge the melons in boiling water for a minute, for the ring may have fragments of earth on it containing the germs which propagate cholera. These germs will die at once. The same is true of all fruits. Cholera and typhoid fever can only contaminate any one by means of the digestive organs. The hands must therefore be kept perfectly clean and all foods carefully sterilized."

"Another mistaken idea is that boiled water is easily contaminated. That is not so. Boiled water keeps its properties for a very long time. It is quite enough to keep it in a properly covered jar. Personally I prepare my supply of boiled water in sufficient quantity for two days."

WEDDING ACCOUNT SOUNDS TOO TRUE

A Missouri editor, who was brimful of hard cider, got a wedding account and a sale ad mixed, and served to his readers this dope:

William Smith, the only son of Mr. and Mrs. Joseph Smith, was disposed at auction to Lucy Anderson on my farm one mile east of here in the presence of twenty guests including the following: Mrs. T. W. Smith, twelve head of cattle. The Reverend Jackson tied the nuptial knot averaging 1250 pounds on the hoof. The beautiful home of the bride was tastefully decorated with a seaweed cake, a spade, a sully, rake, one feed grinder, one set double harness, almost new and just before the ceremony was pronounced Mendelssohn's wedding march was played by one milch cow five years, one Jersey cow, to be fresh next April, carrying a bunch of blowers in her hand and looking charming in a gown made of light spring wagon, two boxes of apples, two racks of hay, one grindstone, mousetrap, deer trimmed with about 180 bushels of spuds. The groom is small, lithe and popular, good natured and always stout well among society circles of twelve Berkshire hogs, while the bride is an accomplished and talented school teacher of a splendid amuse themselves. Shortliff, a working class district, has been the greatest sufferer. The police have thus far been unable to put a stop to the rowdies, although at least one man has been dangerously wounded by the rowdies. Usually the streets of London, even in the worst districts, have been quite safe at any hour of the night.

With the opening of the first Radium Institute in the world London may be said to have taken the lead in the research of the curative possibilities of the wonderful metal. The institute, which is the gift of King Edward, ever his being to the municipality of London, and Sir Ernest Cassel, who provided the funds for the erection of the building and supplied the radium, which exists here in greater quantities than in any other building in existence. With its opening comes the hope of curing cancer.

Frederick Treves, who is at the head of the medical staff of the institute, asked as to the prospects of curing cancer by radium, replied: "The prospects are good, but we must wait and see." The building contains a dozen cubicles in which patients can be treated. No experiments on living animals will take place in the institute.

AERIAL PICTURES TAKEN FROM AEROPLANES

Curious Photographs of Paris and Other French Cities.

New Sailing Vessel Is to Be the Largest in the World.

PARIS, Aug. 26.—The rooms of the French Aero Club at Paris tell of what has been done in the way of photographing from balloons, a hundred or more curious pictures of Paris taken from great heights adorning the walls. A new room will soon be given over to photographs taken from aeroplanes, for aeroplane photography is as rapidly developing as is the aeroplane itself. The aeroplane photographer must contend with the great speed of the machine upon which he sits and his negatives must necessarily be taken instantaneously. Lieut. Bland of the French army has just performed the most interesting of the aeroplane-art feats by taking views of the city and forts of Rheims while flying at a height of 3,600 feet.

SNAKE BITE SERUM

M. Dastre has reported interesting results of experiments in overcoming the bites of poisonous serpents. In a paper read before the Academy of Sciences he says that the serum prepared by the Pasteur Institute of Lille has been effective in counteracting the poisonous bites of three kinds of deadly serpents, including the cobra. This serum will save human life if injected into the body in a quantity 15 to 20 times as great as the venom which has been received from the cobra.

Former Congressman Joseph A. Conroy of Boston, who holds the position of Russian vice-consul at that city has arrived in Paris after an extensive tour and study of Russia. He is amazed over the possibilities of commercial development in that country, especially in the north-east. "Russia," said Mr. Conroy, "is a splendidly misunderstood in the United States. We should commence a campaign of education there dealing with the real Russia—its wealth, its refinement, the delightful character of its people, and we should tell also the story of its wonderful cities. To me the great city of Warsaw with its culture and riches and prosperity was a wonderful chapter."

TO HAVE GREAT SAILER

France will have the biggest sailing vessel in the world. She is to be launched within a few weeks and will be called "La France," like the new scrapper being completed for the French Line. She will replace as the first sailing ship of the world the huge German sailer Preussen which was lost last year on the English coast. The France will be 293 feet long and her beam will measure 52 feet. Her displacement will be 10,180 tons.

On her five masts will be spread 19,500 square feet of canvas expected to furnish a speed of 17 knots an hour. There will, however, be an auxiliary power of two 1,800-horse-power motors each turning a propeller and designed to give a speed of eleven knots. Besides comfortable accommodations for crew and officers the France will be luxurious in that she will have a fine-appointed salon and fumoir for passengers as well as the officers, while the accommodations for passengers will include seven large cabins "de luxe." The vessel will be lighted with electricity and will have a central steam heating outfit with radiators, the mammoth ship is the product of a grande shipyard. She is built for Rouen shipping masters and will sail between European ports and New Caledonia.

QUEEN GIVES RULES FOR RUNNING HUSBANDS

Carmen Sylva Shows Vein of Cynicism in Her Theories.

LONDON, Aug. 26.—Carmen Sylva, Roumania's queen, has drawn up the following precepts for the guidance of a young wife who wishes to be happy in her home:

1. Never begin a discussion, but if an error is made, do not yield without having proved your point.
2. Never forget that you are the wife of a man and not of a superior being; it will make you understand his weaknesses.
3. Do not ask your husband for money too often. Try to manage with the allowance he gives you every week.
4. If you discover that your husband has rather a big heart, remember also that he has an appetite. If you attend to the latter you will soon win over the former.
5. From time to time, but not over-frequently, allow your husband to have the last word; it will please him and will do you no harm.
6. Read the whole of your newspaper and not only the sensational stuff, which the Chinaman has beaten to a frazzle. Not long ago I visited a friend of mine in California. One day, in stocking up her pantry, my friend bought some very cheap brandy for cooking. It tasted out too bad even for that purpose, so she directed her cook to throw it away.
7. "You do want," said John, "I take," "But you can't drink that stuff," cried my friend, "It's vile."
8. "No, no, no, for drinker," I drank for drinker, "certainly," said John.

Davenport's Who's Who in Public Life

Copyright, D.M., by Homer Davenport Syndicate

SENATOR JOHN SHARP WILLIAMS, OF MISSISSIPPI

The United States Senate has seen in the past many characters, yet likely never one stamped with more originality and brains than Senator "John Sharp." He is truly sharp, and his sharpness even has a wry edge. With a sort of a bath-towel woven summer suit, which he dons in very hot weather, he looks indeed a fit representative of the plain people. Williams is blessed with the calmness exhibited in his tone of voice, manner of speech and stride. He appears the living example of balance and harmony.

Of late years he is turned silvery about the head and his girth has expanded till he seems at all times well-fed. But with his years, John Sharp Williams has grown even sharper, till he should be known now as John Sharper Williams, and the day is not far off when it will be correct to refer to him as John Sharpest Williams. One feels as he hears Williams speaking in his best whining inquiring manner, how pleasant it must be to be so easy in all kinds of weather on the floor of the Senate. His nasal twang, suggests Mark Twain as does his well shaped head and even his sarcasm with its peculiar strength and simple tenderness.

Williams is doomed to be the leader of the Democrats in the Senate, yet such certain doom does not in the least affect him. His method of speech is that used between farmers, exchanged over the line fence. Thus to Senators who purposely affect double chins and a falsetto speaking voice he must be shocking. It does lack that element of oratory that you instinctively feel when you think of Daniel Webster or Colonel Baker. Yet it is modern oratory when he leans over his neighbor's desk, exactly like he would lean over the

pig-pen, and inquires "as to the tariff up," his remarks produce storm, and this has all been done at little cost of strength to Williams.

His arts are hard to trace to any school, but his philosophy is easy to trace to a sound basis. Williams is of medium height and weight with clear eyes that see all things. His mouth looks as if it has been lured away by heavy cuds of tobacco or big cigars. His moustache droops like moss of the trees of the southern swamps and at a distance his hair looks like it had been cuddled into shape by the elder-duck. Possibly the most striking feature, if it is possible to pick striking features from a man so full of features, is the poise of Williams' head and hands when he stands to speak. It is exactly like the old fashioned stump speaker at the minstrel show, who stands alongside of the small table with the big pitcher and the old umbrella resting on the table.

Senator Williams is one of those proud people of whom there are quite a few who claim much from the associations of the late Judge Culberson of Texas. In fact he is one of the finest types of the Culberson school of statesmen, as during their many years together in the lower house of Congress they were pals, the younger ever drawing from the older, and the older taking for his pay the boyish exuberance of the man in question. So now you notice the young man, for Williams could never get old, has some traits like the distinguished statesman from Texas, has the art of deliberate speech, the art of unstudied gentleness, the art of common-sense and good cutting sarcasm.—Homer Davenport.

The Milk Question Is Easily Settled

The Golden State Dairy Solves It

Now that so many families are returning from their vacations and starting housekeeping again, one of the first questions to arise is, "from whom shall we take our milk this season?"

There is only one answer now and it is,

"The Golden State Dairy"

Here you get quality, cleanliness, service and courteous treatment. We spare no efforts in serving our trade with the finest, richest milk and cream in the most sanitary manner.

You'll Like Our Milk

sen. "Only a drop or two yesterday." "Well," said the mayor, "we'll tie your boat up for the night. And I sent you to go below and have a good night's sleep. Only, don't ever do it again. A sailor mustn't drink, you know." "Yes sir, you're dead right," said Olsen as the mayor walked away. "But don't forget that sail to Cape Cod in the morning." As the mayor walked up the gang-plank, Olsen turned to one of the policemen and said: "Say, he's all right. Who is he?" "That's Mayor Gaynor," said Olsen.—From the New York American.

KAFFIR WOMAN WITH JANE ADDAM'S MIND

Painted With Passion and Intensity Condition of Women of Her Race.

"I once had a conversation with a Kaffir woman still in her untouched primitive condition, a conversation which made a more profound impression on my mind than any but one other incident connected with the position of woman has ever done," declares Olive Schreiner, in her new book, "Woman and Labor," which reports many strange observations of women in the wild Africa where she was born, for use in comparison with the state of civilized women. Mrs. Schreiner continues: "She was a woman whom I cannot think of otherwise than as a woman of genius. In language more eloquent and intense than I have ever heard from the lips of any other woman, she painted the condition of the women of her race; the labor of women, the anguish of woman as she grew older and the limitations of her life closed in about her, her sufferings under the conditions of polygamy and subjection. All this she painted with passion and intensity, yet, combined with a deep and almost heroic bitterness against life and the unseen powers which had shaped woman and her conditions as they were, there was not one word of bitterness against the individual men, nor any will or intention to revolt. Rather, there was a stern and almost majestic attitude of acceptance of the inevitable." This "ignorant savage," declares Mrs. Schreiner, first made her understand the position of women—an understanding now so important, in view of the position taken by the Schreiner book, "Woman and Labor." Says she: "It was this conversation which first forced upon me the fact which I have since come to regard as almost axiomatic, that the women of no race will ever rise in revolt, however intense their suffering and however clear their perception of it, while the welfare of their society requires their submission."

Don't

Work like a slave on wash day from early in the morning to late at night. Don't you know it is bad for your clothes if you

Rub

Them on the old washboard or if you use a machine? If you will just use the latest scientific preparation, which is a white wash powder called No-Rubbing Laundry Help

Your

Hard work and troubles will all be over, and wash day will be an easy day for every woman who will only give No-Rubbing Laundry Help a trial. Your

Clothes

Will be white as snow. It contains neither lye, lime nor acids, and is guaranteed to not injure the finest fabrics.

GAYNOR SAVES DRUNK SAILOR IN A SKIFF

On its return from Coney Island the other night the police boat Patrol, with the mayor and Commissioner Waldo on board, picked up a sailboat with a gasoline engine close by the statue of Liberty. The searchlight of the Patrol discovered the boat, with sail and jib set, backing to right and left in an aimless, jerky fashion that indicated there was no one at the helm. The Patrol slowed down, approached the wandering craft, and a policeman jumped aboard.

"Here's a man asleep here," he called out of the darkness, adding, a moment later, "or drunk."

The man was aroused and hauled on the deck of the Patrol, and the boat taken in tow. The rescued navigator seemed bewildered and for some time was unable to get his bearings. He was taken below to rest. After a while the mayor asked Lieutenant Kennell:

known what struck him. What will they do with him?"

"Take him up to Jefferson Market police court in the morning," replied Kennell.

"Who's sitting there now?" asked the mayor.

"Magistrate Barlow, I think," Kennell replied.

"The mayor pondered for a while. 'That's too bad,' said he finally. 'He'll probably send him up for sixty days. Maybe I'd better sit as a magistrate when we reach the dock and decide the case myself.'"

When the Patrol reached her pier the befuddled navigator was brought before the mayor. The mist that enveloped his mind had begun to clear, and he seemed to realize his position.

"What's your name?" asked the mayor.

"Olsen," replied the man.

"Well, Olsen, I'll bet you're a great sailor."

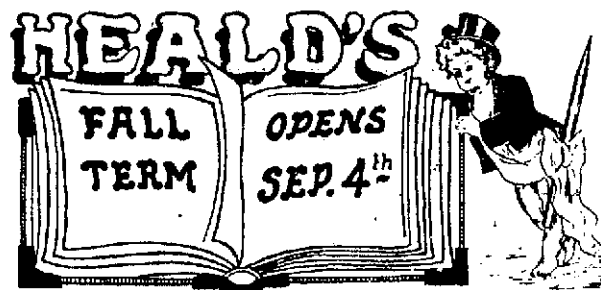

"Sure I am," replied the man, proudly. "I know every dot in this harbor. I could take you to Cape Cod with my eyes shut."

"I've got half a mind to go with you in the morning," said Mr. Gaynor, laughing. "If I'm around here in the morning will you take me to Cape Cod?"

"Sure!" said Olsen, eagerly. "I'll give you the dandiest sail you ever had in your life."

"Were you drinking, Olsen?" asked the mayor, severely.

"Not for a whole year," replied Olsen.

REMINISCENCES OF UNCLE BILLY HUTCHISON

EARLY DAY STORIES AS TOLD BY PIONEER

The original hook and ladder company of Fresno City was organized in February, 1877, with the following members: Louis Gundelfinger, C. L. Basco, Charles Overholser, C. L. Wainwright, W. Rose, W. H. McManis, W. Phillips, G. Winters, Henry Ross, Joe Moody, Charles Brinson, Chas. DeLong, H. Borchers, Dr. N. P. Duncan, A. G. Bell, J. P. Luke, Wm. Silvers and Charles Hahn.

In 1880 a correspondent writing from Fresno says: "Fresno is a great county and is destined to be greater. It will be the abiding place for tens of thousands of industrious people, but no poor men can hope to make the sand give up its treasure. Water and cultivation will cause vegetable farms to grow almost like the faded bean stalk, but without water the earth will not produce enough sage brush to kindle a camp fire."

Wm. Wright, grandfather of W. E. Mitchell of whom I made casual mention last week, came to California in 1855 and located on the south side of Kings River in 1861. In 1862 he commenced to divert water from the river and in 1866, having joined issue with Hiram Dennis, a ditch was completed and it was called the Dennis ditch. The ditch and water right was recorded in Millerton in Book A of Water Rights, five years before, the law required the recording of such rights, and is the oldest on that side of the river. Mr. Wright followed the occupation of farming and stock raising until 1869 when he was accidentally drowned in crossing the river during high water at what was called the lower ford near where the bridge is now located.

Along in the 70s there was one day a horse race about a mile and a half above Centerville at which there were perhaps a hundred people. Several races were to be run and during the day I hitched up to my buggy and

drove up from town. I had a friend with me and just as we drove on to the ground we noticed a commotion of some kind and saw a Mexican leave the crowd and run to a horse, mount and start him on a run towards the river. We stopped where we were and in a few minutes saw the Mexican returning with his horse on a dead run. He came up to within twenty or thirty yards of us, carrying a six-shooter in his hand, threw himself from his horse, said something we did not catch, for just then there was a fusillade of shots. When the shots were fired he turned and ran about 75 yards and fell upon his face a dead Mexican. I immediately turned and drove home and I don't think there were a half dozen people who knew that I was over on the ground, and out of that whole crowd there was not a witness who saw anybody shoot that Mexican. I was never called as a witness—and if I had been I did not see the shooting for I was watching the Mexican. Several arrests were made but nothing done.

In early days according to the records, contractors for county work were not so eager to bid as at present. In 1862 the supervisors wanted to build a court house at Millerton and ordered the clerk to advertise in the Mariposa Free Press for four weeks for sealed bids. "Nary" bid showed up. Then on the 11th day of May, 1863, the clerk was ordered to advertise in the Bulletin of San Francisco and the Sonora Weekly Democrat until the 15th day of June, still no bids. They then tried the California Republican of Sacramento until the 3d day of August, and as there were still no bids forthcoming they gave it up as a bad job. They waited until the 6th of May, 1865, when the contract was let for the house that still stands there, to Charles Converse for \$17,000.25 and before they were through

the building cost several thousand more.

New I am going to "boost" a little on our Court House Park. When you step to think that in the center of a city of 20,000 inhabitants we have a park containing twelve acres entirely covered with fine shade trees, grass, flowers and shrubbery, thoroughly lighted by electricity, a fine band stand at which we have music every Sunday evening, comfortable seats provided for everybody, I will hazard the opinion that its equal can not be found in any city of its size in these United States. In 1873 the contract was let to Gus Withhouse for leveling, planting, etc., for the sum of \$2500 on that part which had not previously been improved. Jerome Stevens had before leveled up around the court house and planted a few trees. At the same time that the contract was let to Withhouse, a contract was let to a Mr. Fowler for \$1475 to put up 1650 feet of Picket fence, the old fence was taken away a few years later. Capt. Mac, who was then representing us in the legislature, procured the passage of law authorizing the county to sell \$10,000 worth of bonds and apply the proceeds to the improvement of the court house and hospital grounds. Most visitors and strangers consider our court house and park the most attractive feature of the town.

Last week I related a story of the old stage times from Hornitos to Visalia. There were many things in those days on that old line. Some queer, some amusing. I will here relate one that struck me as rather funny. One of the drivers at that time had a peculiar habit of riding a horse and had allowed a Chinaman to get into debt to him to the amount of \$80 when the "Chink" skipped out and he saw him no more for several years. One day he was making the trip to Visalia with one passenger, a drummer who was ordered to advertise him, and when near Kings River he saw a bunch of Chinamen ahead on the road, each with a burro load on a bamboo pole piling along towards Visalia and just before the stage caught them, up, one of them left the road and darted into a bunch of weeds. The drummer suspected something was wrong so he handed the lines to the driver and followed and when he caught him it proved to be his man who had skipped. The Chinaman had \$40 and he made him give it up, went back, took the lines and drove on. The drummer who had followed the man, performed asked him what he was doing to the Chinaman. "Robbing him," said he, "and this is the best thing I ever had. I get one every day or two." Well, that drummer was the most astonished and uneasy man that could be imagined. After being given the performance of the matter, and remarked afterward that he never saw a man so relieved as was that drummer. So elated was he to find that he was not in company of a highwayman that he wanted the driver to stop at the first deadfall and "have" one one him. The records of the Board of Supervisors in 1857, I find that a bill was presented and presumably paid for guarding and feeding a prisoner for 32 days at six dollars per day. That job was worth something those days. The monument erected over the grave of Major Savage, near Leach's old store was procured by Dr. Leach from Connecticut. It is of Connecticut granite and cost \$800. It was shipped to Stockton by water and from there by eight horses, on a truck constructed for the purpose.

When the old Chinese ditch was first taken from Kings River they could not get saved timber for the bulkhead and the contract for hewed stuff was given to Mark Chapman, who now lives in Fowler and Bart Hancock, ex-county tax collector (now dead), and they went into that headgate and made a clean-up of \$180 per day on the contract. Mr. Chapman was an expert with axe and broadaxe, having at that time but recently come from down in the state of Maine, where every boy if not exactly born with an axe in his hand was brought up with one. Now as I have mentioned Mr. Chapman, I want to make a public acknowledgment of my indebtedness to him for an act of kindness to almost a stranger as I was at the time. In the early 70s I had a nephew, Walter Miles, a boy in his teens who died at the White place on the mountain. His mother and I were there in a buggy and no way to get the body home to Centerville and I went word to the Toll House in the night for a conveyance. A spring wagon was found but no horses, the yard was full of teams, some lodged for the plains and others headed for the mills and no one could leave his team for a job of that kind. Mr. Chapman was driving his own team of four horses and when the case was laid before him, he tied up to look after his horses, got some one to look after them, hitched the others onto the spring wagon, came up and went with us to Centerville, lost two whole days with his team and nearly a night's rest. And positively refused any remuneration. It may be said that it was but an act of humanity, and as people have been that we are not all built just that way. Anyhow I am his debtor for life, and after.

In the town of Valletts, Stanislaus county in the winter of '68, a band of eight Chinamen robbed a store belonging to the firm of Cohen & Co. After breaking in the store they picked up big safe and carried it some hundred yards or so to the bank of a creek and there hammered it open and took from it \$12,000 in gold dust. The officers soon got onto their track and arrested six of them. The other

two were supposed to have started down this way, and the officers sent a hurried description to the constable at Hornitos and he sent it on to the driver, Mr. R. H. Fleming, whose station was Millerton. About that time two Chinamen came to Millerton on the stage and were taken to the gulch to Visalia. The fact they had taken passage from a little way station and that they somewhat answered the description led Mr. Fleming to suspect that they were the men wanted, but he wanted more time to verify the description. A stage left for Visalia at 1 o'clock in the morning, he went to Chinatown, found his men and told them that they would have to stay over in Millerton until the next trip as the roads were bad and he was already overloaded. With the assistance of a Chinese merchant named Lee, a getting-thrust to do so. He then wrote a letter to Hornitos for a better description and sent it back by the same stage that brought them up. Receiving an answer on his return from Visalia, and a request to have them arrested, he found out where they were up at as would have been the next morning. He hunted up Sheriff Walker and together they went to Chinatown and gathered them in. When they were searched they had upon their persons \$1250 in gold dust. Russ then turned the whole matter over to Walker, who sent the sheriff of Stanislaus who came and took them away. They proved to be the men wanted all right and were convicted and sent up for a long term. And Russ had performed another clever piece of detective work, and got what story there was in it, but nothing more.

I have just met my friend Fred Ward, now of Oakdale, but Fresno-raised boy. Seeing him reminded me of a little story of early days. Fred was then in the hog business over on Kings River, and he had some difficulty with another man in the same business. In fact, they each accused the other of appropriating hogs that were their own. Fred and Ward and the matter finally went into court. I think the case was tried before Judge Wm. Garner of Kingsburg. However that may be, Fred was put upon the stand as a witness, and was asked: "What is your mark, Mr. Ward?" "A smooth crop off the ear next to the river," said he, "and the Judge, 'suppose the hog is going the wrong way and has the other ear to the river, what about your mark then?' Quick as a flash came this answer, 'I just turn him round Judge, and the hog is mine.'"

In the early days when Dr. Lewis Leach and Dr. Savage lived together in Fresno they took a trip together on some kind of business and somewhere on their travels I have not been able to get the exact locality but presumably somewhere on Kings River—they came across a man who had met with an accident and had one of his legs badly crushed and the Doctor decided that the only chance for the man's life was to amputate his leg. He had no instruments and there was no time to procure any, so he got a butcher knife and a common hand saw and with the assistance of Jeff saved the poor fellow. He left him up as well as he could and left him die, but as the unexpected generally happens, so in this case, the man got well.

In the palmy days of old Centerville the town was wide open and the American game of "draw poker" was one of the institutions. A man so inclined would always be accommodated with the game. At the old frame of E. Cherry, lived about fifteen miles from town and would make periodical visits to town and almost invariably would get into a game. On one occasion he tackled a game in which was a total stranger and as the game progressed the stranger was steadily winning and Cherry just stood looking. Every time he got a good hand the stranger would hold a better one. In the meantime the stranger was continually working and rubbing the fingers of his right hand and complaining of cramp in the fingers. Well, when the game closed and the stranger had about all of the money, the standers told Cherry that he had been working the whole party. Cherry went home but in a month or so came to town and inevitably got into the game again. In this game was another stranger to Cherry, although not to the other boys and was all right. Cherry had a habit when he sat in a game of handing his six-shooter (which he always carried) to the barkeeper. As the game progressed Cherry was losing as usual, and as it happened the stranger was winning. Cherry was watching him like a hawk and finally saw him manipulating his fingers along to the barkeeper. The other man had, he said to him, "What is the matter with you?" When he said, "Cramp," he jumped to his feet and bawled, "Barkeeper, bring me my gun; here is another son-of-a-gun with the cramp." The fellow was scared out of a year's growth and it took the boys some time to convince Cherry that he was all right.

And now while I am in my old home of Centerville, I will relate another little incident which happened along about that time. A prominent physician and an A. No. 1 man, was himself fond of the game of draw, and one night was sitting in a four-handed game when a dispute arose between him and the man who sat opposite across the table. The dispute waxed warm until the fellow was passed to the doctor. When he jerked from his pocket a small derringer and shoved it across the table into the forehead of his adversary with such force that the whole primar's forehead for hours, and pulled the trigger. Luckily the pistol failed to go off, when bystanders interfered and after quite a while of wrangling succeeded in restoring peace. Explanations and apologies were made and accepted, everybody smiled and the game went on, no one much hurt, no arrests.

THE NATIONALITY OF EGGS. It is possible to tell the nationality of an egg by inspection? The question is raised in acute form by the evidence given in the prosecution of a Lancashire firm for selling Russian eggs as Irish, which resulted in acquittal. The experts varied, as even experts will. One confidently pronounced the eggs in question Russian, nearly four months ago, when he sold them were second-class Russians. A third specified the south of Russia. On the other hand, experts for the defense were equally positive that nobody could tell the birthplace of an egg from external examination. We are, of course, here, by the way, who said that when eggs were bad their nationality was indeterminate. That seems probable, though it differentiates eggs sharply from human beings. The highly cultivated and polished Englishman is not a Russian, is he? Irishman and day; but nobody would mistake a bad mougie for a bad Irishman, or vice versa.

On the whole, one is bound to come to the conclusion that the average purchaser of eggs must take their nationality upon trust. He may have his suspicions, no doubt, based upon eggs' apparent antiquity. But the ordinary consumer cannot get beyond that Lena's division of the genus into "new laid eggs," "fresh eggs," and "eggs."—From the Post Mail Gazette.

PICTURE FRAMES TO ORDER. Maxwell & "Annie" Studio, J. and Fresno

Another lot of brand new bargains and another special bargain. Murray's business grows greater all the time. He can get you exactly what you want, if it should happen that there was nothing listed that suited you. Murray has listings of every kind of property, and in a great many places. If you want a place and don't know exactly what you want, Murray can show you every variety and suggest what will suit you.

Sanitary Plumbing

By Skilled Workmen

Our plumbing department is complete in every particular. The equipment allows us to undertake every kind of work and carry it to a successful conclusion. The workmen we employ are the kind that know how to do things.

The kind of plumbing we do is the guaranteed kind. It is the kind that gives satisfaction. It is the kind that does not require constant attention. When the work is finished, that ends it. It is not necessary to send a man to look at it every few days and do some tinkering.

"The New Town With the Big Payroll"

PHENOMENAL SALE OF TOWN LOTS

Over \$85,000 worth of low price lots sold since opening. No other railroad townsite has experienced such sales activity.

TOWN LOT INVESTMENTS HAVE MADE MANY WEALTHY

Many rich men of today owe their fortunes to opportune investments in new townsites. Have you bought your lot?

There are many others who are beginning their fortunes now by investing in a Riverbank lot.

RE-SALES AT LARGE PROFIT

Many re-sales have been made at a handsome margin of profit. The majority of purchasers are holding their property for the natural increase in value as a result of the gradual increase in population of Riverbank. The settlement in the near future of the vast area of irrigated land in the vicinity of Riverbank means great agricultural revenue and guarantees Riverbank a sound basis on which to base its growth. There is an electric spark in the air at Riverbank that causes people to get up and "do things." Room for thrifty merchants and professional men of merit, but no "dead timber" wanted. If you have grit and ambition and want to do something for yourself, better get a lot and locate in Riverbank. Residence lots \$150 up. Business lots \$275 up, 10 per cent down, \$10 up monthly. Act now, TODAY.

GUY M. RUSH CO., Inc., Owners, Exclusive Agents, Los Angeles

DOES WILEY KNOW THIS?

Since the outbreak in the Wiley case, Washington correspondents have been almost swamped by anonymous communications in his defense. They are typewriter imitations, evidently extolling the virtues of Dr. Wiley, and criticizing the motives of the administration in daring to suggest the doctor had misused his office. They incidentally say a word of praise for a certain particular brand of bottled goods. The preparation and posting of these communications, designed to influence newspaper dispatches throughout the country, is costing some one a lot of money. If the public doesn't know the source from which they come, they might ask Dr. Wiley. He knows everything!—From Leslie's Weekly.

Spendid Dairy Proposition

SANTA CLARA VALLEY.

\$35,000.00. 121 acres, 44 acres alfalfa, 25 acres for hay and corrals. Cross-fenced. Level, good soil; 3 artesian wells, each equipped with engine and pump. Abundance of water. Splendid stand of alfalfa all over. Good dwelling, 2-story, three barns and outbuildings. Located within 1 1/2 miles of shipping point on the S. P. 1 1/2 miles from Sunnyside, 10 miles from San Jose. 35 cows, 23 pigs, complete up-to-date dairy equipment, including Star separator and Laval separator. Electric power used entirely. In fact, the whole dairy land and all is for sale as a splendid proposition, completely equipped and up-to-date. The improvement includes stock, real \$15,000.00 cost of bare land in this neighborhood. UNIMPROVED is \$30.00 and up per acre. A RARE SNAP FOR A DAIRY MAN. Terms can be arranged. The alfalfa has a ready sale from neighboring owners, and San Francisco has a ready market for all dairy products. Splendid neighborhood.

MORE interest is being taken in Calwa every day. It has the location to become a manufacturing town. It is getting the publicity necessary to call attention to the fact that its situation is unrivaled in the San Joaquin Valley. Factories are going to come to this part of the state. They will locate in the place that offers the most attractive proposition. The town that can offer the best transportation facilities, the most easily accessible raw materials, and the cheapest fuel will secure these essentials. Calwa will secure the factories. The Santa Fe is building a plant that will cost \$1,000,000 when finished. This shows what one great company thinks of Calwa. It will point the way to others.

The Town of
Swiftly Rising
Values—Calwa.

Have You Made Up Your Mind to Make Some Money?

WHEN the Santa Fe Shops are finished, and even before that, there will be a number of families move to Calwa. They will be the families of the men employed in these shops. They will have to be fed and sheltered and clothed. Many of them will buy lots and build homes. These will make a profit on their investments. Others will want to rent homes. There will be many men who will live in hotels and boarding and rooming houses.

These are some of the business openings suggested by the fact that a large population is assured to Calwa at an early date. Some people will buy lots in Calwa and enter into a prosperous business. Will you be one of them?

Now Is the Time Now is the time to decide for the best locations will be selected by the early buyers.

CALWA will be a pleasant place to live, because everything is being done to make it a pleasant place. The streets will all be graded. There will be neither dust nor mud on them. Curb will be put in. In fact, that work is under way now. This will add to the look of the streets and make them last better, besides insuring drainage.

Calwa Has the Modern Improvements
Of Large Cities

CALL at the office and get more information. Ask to be taken out to look at these lots. Get our illustrated booklet that tells all about Calwa. These lots are only \$250 and up. The terms are exceptionally easy. Just 10 per cent down and \$15 a month. Any one can afford to buy a lot on these easy terms.

What CALWA Has—Graded streets, curbs, school house, many trains, Santa Fe shops building.

EVERY lot in Calwa will have water piped to it. The Valley Ice Company will furnish the water. This means that there will be an ample supply of pure water. Calwa will have concrete sidewalks. These will be without cost to buyers of lots. There is already a school house built and it will be enlarged and renovated.

Calwa Will Be a City of Factories
and Homes

What CALWA Will Have—Water piped, reading room, cement walks, factories, a great population.

THERE are lots of other things that can be said about Calwa. Prospective factory builders have already looked at sites and expressed satisfaction with them. Others are being communicated with. There is no doubt whatsoever about the future of Calwa. Opportunity exists there as it does not in any other place. Will you avail yourself of this chance? It is a chance for the salaried man, the laboring man, and the small business man. There will shortly be a demand for business lots. Those who have the ones of the choicest location will be able to start lucrative businesses. Those who own suitable residence lots will be able

to sell at advances to late comers. It only remains for you to help yourself to this chance. It is here now, it will not last forever.

Now Is the Time

CALWA

CONLEY KNOCKS OUT PATSY KLINE AT VERNON

**New Jersey Fighter Takes
Terrible Body Beating
From Wisconsin Pug.**

LOS ANGELES, Aug. 26.—Frankie Conley of Kenosha, Wis., knocked out Patsy Kline of Newark, N. J., in the fourteenth round of what was scheduled to be a twenty round fight before the Pacific Athletic Club at Vernon this afternoon. They found at 123

Conley led throughout the battle, which was a slugging match from start to finish. Kline took a terrible beating about the body, but with the exception of welts over his kidneys he showed no marks of the battle. Conley's face was badly cut from the first and he bled above the eyes in every round.

floor, more from the amount of punishment he had assimilated than from any one blow. He came up at the count of nine, but sank to the floor again under half a dozen blows, and while perfectly conscious, was too weak to rise before the tenth second. Come, will be matched with the winner of the Rivers-Kilbane fight scheduled for Labor day.

Len Zengel Wins Elgin Trophy Auto Race

LEN ZENGEL WINS ELGIN TROPHY AUTO RACE

Drives 305.5 Miles in Average Time of 66.45 Miles Per Hour.

ELGIN, Ill., Aug. 26.—Len Zengel, in a National, won the Elgin national trophy 305 miles in 4:35:30. Grant was second; Hughes third.

Ralph Mulford, whose Logier was the last year and who won the race last year, set a terrific pace at once. For 39 miles he drove at 69 miles an hour, leading the field by a good six minutes. On the next lap he went out of the race with a burned connecting rod bearing.

This placed Len Zengel in first position with Harry Grant two minutes behind. They finished in this position, although Grant lost an additional two minutes from the trouble.

Hugh Hughes was third, eleven minutes behind Grant.

Zengel's time average for the race was four miles faster than that set by Mulford last year.

SUMMARY

Elgin national trophy for cars under 500 inch displacement; prize and cash valued at \$6,500 to winner. Distance, 305.5 miles, lap, 8 1/4 miles.

First, Len Zengel, National, 4:35:30.

Second, Harry F. Grant, Alco, 4:41:58.

Third, Hugh Hughes, Mercer, 4:42:09.

Fourth, Frank Lee, Alco (271 miles in 4:45:48).

Fifth, Dave Buck, Pope-Hartford, (203 miles in 4:53:26).

Sixth, Harry Hartman, Alco (169 miles in 5:45:44).

Zengel's average, 66.45 miles an hour.

Mechanical difficulties eliminated six of the contestants during the progress of the race. Frank Lee, the only other driver on the course when the race ended was 33 miles behind.

HOW THEY STARTED

ELGIN, Ill., Aug. 26.—Ten cars, driven by some of the best known drivers in the country, started in the 305 mile road race for the Elgin cup today.

Harry F. Grant, in an Alco, was the first away at 11 o'clock. The others

PAUL DERKUM EXPLAINS HOW HE INJURED KNEE CAP

BAKERSFIELD, Aug. 26.—(Dare Devil) Paul Derkum who broke the record for fast motorcycle riding between Los Angeles and San Diego was in the city this morning for a few hours visiting with the speed burners around the Pioneer Gun Store.

When asked relative to the story that he broke his knee cap several days ago and how it happened he was out on the street he stated:

"I had a hard fall which dislocated the cap to some extent laying me up two days but it was nothing serious. I was working for the film company making moving pictures. The picture was to feature expert riding on a motorcycle such as picking up hundred Kerchiefs off the ground etc. as has commonly been done on a bicycle in years gone by. Nearly 200 feet of the pictures were made when the crowd spoiled the negatives by jumping in and making it necessary for me to try one of my hardest tricks over again. In doing this I took a hard fall on the finish but out of range of the picture machine. In the fall my knee cap got the greater part of the shock but it is all right now."

followed at half minute intervals, as follows:

Len Zengel, National; Dave Buck, Pope-Hartford; Spencer Wishart, Simplex; Frank Lee, Alco; John D. Aitken, National; Harry Hartman, Alco; Hugh Hughes, Mercer; Ralph De Palma, Simplex; Ralph Mulford, Logier.

Hughes won the Kane county cup yesterday. Mulford won the Elgin cup a year ago and Grant is well known as the only pilot to win two Vanderbilt's in succession.

HANFORD WOMAN SENT TO STOCKTON

VISALLIA, Aug. 26.—Declaring that "the Lord will provide," Mrs. Hazel Schaffer, who came recently from San Francisco, has refused to take care of herself to the extent of earning a living or procuring suitable clothing.

Today she was examined in the superior court before Judge Covert of Hanford and directed committed to the Stockton asylum. She may be taken there tomorrow.

BITTELS TO FACE TIGERS TODAY; M'AFEE'S TO CLASH WITH CLOVIS

Tense and Interesting Games to Be Played at Recreation Park Between City League Teams; Kuhn, Smith and Duncan Lead in Batting.

Two tense and interesting games of the national pastime are billed this afternoon at 2 o'clock at Recreation Park when the Tigers and Bittels and the McAfees and Clovis Boosters face each other in the weekly contests of the Fresno City League.

These games should be particularly interesting in view of the fact that the result will likely spell a change of position in the league race. The only thing that will prevent change in the standing of each team in the league will be if the Tigers take their game from the Bittels. Manager "Bill" Judge of the Bittels has declared that his team has accepted the rather ubiquitous honor of being cellar champions for a long enough time, and is determined not to be driven down a further notch.

Accordingly he began strengthening his team a week ago with the result that last Sunday when the Bittels lined up against the Clovis team the Bittels emerged winners over the hard hitting and fast fielding Boosters from the Mill town. Judge is not decided whom he will send to the mound today. He says he will make his decision just before the game. He has two good twirlers in Harry Johnson and Massaw. Last Sunday Massaw pitched a four hit game against Clovis, and if he is in good shape this afternoon will probably be sent to stop the fierce onrush that the Tigers are making for the pennant. Heppill will be on third for the Bittels, Sanderland having been released. Means will again be on second, while "Dad" Rueter will be seen in center field.

The Tigers will also present a changed line-up. Of course "Dutch" Leonard will do the twirling. George Maul has been shifted to second, however, and Al Klein, who has been in San Francisco, will be seen on short again.

In left field Ike Tufts will replace Roscoe Ford, while in center field Smith will play instead of Duncan. Duncan has been forced to remain out

of the game today because of a bad finger. His loss will be felt by the Tigers when they are at bat, as he is a heavy stickler and is one of the league's leading batsmen.

In right field Cuckler Leonard will play. This will make his first appearance in the Fresno city league. Leonard is an older brother of the Tiger pitcher and will be remembered as one of the twirlers on the old State League team. He will make an attempt to come back to his old form, and if successful will try to catch on with some big league team next year.

Charley Klein, the manager of the McAfees, announced yesterday that his team was in the pink of condition to go against the Boosters. "Charley is very optimistic over the outcome, but at the same time does not underestimate the strength of his opponents. The Clovis boys have been playing fast and furious all this year. They have already trounced the invincible Tigers, and though defeated by the Bittels last Sunday show no signs of going back. Matthews, the regular first baseman of the Clovis team, who was not in the game last Sunday, will be with the Boosters today in his old position.

McCarman will do the pitching and Kuhn will be seen at shortstop.

Much interest is being taken in the league games. The attendance has been increasing each Sunday, and the enthusiasm is rampant while the games are in progress.

The line-up will be as follows:

BITTELS

Reuter, cf; G. Smith, 2b; Cartwright, 1b; Lewis, rf; Means, ss; Patterson, lf; Girtz, c; Massaw, p; Heppill, 3b.

TIGERS

G. Preston, c; D. Leonard, p; E. Preston, 1b; G. Maul, 2b; Wagner, 3b; Klein, ss; Tufts, lf; C. Smith, cf; C. Leonard, rf.

CLOVIS

Matthews, 1b; Barbour, c; Kuhn, ss; Shaleford, lf; Merriman, p; Loper, cf; Coherly, 3b; Preston, 2b; B. Gross, rf; McAfees.

Clarno, 3b; Cardwell, cf; Donner, 1b; Stevenson, 2b; Stapp, lf; Ostrander, c; M. Maul, ss; White, rf; Gulley, p.

The following is the official batting average of the City League players:

B. Kuhn, C. Smith, and Duncan are shown to be the real league leaders:

NEW CASTLE, Eng., Aug. 26.—Ten persons were killed, among them six women, when a large motor carrying thirty-three passengers ran away on a hill near Consett today and collided with a tree.

GRAHAME-WHITE STARS AT SQUAMMUM MEET

BOSTON, Aug. 26.—The second Harvard-Boston aeroplane meet, bringing together many leading American and English aviators, opened at Squamum field today, and a dull sky, with a light, cool breeze.

Clayde Grahame-White, the Englishman who won the last year's meet, was the star, taking two first prizes, and a large share of the money. He went up to 3000 feet in some seven minutes and did eight laps of the mile and a half course in 15 minutes, 6 1/2 seconds, winning both the altitude and speed events.

Thomas Sopwith, also an English aviator, won the quick starting test in 11 4/5 seconds and was the second in bomb dropping.

MORRIS S. IS STAR PERFORMER AT FAIR RACES

Races Three Heats in the Average Time of 2:09 1/2.

SACRAMENTO, Aug. 26.—The three opening events of the state fair harness meet which commenced today, were taken in straight heats. Bernice R. was the winner in the 2:16 class trot, Morris S. won the 2:15 class pace and Little Lucille was the victor in the 2:20 class pace.

The heat time was made by Morris S. who did three heats in 2:09 1/2, 2:10 1/4, 2:10.

The second stake will be held Monday. No races are carded for Sunday.

Summaries:

First race, 2:16 class trot; purse \$1500:

Bernice R. (Spencer) 1 1 1

For the INDUSTRIOUS NEEDLEWOMAN

By ADELAIDE BYRD

MADEIRA CENTERPIECE

JUST multiply this pretty design by two and you will have the centerpiece in its entire beauty. Madeira work, which depends upon eyelet work for its loveliness of design, is never out of style. There is a restful dignity of design in the combination of openwork and solid work, and the pattern is so arranged that you can omit

every other eyelet, or here and there a spray, if you are anxious to complete your centerpiece. Of course, the design is beautiful in itself, and I would suggest that you follow out the artist's idea if the best result is desired.

The curved lines of eyelets that form the central outline should be openwork. Punch with the regular ivory puncher

for a change or eyelet if you are not tired of punching and overcasting. The other method is that of working the flowers and leaves in solid work, which will give a heavy effect around the edge, while the ring of eyelets will produce a lacy appearance and a pretty contrast.

For a change or eyelet if you are not tired of punching and overcasting. The other method is that of working the flowers and leaves in solid work, which will give a heavy effect around the edge, while the ring of eyelets will produce a lacy appearance and a pretty contrast.

Filet Lace Covers

EVERY woman is proud to own one or more soft cushion covers made from fine handkerchief linen and squares of filet lace.

Nothing gives more distinction to a tearoom couch than the addition of one of these cushions. Sprays for the bed can also be made of these lovely materials, which, if bought, would be quite beyond the average woman's pocket-book.

The filet squares can be bought for little price. They show classic designs woven in solid, and often several different designs are used in the making of a bedspread. The work is done somewhat on the order of old-fashioned patchwork, only it is much easier. Strips of linen are sewed between the squares. The work is done on the machine if you are a busy woman; but if there is time to spare, do it by hand, rolling the edges.

A wide border of linen with a filet lace edge makes the handsomest cover; but a hem all the way around, having the corners mitered, is very good taste. Pillow covers or shams match the bed covers, and covers for the couch cushions correspond, but are made from smaller filet squares. Slip on over a colored silk lining. Such a set would be a joy to the heart of any housekeeper and yet can be had with small expense of time, money and patience. Pincushion covers are made of squares of lace edges with heading and run about with dainty ribbon. If you are thinking of a gift for a young girl, by all means make her one of these attractive cushions and outline the design in the lace cover with pins having varied colored glass heads.

Dress Protectors

FOR the woman who does not care to do fancy work during the vacation time, when leisure hours are many, and who expects to be entertained socially next winter, a good plan is to make several long bags of soft material for her closets.

These are of the greatest service in keeping her evening gowns clean and fresh during the winter campaign.

No matter how particular you are to clean closets, the dust-laden atmosphere of the city is bound to filter through cracks in the doors and settle on the clothes therein.

Light-colored gowns, especially white, after hanging in the closet for two or three weeks, get a slight grayish tinge that ruins their freshness.

Fine muslins, gauzes, satins, silks and chiffons are bound to be affected in this way if they are not protected from the ravages of dust.

The simplest bags to make are of unbleached cotton sheets. Get the size for a double bed, fold it over once and sew it across the bottom and up one side, leaving the top open. Now run a tape drawing-string through the hem and your bag is ready for use.

Stuff the bodice and sleeves of your gown with tissue paper, put it on a coat hanger and slip it in the bag, drawing the string up tight about the handle of the hanger, and you need have no fear of a dust-spotted frock. One girl, whose room is done in blue and white, has six bags of this description made of cheap blue-and-white muslin and tied with blue tape.

They can be made of any soft cotton material that is closely woven and light in weight.

Rickrack Trimming

OLDER women will distinctly remember the attractive trimming that, as girls, they made with linen rickrack braid, and I think will be glad to learn that such trimming is coming in again and promises to be as popular as it was thirty years ago.

Today, however, a very much more elaborate trimming is made by combining a fine linen braid with crocheted thread. Beautiful medallions, edges, lace and centerpieces can easily be made and will be found most fascinating work.

A lingerie blouse trimmed with daisy medallions of rickrack and Irish crochet is especially attractive. First crochet a center about the size of a 5-cent piece, making little loops in the center with linen thread to simulate the stems of the flower. Around the central disk apply the braid, catching two points together and sewing them to the edge of the center. Continue in this manner until the entire center is edged. If you desire a variety, sew another row of braid under the first, thus making a double daisy.

To vary this, crochet a half-inch band of fine lace about the edge of the petal. This also can be widened; but it is not desirable to have too wide a medallion on the blouse.

Square medallions are made by sewing two points of the braid together the length of the point, skipping two, sewing two, and so on, until you have four sides. From the inner points work a spider-web design, and on the outer edge crochet an open lace design on each side, taking care to square the corners perfectly.

With a little ingenuity other flowers can be reproduced, besides any number of lovely conventional designs.

Both wide and narrow lace edges are inset with the rickrack flowers, and when made up with crocheted centers and edges form not only beautiful trimming, but delightful occupation for an idle hour.

Designed by
E. J. Buckman

FROM A BANDANNA HANDKERCHIEF CHIEF

A Scarf on a hat

The bathing cap

If it trims a dress

THE woman who desires an odd yet distinctive touch to her summer frocks will not be slow to recognize the possibilities of the bandanna handkerchief as a useful accessory to the hot-weather outfit.

These can be bought in every conceivable color combination, red predominating, stamped with white, green, blue, purple, gray, brown, black and many other brilliant hues that, used as a trimming, give vim to the most somber gown.

The fad for Persian coloring still remains in favor; but one grows tired of constantly seeing the "palmleaf" design brought out and welcomes the more conventional patterns found in the homely bandanna.

Brooks of plain-colored lawn or ginghams are brightened with trimmings made of the cotton handkerchiefs; but for real beauty the bandanna handkerchiefs woven of fine silk cannot be surpassed.

In the illustration we have a morning gown of natural pounce showing the broad sailor collar, deep-pointed cuffs and pocket panel made of a silk bandanna in rich red, green, white and black tones.

The tie, caught in a four-in-hand knot in front, is of red silk, exactly

matching the border of the handkerchief.

Black velvet buttons are used to fasten the pocket, which is edged with bound lace done in heavy linen thread.

To secure a bathing cap the cotton bandanna will always be acceptable. With one large handkerchief two covers can be made. Take them away with you on your annual trip to the shore or lake, and when one becomes faded with much wetting and drying in the sun you will have a fresh one ready for use. Simply fold the handkerchief over so as to form a triangle and cut

One half
of design

To Transfer

HERE are suggestions for transferring the pattern before you to any material before working.

Perhaps the easiest way is the "window-pane" method. This is successful when the material is thin, like linen, batiste, etc. Pin the sheet of paper and the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design, which can be easily seen through the goods. If one-half of the design only be given, unpin the paper and turn the other side to the fabric. The strong light behind will make it plain.

If you have carbon paper, you should place the sheet between your fabric and the newspaper. This latter is on top. With a sharp pencil go over the outline of the design. The impression will be left in fine lines and will last until worked. This method is successful on heavy material.

The last way is also easy. On wax paper or ordinary tissue paper trace the pattern before you. When the design is completed, turn over the paper and outline the pattern with a heavy lead pencil. Then place the design

down on the fabric and redraw the outline, pressing hard with the pencil. The pattern will be transferred without difficulty.

Surely the way is easy.

For the Bride

IF YOUR best girl friend is to be married and you know that she will receive quantities of silver and cut glass, why not give her some handsome and dainty piece of underwear that she cannot duplicate in the shops?

A petticoat, for instance, made of fine cambric and net, with lace and ribbon trimming, makes a particularly acceptable gift.

Make the foundation of cambric cut over a seven-gored pattern, fitting the hips closely. And closing with a habit back. The length should be three inches from the floor, or exactly to the ankles.

Finish the cambric foundation with a ruffle of net edged with lace.

Make three wide Spanish ruffles of net trimmed with lace insertion and edged with good, strong lace, and put these on the foundation one above the other, joining the top one with a two-inch band of lace heading, and insert a piece of soft ribbon through this, ending with a bow at the left side.

These lace petticoats are much smarter to wear with evening gowns than silk or satin and, being made of soft materials, cling as closely to the figure as the finest muslin.

Even if the bride-to-be goes into society only occasionally, she will be delighted with a really elegant underskirt of this description.

Finished

For the HOME DRESSMAKER

FALL FROCKS OF BLUE SERGE

NEVER has dark blue serge been more fashionable.

This dictum, directly from Paris, portends the popularity of serges in all the alluring shades of blue for early fall attire.

Now is the time when the well-dressed woman considers her fall and winter wardrobe, and in planning this she will not overlook the importance of having at least one frock of serge made on the lines of the still fashionable one-piece pattern. Even now, on cool days, these attractive costumes appear on the streets of Paris; they are especially adapted to a day's outing by boat or motor.

Surely every girl who is making ready to go back to college or boarding school will include a dress of serge in her outfit, and the accompanying illustration shows models that will be in first fashion during the coming winter season.

These frocks are made up with other materials, holding to the plan so well established in the last few months of combining two or more materials in one gown.

The first model is of navy blue serge cut on simple lines, having a surplice bodice and straight four-gored skirt. The narrow yoke, showing a deep V in front, and the cuffs are of white linen or pique, which also appears in the belt, fastened with an oblong gilt buckle. Cuffs, belt and yoke are detachable, so they can easily be laundered. It is well

to have more than one set of these, so while one set is being cleaned another can be in use.

A broad-brimmed white felt hat decorated with a bow of blue satin ribbon completes this smart costume. This same model in silk or chambray would be attractive.

Deep blue serge, a bit lighter in shade than the "navy," is used for the second model.

This chic model shows very wide revers folding over to the raised waist line, where the bodice is met by a straight belt of black patent leather. Rows of black soutache braid outline the revers and also trim the sleeves and skirt. This trick of applying trimming of braid in straight lines from

neck to hem on skirts is new and popular. The buttons are satin covered. They give a pretty note to the gown. All-over lace forms the yoke and undersleeves, and the hat is of black French felt, with a big butterfly bow of lace placed back on the right side.

In the next model we have king's blue serge combined with black satin. The small round yoke, undersleeves and belt are of satin, while the flat applied yoke and bretelles are cut in one and attached on.

The frock opens in the back under a box pleat concealing hooks. Metal buttons and simulated buttonholes are used with good effect.

Four inches from the bottom of the skirt is a bias band of the same width attached on the upper edge.

The small poke-shaped hat has as its only adornment a large bow of coral satin placed directly in the front.

Black-and-white striped silk edging black satin is the trimming on the fourth model.

Double bretelles give the military touch to this quaint frock, which, by the way, will be seen in all the newest models in some form or other.

This gown is plain and simple in its lines, but decidedly good form. Here again the narrow middle is of satin held in place with a fancy buckle. The buttons are cloth covered and the yoke and undersleeves of figured net.

An all-black hat is worn, which is trimmed with many loops of soft satin ribbon.

A bandage of Egyptian embroidery on dark blue satin adds a touch of bright color to the otherwise deep-toned costume.

Light and dark blue striped serge makes the next gown. Blue with the shade of the lighter stripe is used for the flat bib yoke and deep cuffs; also to cover the button molles on the sleeves. Striped net makes a dainty finish to the bodice at the neck and undersleeves and the tie is of black silk.

One of the newest shaped medium-sized hats of felt is here shown, having a black velvet facing and trimmed

Our French Fashion Notes

PARIS, Aug. 27.

FOR evening, tulle over satin is much in evidence. The unusual color combinations are the feature. For instance, pink over yellow touched up with pale blue, purple and royal blue, green and silver, silver and red, are some of the exquisite alliances.

Very large flat hats are worn for the events on lawn and at the shore.

One seen at a lawn fête last week was of white straw with a black velvet crown. On the brim was a band of pleated white tulle. Pale pink roses surrounded the crown. This black, white and pink combination is quite evident in the late summer millinery.

At Rumpelmeyer's tearoom there was worn a beautiful white hat with a draped emblem, the velvet crown ending in a bow at the front. This was worn with a blue taffeta dress trimmed with white tulle.

Hats of linen with rolling brims, like the Breton peasant shapes, are worn. Trimming is quite simple, usually a long linen quill encircling the edge in coarse linen coils.

Blue straw is trimmed with a scarf of pongee in natural color. Many large hats are sold with a set of adjustable scarves to each hat. A suede or chambray scarf, a foulard, pongee, linen and eyelid embroidery band come with each large, simple shape. You can see how practical this idea is.

Valenciennes lace is used in all-over pattern for crowns of hats and for covering or facing lingerie hats. The narrow lace is used as ruffles on the undersleeves and on little vests for lingerie ensembles.

Some of the loveliest negligees are being exhibited in little shops on our big streets. Flowered tulle and net are draped over satin, and wreaths of blue and pink forget-me-nots are the dainty trimming embedded in soft ribbon.

Deep bands of valenciennes and flax are inset on the lower part of the negligees, piped with colored satin or velvet.

Sashes are still in high favor and fringes of all possible descriptions are prominent in every department of dress.

ELOISE.

Graceful Ruffles

RUFFLES have come into fashion again. Slender women and young girls will welcome these dainty trimmings for their summer dresses.

Some of the newest frocks from Paris have a narrow ruffle around the bottom of the skirt and show the same mode of adorning plain bodices.

A pretty model for a debutante, especially if she be a slender slip of a girl, is a frock of figured net made up over a slip of satin in a delicate shade. Make the bodice perfectly plain, except for a deep V of finely tucked mousseline.

On a straight foundation of net put three lace-edged ruffles three inches wide, letting them overlap very slightly, and arrange them so as to form a point at the ends. Place this over the shoulders of the bodice from the waist line in the back to the waist line in the front, outlining the yoke. Make a plain, close-fitting sleeve with a narrow lace edge to correspond with the ruffle edge, and finish the low-cut neck in the same way.

Make the skirt slightly full around the waist and skirt it in at the knees, where the same width ruffles that are on the bodice are repeated. Turn up a three-inch hem and have the skirt ankle length.

Narrow ruffles are being applied to the new gowns in many different ways. The surplice effect is obtained sometimes with a broad piece of embroidery laid on over the shoulders and edged with a narrow ruffle of lace or hemstitched balais or handkerchief linen.

Ruffles of embroidery or lace edge sailor collars, cuffs and the broad brims of lingerie hats.

Graceful ruffles are again appearing on the hem of skirts. Although this fashion seems like a revival of the old one, it is somewhat changed by having these ruffles made of the softest possible material and put on rather scant; but even so they give a soft appealing touch that is impossible to obtain in any other way.

Black and White

IN SPITE of persistent rumors to the contrary, black and white is still the most popular combination in this age of two-toned costumes. At many of the smartest functions gowns showing these colors are often the most modish, having the true Parisian touch to distinguish them from frocks made at home.

There is a change, however, for now the trick is to veil black material with filmy white, instead of, as formerly, white with black.

Black satin, used as a foundation and covered with white tulle or spangled net, is now the extreme of good taste for an evening frock. The great Parisian modistes lay decided stress upon this arrangement. Callot shows a model made of black satin veiled with

finely pleated white tulle and lace. A deep hem of the satin finished the skirt, and under the tulle, which shows through in a most attractive way, are bands of silver galloon. The effect is extremely attractive, as are other models on the same order.

White lace veiling black marquisette is another fancy of the French. A handsome model of clinging black marquisette has an overture of creamy lace, showing a heavy design at the hem, with a figure in trailing vines extending all the way up to the extended waist line, where it ended in the faintest tracings of thread lace.

The lace is draped over the shoulders, forming a deep V decollete both back and in front. This is fluted with fine shirtings of white tulle, and the sleeves are simulated with bands of tulle shirtings crossing the arms midway between the elbow and shoulder.

A high circle of softly folded black plush velvet is held in place a little to the left of the center of the back with an oblong buckle set with rhinestones. Long ends of the velvet, edged with fringe, added the sash effect to the costume.

About Slippers

SOME of the most beautiful slippers are of soft, lustrous satin, made perfectly plain, with a medium Cuban heel and a small rhinestone buckle in front.

Many of them are finished with a soft choux of chiffon or maline, held in place with a round jeweled ornament, and others have small satin bows in front.

For the bride, white satin slippers having a tiny cluster of the significant orange blossom on the toe are quite correct.

The new note in midday's shoes and slippers is that heels are to be a trifle lower than heretofore and toes more pointed.

Velvet and suede pumps have been much worn during the summer and will continue to be popular during the fall. As a rule, they are so soft and comfortable women hate to give them up, even when cold weather sets in.

The French heel has almost entirely disappeared from shoes adapted to street wear, although it is still seen on evening slippers.

Very beautiful are the "mules" designed for the boudoir. These soft, comfy lounging slippers are made of satin and brocades in the delicate shades. Some are embroidered and others are trimmed with little bows of lace.

Buckles are seen on all the newest slippers. Large, small and medium, it matters not what size is chosen—just so it is a buckle. They are of metal, often jeweled elaborately, others leather covered, or having metal frames inlaid with satin, suede or velvet.

Costumes of Surah

PARISIANS are favoring tailored costumes of silk worn much like the one-time fashionable surah.

Very chic are those of white surah showing facings of black or black-and-white striped satin.

These have quite taken the place of satin suits at the French capital and promise to be extensively worn during the early fall season by women of fashion in America.

Costs are cut on rather straight lines, with perhaps a little more of a suggestion of fitting in at the waist than has been seen for some time. Skirts are a bit fuller at the hem, but still cling closely to the figure about the hips and at the waist line, which in many of the newest models has dropped to the normal again.

Striped satin of white with black or a color, sometimes a vivid one, is employed for collar, revers and cuff facings.

Buttons, too, are covered with gay-colored silk and used as an added trimming on the black or white surah suit.

with an upstanding feather of white, held in place with three satin-covered buttons. Smoked-pearl buttons trim the last model, the buttonholes being simulated with soutache braid. A lace collar and undersleeves are used, and the kimono sleeves take a triple tuck effect.

This is carried out on the skirt by the application of bands stitched only on the upper edge. The girls is of softly folded blue satin and finishes with a long looped bow in the back.

The hat is of light blue French felt, faced with dark blue and trimmed with a bow of shaded blue ribbon.

The woman who possesses one of these stylish models may count herself fortunate and will always feel well dressed for the shopping tour or outing during the season to come.

It would be well, however, when having the gown made, to have a jacket of the same material made to wear over the gown in cold weather. Thus you will have a practical suit to meet every emergency.

INTERESTING HISTORY OF MARGARET MAYO AS A PLAYWRITER

Margaret Mayo, author of "Baby Mine," and her pet cat.

While the discussion that is before the public at the present time is of the trust magnates and their Octopus clutch on finance, and of "populists" and "progressives" and of "the people," we will revert for once to the popularity of a woman, also a financier—but not of the cotton, wheat, or sugar facion—but a playwright, a woman who can sit down and rapidly pound out a typewriter one of the most successful plays of a theatrical season—a play—that is getting a strange hold on the general royalty coffers, and bringing in a cheque of more than three figures weekly.

The name of this particular woman is, Miss Margaret Mayo, and her most winning success is "Baby Mine," and strange to say, "Miss Mayo" is the wife of another big royalty-drawer, namely Edgar Selwyn, and they both have a seeming tendency to monopolize the market. But her husband "Selwyn" tried a long time before he hit the bull's-eye of success, and to a certain extent it was much the same with his wife. Still she admits that after reading a newspaper she was struck by the item, and taking her pencil and pad, dashed off a "scenario," presented it to a manager, took seven days to revise it, and has been cashing royalty cheques with regularity ever since. The theatrical and play-writing business in this country is a big business which means success to all those who play "square," and the Selwyn's motto has always been—"Play fair, if you wish to succeed," and the answer is their success. They have always played fair, and continue to do so. They came up to the top of the ladder called "Success" by the merits of their work.

It is a pretty unusual thing for a play-writer to have a play-writing wife. It is also unusual for a play-writer to have a husband who follows the same profession. Practically all the great writers of history had a wife who didn't know "prose" from "rhyme."

Edgar Selwyn was formerly a clerk in a "haberdashery," and his wife, before she was his wife, was an unknown actress.

Selwyn was born in Cincinnati, but he likes to forget his birth-place, as his parents moved to the "Golden West" when he was a youngster, and he professes that part of the country to be the city of "Beverly." His first position in the theatrical business was as an usher at the Herald Square Theater, New York, where a young actress was playing with "Richard Mansfield's Company." Miss Margaret Mayo by name, daughter of Frank Mayo, whose last appearance on the American stage was in "Puddin' Head Wilson"—Mark Twain's famous story. Soon after, the usher Edgar Selwyn married the actress Margaret Mayo, and as they say in the Fairy Tales—"They lived happily ever after."

Selwyn's first step from clerkship was to become an actor, and he met with better success than could have been expected, and in "Kirk La Salle's" New York production of Augustus Thomas' "Arizona" he created the part of "Tony, The Mexican," and made a sensational success. His wife also had an important part in the same company. Shortly after this, husband Selwyn began trying his hand at play-writing, but with not much success. He wrote "It's All Your Fault," "Father and Son," "The Rough Riders," and a dramatization of Sir Gilbert Parker's story "Pier and His People," which he called "Pier of the Plains." But none of these plays seemed to catch the public's approval.

Wife was more successful. Margaret Mayo made the dramatization of "The Marriage of William Ashe," played by Grace George, and it was such a success, that she was commissioned by William A. Brady to make an adaptation of Sardou's "Divorcee" which did more to raise "Miss George" in her position as an actress than any previous play. Miss Mayo also wrote "Folly of the Circus," one of the most successful plays of its sort ever written; and its success still continues, for four companies are now playing it—three in America, and one in the provinces. At this point wife was ahead of hubby. He was having some big plans while she was having big success.

Then one day—"Opportunity" came along. Selwyn was asked to write a sketch for the Lambs Club, for one of their entertainments. For a long time he had been thinking of writing a drama around incidents that transpired in a boarding-house in New York City, where he lived when he was clerk and an usher. Grasping this as a chance to work out his long dream, and to put at all likely that four principal characters being "The Landlady," "Chorus Girl," "A Newspaper cub," and "A Country Boy." These were all characters he had known in real life. The sketch was enacted by Frank Sheridan, John Murphy, Joseph Tuohy, and Donald Brian, and it was an instantaneous success. Taking this as an inspiration, he decided to write a full-length drama, that he called "The Country Boy," which after a preliminary Bridgeport Conn. trial, was taken to New York and scored an immediate success. It is credited with saying that if "The Country Boy" was a failure he was through with play-writing. But as everyone knows, it was not a failure, but quite the reverse, and it laid at all likely that he will have difficulty in disposing of future work at his own terms. It was while he was working on the "Country Boy" that his wife, Margaret Mayo, was writing one of the biggest and best-selling successes of this decade—"Baby Mine." The idea she got from the article in the newspaper. One morning while she was glancing over the paper, a headline reading—"Adopt Babies," caught her eye. It was under a Chicago date, and it told that in Chicago alone there were at least two thousand daddies fondling infants that were not their own, but babies adopted by their wives, and the fathers were none the wiser. This appealed to her as a topic for a play, and she laid down her paper, she sat down at her desk, and to leave it till the wee hours of the morning. Her thoughts came to her rapidly and she wrote on, and on, and finally completed an outline of the farce; her idea for the title being "Baby Mine," then with the manuscript under her arm she wended her way to the general offices of Colman and Harris and there read her play. This firm laughed at the situation, and complimented her on her effort, but they couldn't possibly produce anything new that season. Then she took the manuscript to William A. Brady, who previously had produced her "Divorcee." Brady told her he would read the piece at his earliest opportunity. Three weeks elapsed and she hadn't heard from him. Exasperated by the delay, she called upon Wexelman and Kemper, who heard the play and told her they would consider it. She had begun to give up hopes, but upon reaching home there was a telegram from Brady saying that he had read the farce, and had decided to give it a trial. He also suggested she re-elaborate the piece "Baby Mine." This suggestion was gratefully received and acted upon, and after Miss Mayo had spent but a week on the farce, something it here and there, it was put into rehearsal. The result of her labor is now theatrical history.

"Baby Mine," which will be seen here at the Barton Opera House on Tuesday Aug. 29 is one of the greatest successes of recent years, and is credited with being the only two-hour-and-a-half show containing a thousand laughs actual count. The day after its first performance, the play was almost unanimously commented upon the excellent technique of the piece, and the ludicrous situations. To this, however, the authorities replied that she knew absolutely nothing of technique, not having read over a half dozen plays in her life, and she attributed her success to "luck." But, be that as it may, "Baby Mine" promises to make her a rich woman. It is now running in London at Sir Charles Wyndham's Criterion Theater, in a capacity illustrating the success that is being achieved by the London papers in their criticisms fairly soon for advertising to express its worth and merit. A number of companies are now playing it in America, and the British rights include permission to produce the play in Australia and India, and arrangements are being made by Mr. Brady for its appearance in Australia, Germany, Italy, and Sweden with special compliments in each country.

WHERE SHALL I SPEND MY SUMMER OUTING?

The following Announcements of California's Most Celebrated Hotels, Health and Summer Resorts will solve the question. Literature and Additional Information will be furnished promptly at The Republican's Free Information Bureau or by writing direct.

SAN FRANCISCO HOTELS

HOTEL STEWART SAN FRANCISCO

Geary Street, above Union Square
European Plan \$1.50 a day up
American Plan \$3.00 a day up
New steel and brick structure.
Every comfort and convenience.
A high class hotel at very moderate rates. In the center of theatre and retail district. On car lines transferring to all parts of city. Electric omnibus meets all trains and steamers.

HOTEL STEWART

HOUSE OF COMFORT HOTEL MANX

Power Street, O'Farrell
Newly decorated and equipped.
First class service and attention.
Satisfying to all tastes.
Satisfying to all tastes.

HOTEL COLONIAL STOCKTON STREET NEAR SUTTER SAN FRANCISCO

American Plan \$3.00 a day
European Plan \$1.50 a day
An hotel with all modern conveniences. Every room connecting with bath. The Colonial is recommended to persons who desire a select quiet and home-like abode with superior service. Sutter Street car direct from Ferry Depot. An "Estate" town house transfer to Sutter Street.

ALPINE HOUSE 480 PINE STREET, NEAR TERRY, SAN FRANCISCO

Centrally located to all retail stores and business houses.
ALL MODERN IMPROVEMENTS.
Rates per day \$2.50, \$3.50 and \$4.50.
per week, \$15 to \$21.
FREE BATHS
Take elevator from Ferry or from S. P. Terminal St. depot and get off at First St. O'BRIEN & HAMILTON, Props.

Hotel Atlanta Seventh and Mission Streets SAN FRANCISCO

A strictly modern fire-proof hotel centrally located, opposite San Francisco's magnificent post office. Two hundred rooms—with telephones in every room—Private Bath rooms. Rates from \$10.00 to \$20.00 per week. \$3.50 to \$10.00 per week. Ralston & Sherry, Props. C. A. Skelton, Mgr.

CANADIAN PACIFIC EAST Through the Canadian Rockies

NOTICE OF ANNUAL MEETING.
Please take notice that the annual meeting of the stockholders of the American Colony Canal and Irrigation Co. will be held at the American Colony Hotel House, Fresno, California, on Saturday, Sept. 2, 1931, at 7:30 p. m. for the purpose of electing officers for the ensuing year and for the transaction of such other business as may properly come before the meeting.

W. R. CARTER, Secretary.

NOTICE TO CREDITORS.
In the Superior Court of the County of Fresno, State of California.

Notice is hereby given by the undersigned, executor of the last will and testament of W. T. Maupin, deceased, to the creditors and all persons having claims against the said deceased, to exhibit such claims, with the necessary vouchers, within ten months after the first publication of this notice, to the first publication of this notice, to J. Lawrence Maupin, executor of the last will and testament of said deceased, at the office of Milton M. Dearing, in Room 214, Land Company Building, City of Fresno, Fresno County, California, which said office the said executor selects as his place of business in all matters connected with said estate of W. T. Maupin, deceased.

LAWRENCE MAUPIN,
Executor of the last will and testament of W. T. Maupin, deceased.
Milton M. Dearing, Attorney for said Executor.
Date of first publication, August 2, 1931.

SUMMONS.
In the Superior Court of the County of Fresno, State of California.

Action brought in the Superior Court of the County of Fresno, State of California, and the complaint filed in the office of the Clerk of said County of Fresno.

Florence C. Breed, plaintiff, vs. Francis R. Breed, defendant.
The People of the State of California, do hereby certify that Francis R. Breed, defendant, is hereby directed to appear and answer the complaint in an action entitled as above, brought against you in the Superior Court of the said County of Fresno, State of California, within ten days after the service on you of this summons, if served within this county, or within thirty days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for the relief demanded in the complaint, as appearing upon contract, or she will apply to the court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Fresno, State of California, this 12th day of June, A. D. 1931.

(Seal) W. C. MILLER, Clerk.
By J. E. Cartwright, Deputy Clerk.
Frank E. Short, attorney for plaintiff.

NOTICE.
In the Superior Court of the County of Fresno, State of California.

In the matter of the application of Fresno Steam Laundry Company, a corporation, for voluntary dissolution.

Application having been made by Fresno Steam Laundry Company, a corporation, to the Superior Court of the County of Fresno, State of California, for a decree dissolving said corporation and the above entitled court having set the same for hearing on Monday, September 4, 1931, at the hour of 10 o'clock a. m. on said day.

And it is hereby ordered that the said petition be heard on Monday, September 4, 1931, in Department 1 of said above entitled court in the court room thereof in the court house in the City of Fresno, County of Fresno, State of California, at the hour of 10 o'clock a. m. on said day, when and where any objections to said application will be heard.

D. M. BARNWELL, Clerk.
By Louis F. Ryan, deputy clerk.
(Seal of the Superior Court.)

NOTICE OF ASSESSMENT.

John Brown Oil & Cement Company, principal place of business, Fresno, Fresno County, Cal. Location of works, Section 21, Township 16, R. 12.

Notice is hereby given that at a meeting of the directors held on the 16th day of August, 1931, an order of assessment (No. 5) of the costs per share was levied upon the subscribed capital stock of the corporation payable immediately in United States gold coin to J. H. Kelly, sec. of the said company at the office of the company in Room 106 Forsyth Building in the City of Fresno, County of Fresno, State of California.

Any stock upon which this assessment shall remain unpaid on the 18th day of September, 1931, will be delinquent and advertised for sale at public auction and unless payment is made before will be sold on Wednesday, the 18th day of October, 1931, to pay the delinquent assessment together with costs of advertising and of sale.

J. H. KELLY, Sec.
By order of the Board of Directors.
Office Room 106 Forsyth Building, Fresno, Cal.

DELINQUENT SALE NOTICE.

The Arizona Oil Company, location of principal place of business, Hanford, Kings County, California.

Notice—There is delinquent upon the following described stock on account of assessment (No. 10) levied on the 11th day of July, 1931, the several amounts set opposite the names of the respective shareholders, as follows:

No. of Shares.
Allen, Jesse J. 300 1000 250.00
Allen, Jesse J. 300 1000 250.00
Barnes, Henry J. 415 1660 415.00
Ensign, J. C. & H. C. 20 50 25.00
Ensign, J. C. & H. C. 139 550 139.00
Ensign, J. C. & H. C. 277 1100 277.00
Lemon, Louis 72 100 72.00
Lemon, Louis 200 800 200.00
Noble, Eugene B. 234 936 234.00
O'Connor, R. T. 151 150 151.00
Sells, J. A. 410 160 410.00
Truitt, Myrle 409 160 409.00
Vignar, J. B. 44 160 44.00
Vignar, J. B. 111 100 111.00
And it is accordingly with law and an order of the Board of Directors made on the 14th day of July, 1931, so many shares of each parcel of such stock as may be necessary will be held at public auction at the office of the corporation at 215 West South Street, Hanford, Kings County, California, on the 6th day of September, 1931, at the hour of 2 o'clock p. m. of such day to pay delinquent assessment thereon, together with costs of advertising and expenses of sale.

B. M. ROSENBERG, Secretary of the Arizona Oil Company (office with National Investment Company, Inc., 215 West South Street, Hanford, California).

TO ORGANIZE REALTY EXCHANGE ON SEPT. 5TH

Date Is Set at Meeting of Members of Realty Board Here.

Also Will Vote on That Date on Dissolution of the Board.

Voting to organize the proposed Fresno real estate exchange on September 5th, on the lines laid down by a committee appointed last spring to draft a plan of procedure, fourteen real estate men of this city met last night at the offices of Haber Bros.

The meeting was called by President H. H. Alexander of the real estate board, who included in his opening statement a resume of what the board has failed to do, saying that the main trouble has been a lack of cooperation in the membership. As a result of this and some other statements to the same effect, the matter of the dissolution of the board will also be up for action.

Alexander, in opening the meeting, sketched the movement for a real estate exchange here, recalling meetings of last spring when the matter was up, and outlined the plan of organization which had been accepted. Then, he said the question was, whether enough support could be secured to warrant going ahead with the work of organization.

In a general discussion that followed, several differing opinions were expressed. The most sanguine was that the membership list of nineteen which has been secured, is more than enough to go ahead with. The opposition was of two sorts—that of two who objected to the essentials of the plan of organization, and those who objected to starting the exchange without at least 75 percent of the licensed dealers of the city as members. The proponents of the plan argued, on this last point, that if experience in other places counts for anything, the exchange should pay almost from the first, and prove of such advantage that the leading firms of the city who stay out at first would automatically work in later on.

Then John A. Neu put a motion for organization on the 5th, and it was carried. Neu carried a second motion that the secretary of the board be instructed to notify all members of

The Youngsters

Will be going to school now pretty soon. Do you know if they have an eye defect that should be corrected?

Don't permit them to suffer from neglect. We've had many years of experience with children's eyes. If they need treatment we'll tell you so. If glasses are indicated we can fit and make them perfectly. If nothing is wrong we'll tell you that.

ONTARIO AGAIN BUYS PEACHES PAYING 10C IN FOWLER SECTION

Putting Out of Low Price By Bears Failing to Show Effects.

Efforts to bear the peach market have so far failed. While packers who have watched the buying operations of the season with dismay have in the last week or so sent out buyers with such prices as 5c for the dried stock, at which figure they knew goods could not be obtained, the North Ontario company, one of the largest buyers of the year, has been out gathering in more crops at 10c.

News of the activity of this firm has come in by various channels from the Kingsburg and Fowler sections, Thursday and Friday being reported as buying days.

With the peach game admittedly in the hands of the Ontario to make this year, there has been no sign of a let-down on the part of this firm.

POWER COMPANY WILL IMPROVE PHONE LINE

Transposition of Wires at Cost of \$18,000 Is Found Necessary.

A transposition of telephone wires at every other pole between this city and Bakersfield instead of every half mile as at present, is to be undertaken by the San Joaquin Light and Power company, at a cost of about \$18,000, for the purpose of improving the private telephone service of the company between these two cities. The work is being undertaken as a result of a report submitted yesterday by General Superintendent L. N. Peart.

Induction and atmospheric conditions are held responsible for the trouble which Bakersfield and Fresno offices have experienced in using the telephone connecting these offices. Conversation between these offices has been found possible only at certain times of the day.

The board to be present at the meeting on the 5th, as at that time the matter of the dissolution of the body would be put to a vote.

Secretary Edwards stated that an organizer of the National Federation of Real Estate Exchanges will be here on the 5th, probably, to take part in the organization of the new exchange.

Edwards read a letter from the exchange of Denver, where the last national convention of the federation was held, thanking the local body for the gift of wine and raisins which was made the time of the convention. The letter also expressed best wishes for the fight which Fresno is making for the national convention in 1915.

It was stated last night that Fresno should have a representative at the annual convention of the state real estate boards at San Francisco in September, but nothing is to be done with this until the fate of the local board has been decided.

In response to various statements last night that the board here has made a brief statement, in which he told of the various things the board did, among them the getting out of the best pamphlets of Fresno county that has yet been issued. President Alexander, in reply, stated that the board is a failure in the sense that it fails to secure the co-operation among members which is a prime object of the organization.

CROPS IN EAST FAIL; DRIED STOCKS VERY LOW

Sorenson of Farmers' Union Tells of Conditions He Found There.

Effects of Drouth Should Prove Beneficial to California Fruit.

Reporting crops of the East generally failures and in some cases shorter than in almost any year that may be cited as a precedent, and declaring markets clear of dried fruits in the East, with an unsatisfied demand from the retail trade, A. Sorenson, president of the California Farmers' Union, Inc., returned here Friday night after a stay of several months in various fruit producing and marketing points of the country.

He declares that no generalization can be made of the money conditions, as parts of the country he found unusually prosperous, while there were evidences of hard times in others. The northwest states of the Lake region he found in fine condition, because of crop success, and declared there is a good demand for California fruits in this region. He also found lots of money in the great corn growing regions, where there is a large crop, he declares. In some of these sections, he stated, he found dried fruit stocks in general he declared are down to a minimum.

"Crops are very bad as a rule over the East, especially the early crops, on account of drouth," he said. "Take Maryland, for instance. A fruit canner of this place, who usually ships twelve cars of canned strawberries a year, this year able to ship but one car. The Western New York canners will average but about half a pack, and many of them are not running at all this season. Dried fruit stocks in general he declared are down to a minimum.

"All of New York has had crops, in fact. On July 10th, when I left New York City, wells were drying up as far north as Canada, as my trip extended up to Toronto, and the drouth was being felt even there where crops are good."

As to places where crops are good, he observed that Western Michigan has a good peach crop, and the four states in that region devoted to apple culture have good crops. The only part of these crops that might have come in competition with California fruit would be the surplus of dried apples, but these are produced, mostly by housewives in the back yards. I do not believe any effect on the dried fruit market will be shown. Dried apples are higher even than the bumper crops of last year.

"Going south from there, I found conditions very bad. The peach crop of Northeast Texas, which usually competes with that of California, is really nothing at all. That is no exaggeration. There is literally no crop. Shipping points in Georgia, moreover, announced 'lost' 20 percent of a crop, while the canning crop is an absolute failure. As an example, one man in New Orleans, who is accustomed to use 100 cars of canned Georgia peaches a year expects to get five cars this year at the outside."

"The vegetable country north as far as New Jersey is all in bad condition, except for the later crops, which have been helped by rains that broke the long drouth of the early summer. The strawberry crop in North Carolina, for instance, was a failure as much as that of Maryland. There are a few apples in Canada and Western New York, but only a few."

Sorenson said he was in New York City during the crucial time in the game and had the pleasure of personally contradicting bear statements given out. The J. K. Amisby company were leading bears. Sorenson said a buyer he heard say he would not take grapes at 1c, when he was offered a block at 4c.

YOUTHFUL CRIMINALS ATTEMPT TO ESCAPE FROM DEPUTY LAIRD

Eugene Alder Breaks Out of Cell and Robs Room at Bastille.

That Earl Stanley and Eugene Alder, both 18 years of age, who were recently taken to the reform school at Lone, were two of the very worst youthful criminals that had ever been brought to this notice, was the statement made yesterday by Sheriff Walter Laid, upon his return from a trip out of the county.

The fearlessness of the boys is remarkable and they will even fight with a grown man in order to gain their purpose, stated the sheriff. While incarcerated in the Fresno county jail, before their departure for Lone, the Alder youth, who was being detained in the detention ward upstairs, broke out of his cell and entered the room occupied by Deputy Sheriff Laird. Alder ransacked the room of the deputy and breaking into his trunk, stole his wife's clothing and one officer were not his clothes and one officer were not his clothes and one officer were not his clothes.

It was not until the boys were on the train enroute to Lone that Deputy Laird noticed that Alder was wearing his ring. He took the ring away from the boy. The night before the boys were taken out to Lone they were allowed to stay in the same cell and the officers overheard a plot of the boys to escape from the deputy at the first opportunity.

As the boys passed through the jail door they were handcuffed together. They smiled their attempt to make a dash for liberty. On the way to the reform school the lads confessed to many robberies that they had committed on the Pacific coast. One of the boys boldly declared that they had saved up \$1,500 from persons that they had robbed and that this money was buried and they would use it after they were released from the reform school. All efforts on the part of the officers to find out the place where the money was buried proved of no avail. The officers put very little credence in this story.

While waiting for the train at Tracy, Laird looked the boys up in the jail there. Feeling that all was not right he returned to the Tracy jail just in time to prevent the boys from making their escape. In some unknown manner they had smuggled saws into the cell and were busily engaged sawing through the wall when Laird stepped up to the cell door.

When Laird went to take the boys out of the Tracy jail, one of them struck at him with a short piece of chain, but the deputy sheriff dodged the blow. The boys made many attempts to escape but Laird was on the watch all the while and their attempts proved of no avail.

The grips of the lads were searched at Lone and watches and fobs were found in the grips. It is thought that all of this was stolen by the boys, although the officers have been unable to trace the owners. The authorities have also learned that the boys burglarized the Maricopa drug store and secured \$400 in cash.

has subsequently bought for better than 5c.

"These conditions, he declares, were all directly responsible for the fine prices early shipments of California green fruit brought, and he said the bare condition of the market looks good for the dried fruit, grapes, as well.

PLANS COMPLETED FOR CLAPP MEETING HERE ON WEDNESDAY

Will Be Held in Park and Senator Will Be Only Speaker Heard.

San Diego Date May Be Out Out to Allow Time for Fresno.

Arrangements for the speech which U. S. Senator Clapp of Minnesota will make on the initiative, referendum and recall, here next Wednesday night, under the auspices of the Commonwealth club, were completed by the board of governors of the club, at a luncheon at the Hughes Hotel yesterday noon.

Secretary A. M. Drew was instructed to secure permission for the use of the band stand in the court house park, and the meeting is to be held there, as the most comfortable and pleasant place in the city during the summer months.

Drew read a letter from State Railroad Commissioner Eshtelman, asking that arrangements be made for Max Thelen, attorney for the commission, to speak at the Clapp meeting here on the subject of the railroad amendment on which the people of this state will vote this fall. However, the board of governors reached the conclusion after some discussion that it would be better to have this discussion by Thelen at the time of a later meeting to be held here, at which Governor Hiram Johnson is also to speak.

Incidentally, the decision was reached that the entire time of the evening Wednesday shall be given over to Clapp and his discussion of the direct legislation issues.

FRESNO FIRST FALL. Some question has arisen from the circumstance that Clapp is expected to speak in San Diego next Tuesday evening, and this arrangement will necessitate his taking a train out of there at midnight, which will put him in Fresno just before the meeting here Wednesday. However, Secretary A. T. Ken of the Direct Legislation league of California has given Fresno the precedence in the Clapp meetings. This means that in case the trip from San Diego into Fresno and the two meetings shall be found too hard an itinerary, by Clapp, to visit the San Diego meeting and speak here. This would put him in Fresno early Wednesday, and in case this arrangement is made it is planned to entertain him here extensively.

Chester H. Howell of the board of governors will go to Los Angeles Monday to meet Clapp on his arrival there from the East, and at that time, the matter of the itinerary will be settled, and the decision reached will be wired to Fresno.

Kutner's School Supplies Coming In

1119-1123 J Street 1801-1819 Mariposa Street.
